Headquarters, Army Service Forces,

Washington 25, D. C., 5 July 1945

Army Service Forces Ordnance Supply Catalog, ORD 8, SNL G-529, 5 July 1945, has been prepared under the supervision of the Chief of Ordnance and is published for the information and guidance of all concerned

[SPX 461 (29 June 45)]

BY COMMAND OF GENERAL SOMERVELL:

Official:

EDWARD F. WITSELL

Major General

Acting The Adjutant General

LeR. LUTES

Major General, GSC

Chief of Staff

DISTRIBUTION: AAF (10); AGF (10); ASF (2); T of Opns (10); AAF Comds (2); Arm & Sv Bd (1); S Div ASF (1); Tech Sv (2); Sv C (10); PC&S (1) except Air Bases (3); PE 9 (5); Dist O, 9 (5); Dist Br O 9 (3); Reg O, 9 (3); Establishments 9 (except Am. Establishments) (5); Decentralized Sub-O, 9 (3); Tk Deps 9 (5); Gen & Sp Sv Schs (10); USMA (2); A (10); CHQ (10); D (2); R 9 (2); Bn 9 (2); C 9 (3); AF (5). For explanation of symbols see FM 21-6.

GENERAL INFORMATION (Cont'd)

In the event that the stock numbers in this pamphlet do not correspond with those used in the ORD 9, List of all Service Parts, for these items, the stock numbers in this pamphlet will govern.

ORDNANCE OR MANUFACTURER PART NUMBER AND ORDNANCE OR MANUFACTURER DRAWING NUMBER—In columns 3 and 4 manufacturers' numbers will always appear in parentheses. When more than one number applies to the same part, all except the first will be indented.

INITIAL ISSUE LOAD GUIDE—Columns 6 (a) and (b) list the quantities of spare parts and equipment to be used as an initial issue guide to 3rd and 4th echelon organizations.

ARMY DEPOT GUIDE (Per 100 Major Items 30 Day Stock)—Column 7 should be used by the Army Depot as a guide in establishing initial quantities of spare parts and equipment on hand.

In order that the Ordnance Department at large may be able to make equitable distribution of the total stock of any one item, ordnance organization commanders should limit their requisitions and stocks to the *absolute minimum* requirements that are estimated to be necessary for each contemplated tactical operation. The Chief Ordnance Officer of a Force is responsible that various units in the Force do *not* use the *same* number of major items in computing their stocks; e.g. if there is a grand total of 168 Vehicles in the entire Force, each ordnance unit in the Force should not claim the entire 168 Vehicles as a basis for computing its stocks. The Chief Ordnance Officer must allocate, for spare parts stockage purposes, the number of Vehicles of the Force among the various ordnance units. See "Supply Functions of Company," FM 9-10; Ordnance Field Maintenance.

BASE DEPOT (including 5th echelon)—Column 8 lists the estimated quantities of parts required for one year's maintenance per 100 major items.

PROCUREMENT—Column 9 lists the quantity procured for one year's maintenance per 100 major items, including the distribution factor required for proper functioning of the Ordnance Provision System.

UNIT WEIGHT—Column 10 lists the unit weight of the item; 10% should be added for weight of packing.

GUIDE FOR 100 MAJOR ASSEMBLY REBUILDS—Column 12 lists the quantity of each part estimated to be necessary for rebuilding 100 major items or component assemblies of the major item.

First and Second Echelons—Using troops performing first and second echelon maintenance are authorized to requisition only those parts marked by a % sign in column 1 as well as any standard hardware. The % symbol indicates those spare parts which are authorized in the ORD 7 sections of the Ordnance Supply Catalog (SNL's) and in addition denotes those parts which, while not normally carried by using organizations, may be issued to them for replacement purposes.

Federal Stock Numbers: Classifications codes for Federal Stock Numbers listed herein will be found in ORD 5-2 "Stock List."

SPECIAL INFORMATION

Major Item Designation: The major item covered by this catalog is designated as a general purpose vehicle as defined in paragraph 3, AR 850-15, dated 28 August 1943.

Components of Kits, Sets and Assemblies: Whenever any doubt might exist as to the components of an assembly an explanatory statement or a complete listing of components is furnished. For all KITS and SETS a complete listing of components is given. Those components of a KIT or SET which are available as separate items are cross referenced so that separate parts can be requisitioned when one or two items are needed and the entire KIT or SET can be requisitioned when appropriate for the work to be done.

Attaching Parts: Attaching parts such as bolts, nuts, screws and washers are indented under the part or assembly attached, provided that part or assembly is also an authorized item of issue. If the part attached is not an authorized item of issue, the attaching parts are listed in one of two ways: if special, they are placed in their own alphabetical position in the group. If standard hardware, they are listed only in group 2304 without relation to individual usage on the vehicle.

Standard Hardware and Bulk Material: All standard hardware and bulk material applicable to the vehicle is summarized in group 2304. Only such standard hardware as may be indented (as an attaching part) under another part is listed elsewhere in the book. Procurement quantities are shown only in group 2304 for standard hardware and bulk material. No echelon breakdown is shown in this group as such items for the lower echelons are issued by the fifth echelon.

Indexes: Complete indexes, alphabetical and numerical, are to be found at the back of the book. These indexes and contents are explained in brief paragraphs at the beginning of each index.

Stock Numbers: The prefix of the SNL type stock number (i.e. G544, G518, etc.) signifies that the particular part or component was originally coded under the major item designation for that SNL and does *NOT* mean that the part is used only in that major item. All subsequent lists which include that same part will show the identical stock number.

Publications Pertaining To This Vehicle:

Operator's Manual

TM 10-1281

Definition of Locational Terms: The terms RIGHT and LEFT are determined by standing at the rear of the vehicle and looking forward.

How To Find Parts: This catalog is arranged and cross-indexed so that parts can be found easily even though only one of the several identifying factors is known. The various ways in which parts can be located are as follows:

If the nomenclature (basic name) only is known, and the subgroup is not, refer to the alphabetical index in the back of the book. This index will give the subgroup in which the part is listed. As the part names are arranged in alphabetical order within this subgroup, the complete listing of the part can readily be found.

If any of the numbers—Ordnance, manufacturers' or stock—is known, refer to the appropriate numerical index in the back of the book. This index will give the subgroup number in which the part is listed. By checking the appropriate number column in that subgroup, the complete listing of the part can readily be found.

If the use, function or location, of the part is known, refer to the standardized government grouping immediately following this explanation. Then turn to the subgroup selected and determine the proper item.

Notice of discrepancies or suggested changes should be directed to Office, Chief of Ordnance-Detroit, Maintenance Division, Military Publications Branch, SPOMM-BM, Detroit 32, Michigan.

Standardized Government Grouping: The parts listed in this catalog are arranged by groups and sub-groups and alphabetically within these groups. Parts are grouped primarily on the basis of their function. This arrangement facilitates location and selection of parts. See "How To Find Parts" immediately preceding.

MAINTENANCE TOOLS FOR ORDNANCE PERSONNEL

The tools required for Ordnance organizations for the maintenance of Motor Vehicles are listed in ORD 6 SNL G-27, "Tools, Maintenance, for Repair of Motor Vehicles," and are issued as required.

NOTES

The SNL reference in the note symbol column indicates the SNL in which the item is stored, issued, and reviewed.

- ∅ The major item indicated by (∅) is stored, issued and reviewed under "Major Items," ORD 3 SNL G-1.
- W (a) Items indicated by (W) are non-expendable.
- (b) Items *not* marked by (W) are expendable.

ALPHABETICAL INDEX

Certain classes of parts are not included in this index. Those parts, which are attaching parts and indented under the part attached have been omitted as they can be located by looking up the item attached. However, where the attached part is not an authorized item of issue, the attaching parts are listed in each group in alphabetical sequence (if special) and included in this index. All standard hardware and bulk material is listed in group 2304 and omitted from this index, whether or not the item is an attaching part. For example: To find the attaching parts for a bracket, look up BRACKET in this index, determine the correct BRACKET you are interested in and turn to the group shown, where the attaching parts will be shown. If you do not find the desired BRACKET in the index, then it will not be an authorized item of issue and the attaching parts will be found listed in their own right or, if standard hardware will be found in group 2304. If this does not locate the attaching part it is not an authorized item of issue.

Item	Group	Item	Group
A			
ABSORBER, shock, assembly.....	1604	LEAF, main spring, assembly.....	1601
B			
BEAM, axle, assembly.....	1101	LEVER, cam, hand brake.....	1201

ORDNANCE AND MANUFACTURERS' PART AND DRAWING NUMBERS

This index is prepared in strict numerical sequence, that is, all letters or dashes prefixed, suffixed or interspersed in the numbers are disregarded. For instance, AMB-91X60-R is in sequence as 9160 but the complete number AMB-91X60-R, including the manufacturers' symbol as the prefix, is shown in the listing. However, Ordnance Standard Parts as listed in group 2304 are not included in this index. All Ordnance numbers in this index are identified by the prefix "ORD" in this index but not in the body of the book.

STOCK NUMBER INDEX

This index includes two types of stock numbers which are not intermixed, the SNL prefix type and the stock class code (manufacturers' numerical symbol) prefix type. These numbers are each arranged numerically by types. However, stock numbers for Ordnance Standard Parts as listed in group 2304 are not included in this index.

Stock No.	Group	Stock No.	Group	Stock No.	Group	Stock No.	Group
