# WORLD AND CONTINENTAL RECORDS

(as at June 21, 2011)

## ABBREVIATIONS & KEY (See also page 7)

**IAAF** = IAAF World Record; **IAAF-J** = IAAF World Junior Record; **W** = Unratified World Best; **WJ** = Unratified World Junior Best; **WY** = Unratified World Youth (under-18) Best; **W35** = World (Masters) over-35 best; **W40** = World Masters best; **AFR** = Africa; **ASI** = Asia; **C** = Commonwealth; **CAC** = Central America & Caribbean (included the countries with borders to Caribbean though not the USA); **EUR** = Europe; **NAM** = North America; **OCE** = Oceania; **SAM** = South America

## NOTES

**A** = made at altitude of 1000m or higher; **a** = aided road course according to IAAF rule 260.28 (separation between start and finish points more than 50% of race distance or the decrease in elevation greater than one in a thousand); **est** = estimate; **h** = hand timing; **!** = timing by photo-electric cell; **\*** = awaiting ratification but otherwise valid; **#** = not officially ratified outdoors (some ratified indoor marks have this symbol); **X** = unratified due to no doping control

Where relevant, the pace is given for world record performances. Where known, the time given is that of the runner who set the record, rather than the pacemaker

From 1998, IAAF Rule 260.18a (formerly 260.6.a) was revised to allow world records to be set at a facility with or without a roof (i.e. indoors or outdoors); Accordingly, indoor marks superior to outdoor records and set since 1998 are listed on these pages in addition to outdoor bests

Included again are the individual road events which were given world record status from January 1, 2004. These feature many unratified, unofficial and unconfirmed marks for three main reasons. Firstly, most of the IAAF's area federations have not yet established records at these events. Second, several of the world's major long distance races do not take official times en-route for runners and finally – though the final distance not be regarded as aided (see note above) – the intermediate distance may well be.

It should also be noted that some federations have ratified road records even though the marks were set on courses such as Boston which do not fulfill IAAF criteria. Any comments and amendments to these records will be gratefully received by the editor.

## NATIONAL RECORDS

These lists mainly include official records as recognised by various national federations, with any superior statically valid marks which are not recognised listed in footnotes. In some cases, federations recognise as records illegal performances, such as wind-assisted sprints, javelin throws with old implement specifications, combined events scores on outdated tables and in the case of USATF, one performance by an athlete while proved guilty of a doping violation. In such cases the best statistically valid mark is given in the main list, though the ratified mark does appear in the footnotes.

No sprint or jump marks obtained with a following wind of more than 2 m/s are included, nor are any which were definitely unsubstantiated. However, performances in combined events which would under post-2010 IAAF rule 260.27 be regarded as wind-assisted are shown as legal as the rule change is not retrospective. Where known, all marks set up to June 21, 2011 are included. Those set in 2011 are given in bold characters.

### NATIONALITIES

Caribbean and Pacific athletes with double nationality have been listed according to their eligibility at international championships, but such decisions are open to debate. Tahiti, formerly French Polynesia, accepts records by athletes who are of non-Polynesian origin and who were non-permanent residents. Ex-USSR Republics and former Yugoslav Republics accept records affiliated to domestic clubs. Vanuatu has decided to eliminate records by non-citizens before independence.

### AUTOMATIC TIMES

Following the policy of the IAAF, automatic times are given to hundredths of a second wherever possible. For sprint events, manual marks are listed only if they are least 0.24 seconds better than the automatic record. Please note that these marks are given for information only and may not be officially recognised by the respective federations. For 400m and 400m hurdles, automatic records only are given.

### WALK RECORDS

Please note that these are not necessarily track marks.

### FOOTNOTES

These are included for each event to explain the decisions of the compilers and to present problems they felt unable to solve. Asterisks are given against records where there is a relevant footnote for that country.

### RECORDS FOR SUSPENDED NATIONS

Records are listed for Cambodia and South Africa even though the performances may have occurred while those countries were suspended by the IAAF.

### EQUALLED RECORDS

Please note that some records equalled by the same athlete or country may not have been included due to the policy of the federation.

### ILLEGITIMATE MARKS

Some countries have chosen to ratify records which the IAAF would regard as illegal because of doping violation or wind assistance. These have been relegated to footnotes with the best legitimate mark given in the main list. However ratified records set by women in mixed races are shown in the main list with the best non-mixed mark footnoted.

### IAAF RULE 260.18.a

The 1998 change to this rule (formerly 260.6a) – which allows indoor marks to be recognised as “absolute” records – has been reflected in these lists, though it should be noted that most federations have not taken account of the revision so far. Those who have are AUS, DOM, ESP, EST, FRA, LTU, POL & SLO. For other federations, where relevant, separate listings are given of those indoor performances (set both before and after 2000) which are superior or identical to the recognised mark.

### IAAF RULE 260.27

The 2010 change to this rule means that a combined event performance is regarded as wind-assisted – for record purposes – if the average assisting wind velocity for the three affected events exceeds two metres per second. Previously it was the case that the score would be legal if that condition applied and/or none of the three relevant following “winds” exceeded four metres per second. The narrowing of the criteria means that some existing records (e.g. Larisa Nikitina’s Russian Heptathlon record of 7007, with winds of 1.4, 1.1 & 4.0) would be judged as windy under today’s rule. It has been determined that this rule change should not be applied in retrospect, so such marks are shown as legal in this section. Note also that in March 2010, the IAAF Council added a caveat to the rule confirming that marks which are windy only under the new ruling – though not acceptable as records – can still count as qualifying marks for championships.

Readers are invited to send any corrections to Winfried Kramer (Fax: 49 - 6821 932101; email: kramer@saar.de) or any other compiler (see page 6 for all compilers’ addresses)
