OVERVIEW

The study was conducted for CNN via telephone by SSRS, an independent research company. Interviews were conducted from December 4, 2019 to December 8, 2019 among a sample of **1,203** respondents who live in California. The landline total respondents were **461** and there were **742** cell phone respondents. The margin of sampling error for total respondents is +/-3.4 at the 95% confidence level. The design effect is 1.42. For results among the 508 respondents who are likely to vote in the Democratic primary the margin of sampling error is +/-5.2 and for results among the 298 respondents who are likely to vote in the Republican primary it is +/-6.7. More information about SSRS can be obtained by visiting www.ssrs.com.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSSTABS

Interviews were conducted among a representative sample of the adult population, age 18 or older, of California. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

EMBARGOED FOR RELEASE:
Wednesday, December 11 at 12:00 p.m.

P9. How enthusiastic would you say you are about voting for president in next year's election -- extremely enthusiastic, very enthusiastic, somewhat enthusiastic, not too enthusiastic, or not at all enthusiastic?

Total Respondents	Extremely enthusiastic	Very enthusiastic	Somewhat enthusiastic	Not too enthusiastic	Not at all enthusiastic	No opinion
December 4-8, 2019	34%	26%	20%	8%	10%	2%
December 4-8, 2019 (RV)	41%	29%	18%	6%	4%	2%

Likely Democratic primary voters	Extremely enthusiastic	Very enthusiastic	Somewhat enthusiastic	Not too enthusiastic	Not at all enthusiastic	No opinion
December 4-8, 2019	49%	31%	14%	4%	1%	1%

Likely Republican primary voters	Extremely enthusiastic	Very enthusiastic	Somewhat enthusiastic	Not too enthusiastic	Not at all enthusiastic	No opinion

MORE ON METHODOLOGY

A total of **1,203** adults who live in California were interviewed by telephone by live interviewers calling both landline and cell phones. Interviews were conducted in English and Spanish. Among the entire sample, 36% described themselves as Democrats, 20% described themselves as Republicans, and 44% described themselves as independents or members of another party.

All respondents were asked questions concerning basic demographics, and the entire sample was weighted to reflect Census figures for gender, race, age, education, state region, and telephone usage.

Results for the full sample have a margin of sampling error of +/- 3.4 percentage points. For the subset of 508 respondents who are likely to vote in the Democratic primary, it is +/- 5.2 percentage points. For the subset of 298 respondents who are likely to vote in the Republican primary, it is +/- 6.7 percentage points.

Interviews were conducted among a representative sample of the adult population, age 18 or older, of California. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
