**Arrangement:**

The collection is arranged alphabetically by name of county.

**Scope and Content Note:**

This collection consists of reports documenting the architecture and histories of approximately 1500 Missouri churches. Each church has been indexed by church name. The quality and completeness of the reports varies from county to county, ranging from in-depth studies to those with a minimum of information. A typical entry contains a standardized report form, which includes the name of the church, its location, construction dates, denomination, architect, contractor, size, general condition, and style. In addition, there is a visual check list for each church researched. It includes entries for plans, church towers and spires, roof shapes, exterior wall materials, door and window shapes, and roof trims. Typical reports also include interior and exterior pictures of the churches in a variety of formats, including colored slides, color and black and white photographs, and, in some instances, schematic drawings. Although the reports have been removed from binders and placed in folders for conservation reasons, original order has been retained.
