

# MARSTON

COLLECTION

## CARE

Dust frequently with a clean, soft, dry, lint-free cloth. Polish your furniture approximately every 6 months, rubbing the polish in the direction of the grain. Cherry wood will darken over time. Avoid direct sunlight, as it will accelerate its darkening tendencies. Avoid placing plastic or rubber materials on your furniture. Do not use polishes that contain toluene, acetone or citrus oil.

Collection is available in light cherry or dark cherry finish, both which grow darker and richer over time and with exposure to sunlight.

NOTE: Marston light cherry and dark cherry finishes do not match Turner light cherry and dark cherry finishes.
