The London Borough Councils

The London boroughs were constituted under the London Government Act, 1963 and the first elections to the new councils were held on 7 May 1964. Prior to 1976, councillors were elected at general elections held every three years but as a result of an order made under the Local Government Act, 1972, the term of office of members of London borough councils was increased to four years. The number of wards in a borough varies from 19 in Barking and Dagenham, Richmond upon Thames and Tower Hamlets, to 36 in Greenwich, with from 1 to 3 councillors elected for each ward. London borough councils have from 48 to 70 members. Electors have as many votes as there are councillors in each ward. Before 1978 each council included aldermen, to a maximum of one sixth of the councillors, elected by the councillors from among themselves or from persons qualified to be councillors. Under the Local Government Act, 1972, the office of alderman of a London borough council ceased to exist after the 1978 elections. The mayor of each borough is elected annually by each council from among the councillors.

Cities of London and Westminster

The City of London is constituted differently to the London boroughs and is therefore not included in this election. The Corporation consists of 130 common councilmen, 4 to 12 of whom are elected annually for each ward, and 25 aldermen (one for each ward) in addition to the Lord Mayor. The aldermen are elected for life by the ward voters (who include business as well as resident voters). Data for the City of London and Westminster South constituency therefore, are restricted to that part lying within the City of Westminster.

Calculations

The method of calculating the percentage votes cast for the main party groups used first in the 1982 volume has been employed again in this publication. This method involves using the average vote per seat in a ward when building to borough constituency level or Greater London, thus removing possible bias arising from differing numbers of seats per ward in a borough. In order that comparisons may be made at a borough level with elections held before 1982, a table has been produced using a strict percentage of votes cast and this may be found in the Appendix.

Population

The estimates of total population used in table 3, relate to April 1986 and come from the 1985 round of London borough projections (GLC Statistical Series 52).

Table 1 Candidates, with party affiliation and votes cast in each ward at the London Borough Council elections, 8 May 1986

Notes

- (i) The ward names are shown in bold capitals and are followed by the parliamentary constituency.
- (ii) Elected candidates are shown in bold type.
- (iii) For an explanation of party affiliations see page 3.
- (iv) The candidates in **Hackney - Northwold** were returned unopposed.
- (v) The election in **Sutton - Wallington North** was deferred due to the death of one of the original candidates. The results here refer to the consequent election held on 19 June.
- (vi) Two by-elections (**Hounslow - Heston West and Tower Hamlets - Holy Trinity**) have been held since the general elections on 8 May. The results of these are included immediately following the respective results of the May election in those wards. See page 98 for notes relating to by-elections.

Table 2 Summary of election results by ward

Notes

- (i) Care should be taken when comparing these results with elections prior to 1982, because of ward boundary changes.
- (ii) The party grouping 'Lib/SDP' used in column (6) consists of all official Alliance candidates however described on the nomination papers.
- (iii) The borough totals include a correction to the percentage votes cast for the differing numbers of seats in wards. No correction has been applied where one of the major parties did not contest all possible seats. There is, therefore, some under-representation in the borough totals. This effect is not thought to be great because the potential vote for a party is likely to be low in a ward in which it does not contest all seats.
- (iv) Percentages do not necessarily add to 100.0 due to rounding.
- (v) 0.0% means that the percentage is greater than a zero but less than a half of the least significant figure.
— means zero.

Table 3 Summary of election results by parliamentary constituency and borough

Notes

- (i) Care should be taken when comparing these results with previous elections because of constituency boundary changes. A supplement to the 1982 volume was produced taking account of these changes when they had been finalised. This was bound into later reprints of that volume but copies of the supplement may still be obtained from the authors for a small charge.
- (ii) A correction for the differing numbers of seats in wards has been applied when calculating the percentages for boroughs and constituencies. This consists of taking the average votes per seat in each ward. No correction has been applied for parties not contesting all seats in a ward.
- (iii) A similar table using the methods of calculation used before the 1982 booklet is included in the Appendix.
- (iv) The party grouping 'Lib/SDP' used in column (8) consists of all official Alliance candidates however described on the nomination papers.
- (v) Percentages do not necessarily add to 100.0 due to rounding.
- (vi) 0.0% means that the percentage is greater than a zero but less than a half of the least significant figure.
— means zero.

Appendix Summary of election results by borough (old style calculations for comparison with publications prior to 1982)

Notes

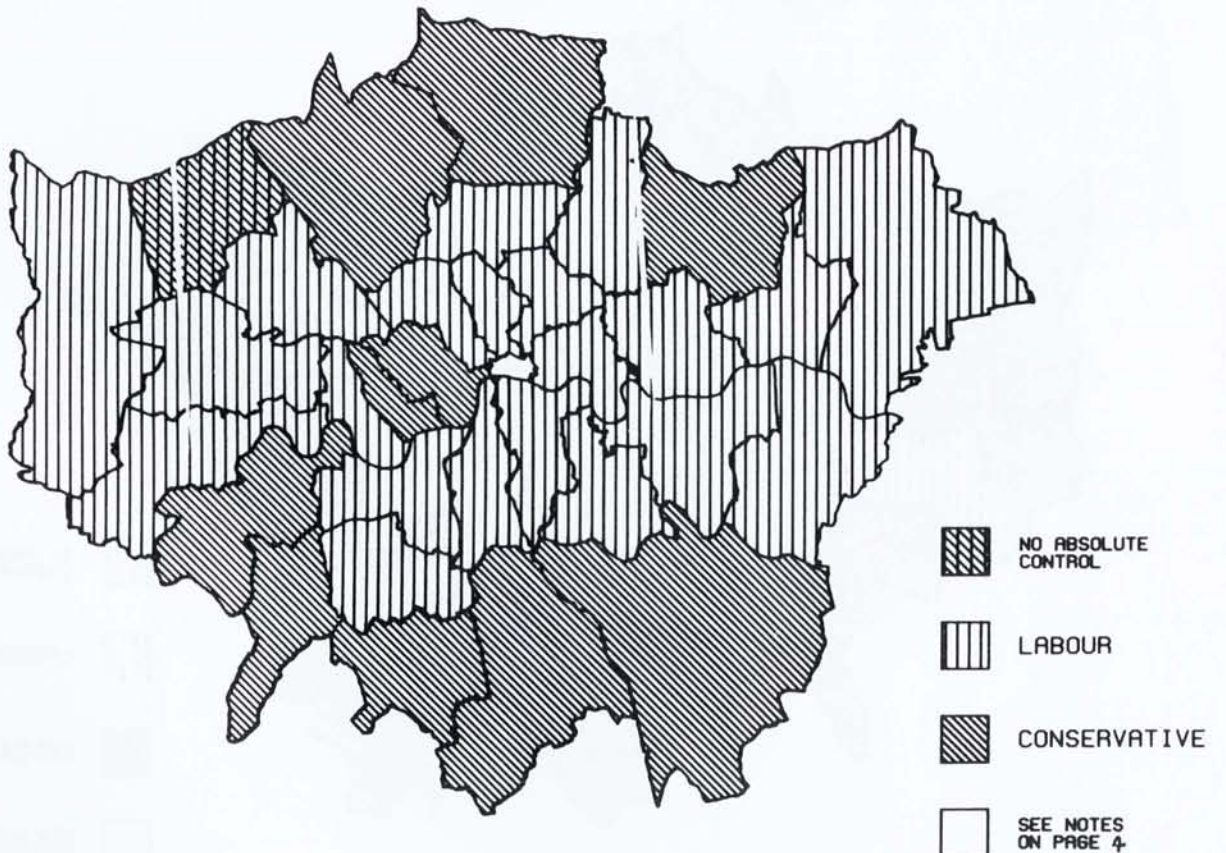

- (i) The percentage votes cast shown in this appendix are calculated with no corrections applied, and are intended for comparison with elections prior to 1982 when this method of calculation was used. Figures are given for boroughs only because of ward and constituency boundary changes.
- (ii) The party grouping 'Lib/SDP' used in column (8) consists of all official Alliance candidates however described on the nomination papers.
- (iii) Percentages do not necessarily add to 100.0 due to rounding.
- (iv) 0.0% means that the percentage is greater than a zero but less than a half of the least significant figure.
— means zero.
