

```
# recursive binary search
def binarySearch(arr, left, right, x):
    mid = (left + ???
```

right

**Left-to-Right Language Models**

```
# recursive binary search
def binarySearch(arr, left, right, x):
    mid = (left + MASK) // 2
    if arr[mid] == x:
        return mid
```

right

MASK0 binary search MASK1 right ) // 2  
MASK2 [ mid ]

**Masked Language Models**

```
# recursive MASK0
def binarySearch(arr, left, right, x):
    mid = (left + MASK1
    if arr MASK2 == x:
        return mid
```
