

ANGARA

Ring Size Guide

Before measuring your ring size, be sure this guide is printed in US Letter size and scaled to 100%. You can check the accuracy of your print by positioning a credit card on the line below. If the card lines up, you're all set.

Your print scale is correct if the width of a credit card fits this outline.

Option 1 : Measure By Matching Your Existing Ring

To find your Angara ring size, use an existing ring that fits you well. Match the inside of that ring with one of the circles below. When your ring has been placed on the right size, you should see only the white circle inside your ring. If your ideal fit falls between two sizes, we recommend choosing the larger size.

Option 2: Measure with a String

1. Take a piece of a string/tape and wrap it around your intended finger.
2. Hold the string in place and mark the meeting point for both ends.
3. Measure the marked length i.e inside circumference with a ruler and refer the chart below to find your ring size.
