

TARSOS

a Platform to Explore Pitch
Scales in Non-Western and
Western Music

Context Analysis

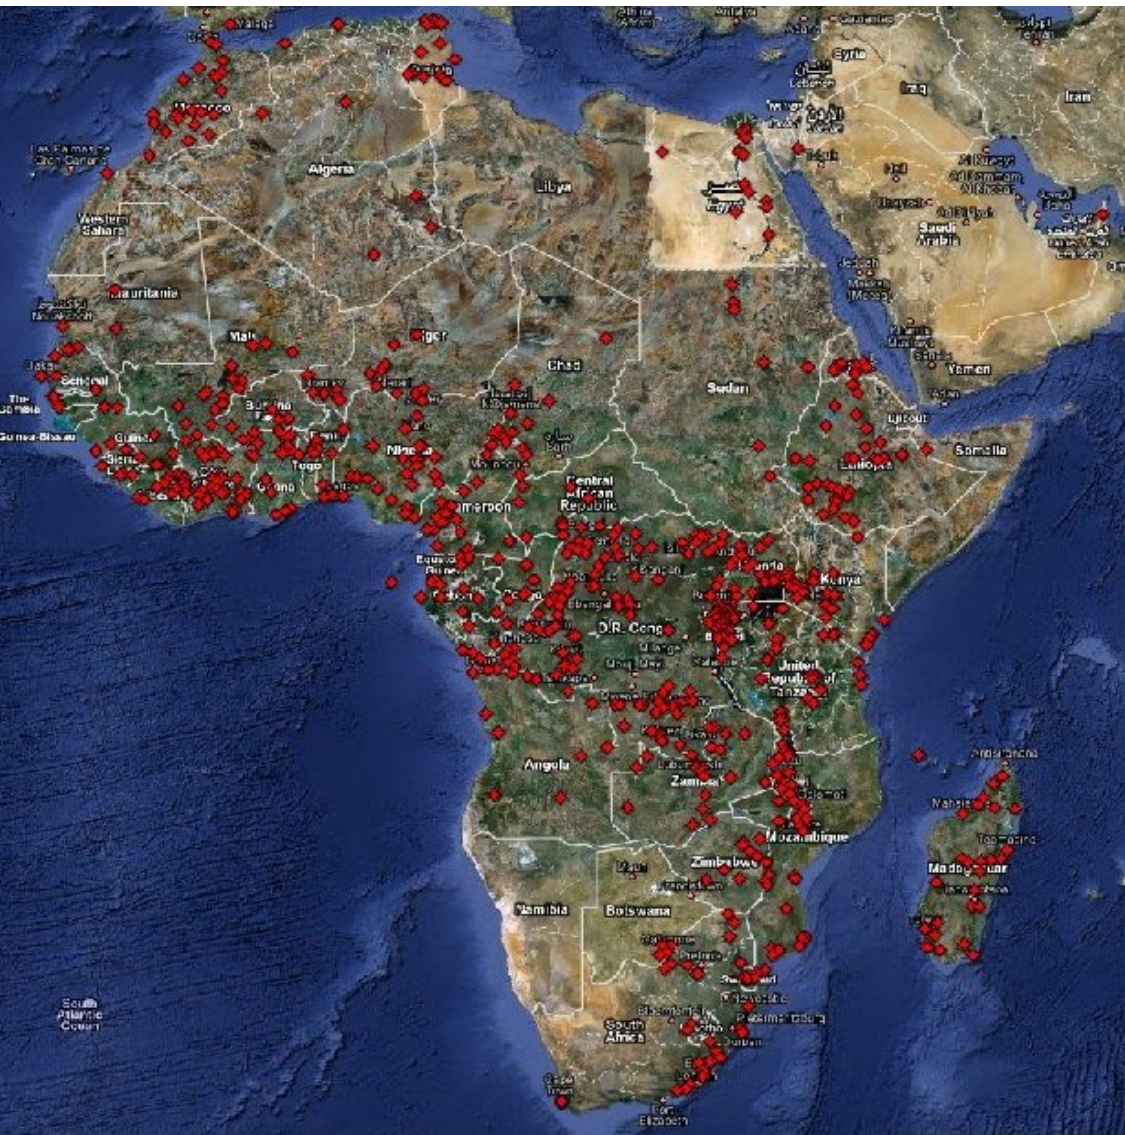

Conclusions

Introduction

Research goal:

Provide **culture independent access to** archives with **ethnic music** that deal with a large variability of musical content, users, search intentions and expectations in a multidisciplinary approach, **combining musicology and engineering.**

Introduction

RMCA (Royal Museum for Central Africa), Belgium

DEKKMMA:

Audio:

- 50.000 sound recordings
- 3.000 hours of music
- 33.000 items digitized.

Meta-data:

- 35.000 items digitized

Contextual data

database and website:

<http://music.africamuseum.be>

Introduction

Current MIR approach: a tone is an object with a single pitch, represented as a note.

Non-western tuning systems vary a lot and require different strategies for pitch analysis.

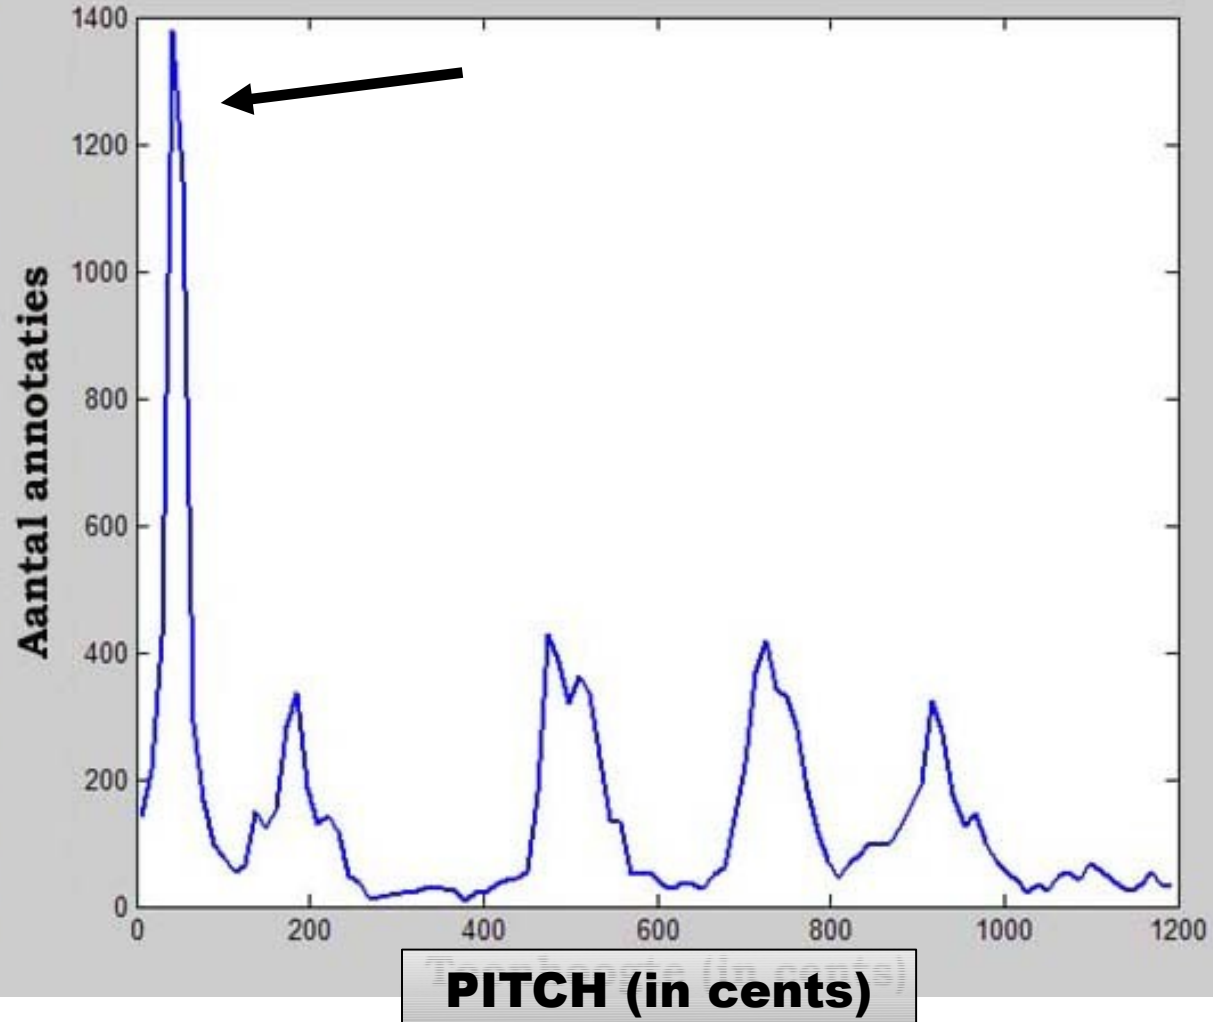

Introduction

Annotations

Introduction

Central tone

Introduction

Number of used tones

Introduction

Determination of correct pitch

Introduction

Charles Shakford:

Interval	eq.temp	hist.syst	practice
Minor sec	100	90-117	44-122
Major sec	200	182-231	187-228
Fourth	500	498-503	480-525
Fifth	700	696-702	682-723

Methodology

Design

reuse of existing software
cultural independent
automated analysis, manually adjusted
graphical
flexible
scripting
output

Methodology

Tarsos, inner workings

- **Pre-processing:**
 - Audio signal improvement:
 - Noise reduction
 - Signal optimization
 - Source separation (ONO2010)
 - Band pass filters
- **Processing:**
 - (existing) algorithms
 - Annotation optimization
- **Post-processing:**
 - Interpretation
 - Visualization
 - Export
 - Data
 - Graphical

Methodology

Tarsos, inner workings

SIGNAL LEVEL

- Test of available pitch trackers.

- Representation of output

- Real-time analysis

- Optimization results

SYMBOLIC LEVEL

- Peak extraction (automated and manual correction)

- Peak analysis

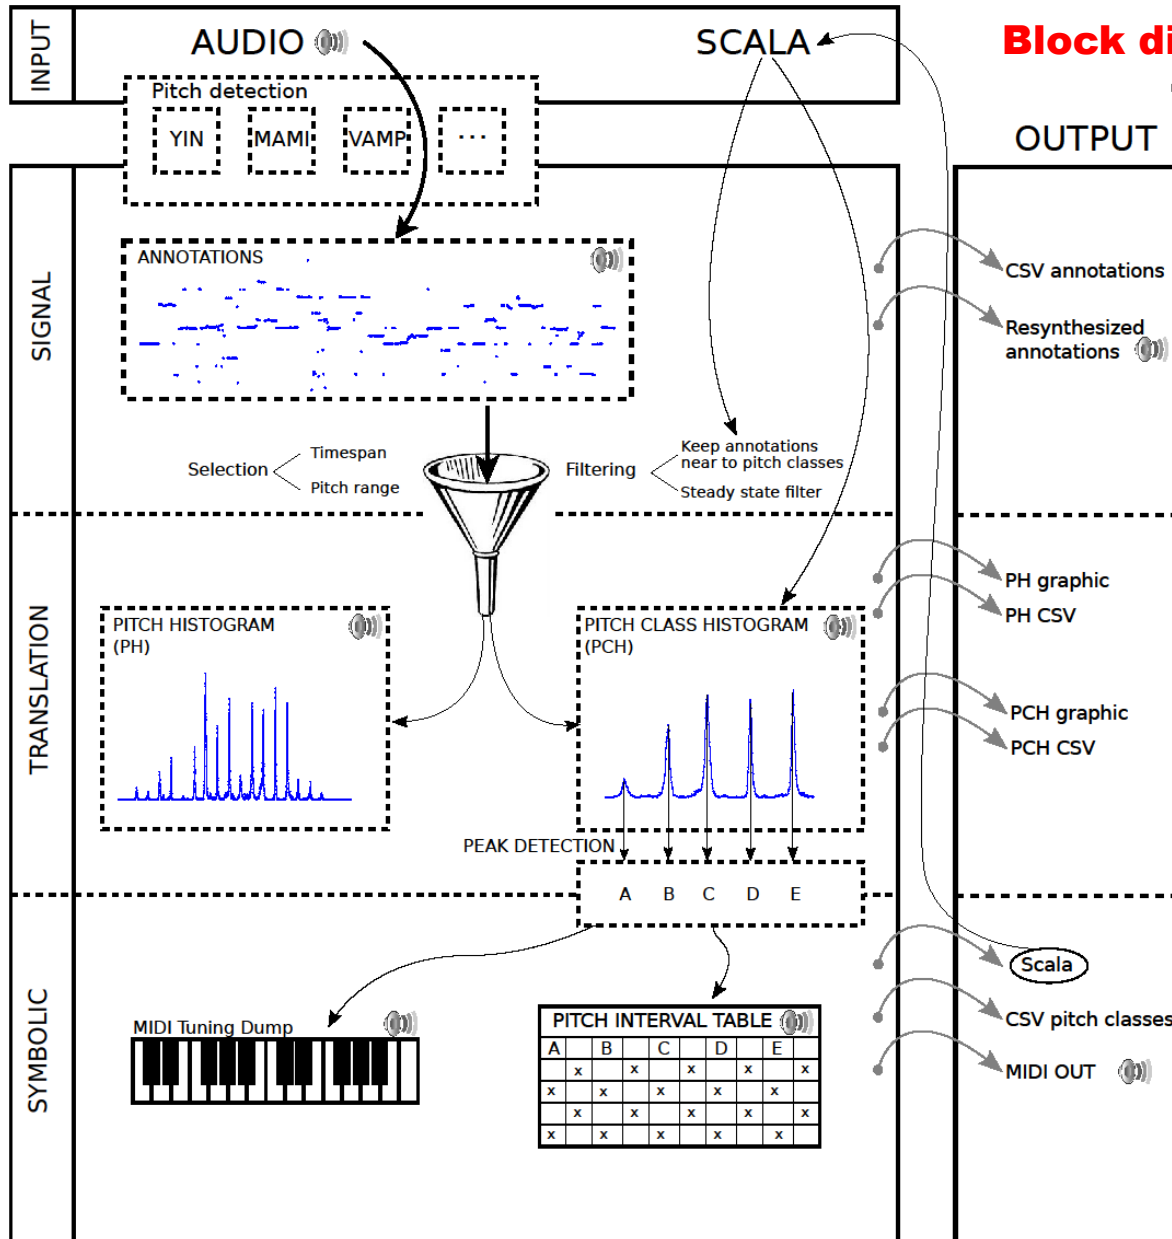

- Correlation

OUTPUT

- Sonification

- Export

Methodology

Block diagram TARSOS

PITCH INTERVAL TABLE

A	B	C	D	E
x	x	x	x	x
x	x	x	x	x
x	x	x	x	x
x	x	x	x	x

Methodology

Audio:

PITCH INTERVAL TABLE

	A	B	C	D	E
A		x		x	
B	x		x		x
C		x		x	
D	x		x		x
E		x		x	

Methodology

Pitch interval table:

Pitch Class (cent)	Interval (cent)		
107			
	255		
363	478		
	222	725	
585	470	976	
	248	720	
833	498		
	251		
1083			

MIDI tuning dump

Demo

TARSOS

A stylized diagram of a tarsus. The word "TARSOS" is written in a bold, black, serif font. Below the text, seven thick black lines represent the toes, extending downwards and slightly outwards from the base of the letters. The lines are of varying lengths and angles, with the central line being the longest and most vertical, and the outer lines being shorter and more angled.

API & Scripting

Scripting API for:

- Search for pitch interval
- Tone scale (makam, raga) recognition
- Audio fingerprinting
- Transcoding
- ...

Scripting possible with JVM languages:

- Scala
- Groovy
- Jython
- ...

results

Looking into:

- Pitch analysis
 - Interval analysis
 - Historical tendencies
 - Geographical tendencies
 - ...
-

results

Scientific results: **computational ethnomusicology**

Artistic input e.g. experimentation with **microtonal compositions**

Educational opportunities: improve intonation.

context

-
- * A correct interpretation includes its cultural framework**
 - * Audio alone might be not sufficient**
 - * Visual aspects, social function and context**
-

conclusion

Future Work

- zoom annotation window
- phase vocoder
- transcription features
- temporal and timbral features
