TAKE CONTROL OF YOUR DIGITAL LIFE

CopperheadOS for Android devices

Your privacy and data security matter. But every day your mobile device is exposed to potential threats that you won't even know about until it's too late. CopperheadOS puts you back in control, protecting your device from compromise, including targeted and dragnet attacks, spyware, leaks, adware, malware and data theft. Take control of your information and protect your privacy — with CopperheadOS.

Flexible
Copperhead OS runs on recent Pixel devices.

Private
Your calls, texts and emails are completely secure and private.

Customizable
Run your favourite privacy-respecting apps.

Untrackable
Your location is not disclosed.

Self-Contained
Your data, photos and documents are not sent to Google, Copperhead, the cloud or any remote platforms.

Secure
All data is encrypted and secured through multiple layers of protection, so intruders can't read, damage or extract usable data.

Privacy. Security. Control. CopperheadOS

GET READY TO ENJOY THE PEACE OF MIND OF OWNING A FULLY SECURE DEVICE

Q. What is CopperheadOS?
An operating system for Android Pixel devices that is separate from Google. It lets you do everything you normally do on your phone, while protecting your privacy and security.

Q. What makes CopperheadOS so secure?
CopperheadOS uses sophisticated multi-layer protections designed by mobile security experts to make the device more resilient to attacks. Our source-available code is verified by leading security experts. CopperheadOS maintains the highest security levels at all times by issuing frequent updates based on our close relationship with the Google security team.

Q. Can I still use a web browser?
Yes! CopperheadOS comes with Hardened Chromium, a more secure variant of Android Chrome.

Q. Can I still use my favourite apps?
Yes! You can download apps and run them on your phone. Some features may function differently.

Q. Can I access the cloud?
If you wish, you can choose to share using apps like Microsoft OneDrive or Nextcloud.

Q. What if I lose my phone? Is my data still safe?
If an unauthorized user gets hold of your phone, it's virtually impossible for them to damage or extract your data.

Q. Is it easy to use?
Yes! CopperheadOS is easy to install and easy to use. If you have questions, we offer 24/7 support by phone, email, social media and web portal.

NO DATA MINING   **NO LOCATION TRACKING**   **NO TELEMETRY**   **NO DATA EXTRACTION**   **NO MALWARE**   **NO VULNERABILITIES**

Just you, your device, and complete control.

Copperhead is the trusted choice of intelligence agencies, militaries, Fortune 500 companies and NGOs worldwide.

Get the world's most secure OS on the world's most secure device.
