

BGOV200

Federal Industry Leaders 2018

**Bloomberg
Government**

Turn Opportunities Into Action.

Bloomberg Government is proud to present our seventh annual BGOV200 Federal Industry Leaders rankings. Our rankings reveal the top federal contractors based on fiscal 2017 data for unclassified prime contracts awarded across all government agencies in the United States.

Consistent with recent years, most of the market moving companies in fiscal 2017 relied on spending in certain categories, such as information technology - which increased to \$74 billion in fiscal 2017 from \$69 billion in fiscal 2016, to improve their positions.

Fiscal 2017 marked the emergence of new acquisition methods, such as a rise in the use of other transaction authority for acquiring research and prototyping acquisitions and establishment of a revolving capital fund for managing agency IT projects. Those acquisition methods have been widely popular and may have more of an impact on future BGOV200 results for some companies but didn't contribute to overall rankings that significantly in 2017.

We are proud to see many of our clients on this distinguished list. Over the last seven years we've partnered with business development teams to provide thoughtful analysis and unmatched data. Through this collaboration we have also learned about the needs of contractors and quickly enhanced our solution to meet demands.

Whether your focus is on sales, strategy, or business development, Bloomberg Government provides contractors with data-driven decision tools, news, and analytics that help shape strategy, execution, and pipeline. We make it easier to understand the market and competitive landscape and find partners. Most importantly, we help government contractors build bigger pipelines, make smarter business development investments, and win more federal contracts.

We hope you enjoy the seventh annual BGOV200 report. To learn more about our government contracting solution, visit about.bgov.com/government-contracting.

Sincerely,

Donald Thomas

FY17 Key Procurement Trends & Market Driving Forces.

By: Daniel Snyder, Deputy Director of Government Contracts Research, Bloomberg Government

Fiscal 2017 marked a five-year high in federal contract spending. Both large and small companies capitalized on the \$512 billion that was put on contracts in fiscal year 2017, the most since the federal government spent \$522 billion in fiscal 2012.

The seventh annual BGOV200 Federal Industry Leaders Study ranks the top 200 vendors by value of prime, unclassified contracts awarded by U.S. agencies in fiscal 2017. It analyzes the top contracts at 24 agencies and departments, and in 27 different purchasing categories.

This BGOV200 report focuses on companies and broad trends in the market. The BGOV200 explores the contract dynamics of the past year and how successful contractors have performed. The study finds:

- Fiscal 2017's total contract spending increased by 7 percent, from \$478 billion in fiscal 2016.
- The share of total government obligations won by the top 200 contractors was 64 percent, the same as in fiscal 2016.
- An equal number of companies improved their market performance or lost ground: 92 companies increased their rankings and 92 decreased. Sixteen companies showed no change in rank, and there were 27 new entrants to the list.

As in fiscal 2016, contract consolidation is expected to continue as federal agencies expand category management initiatives and concentrate spending through about 30 contracts that the government is now designating as "best in class."

Budget Changes

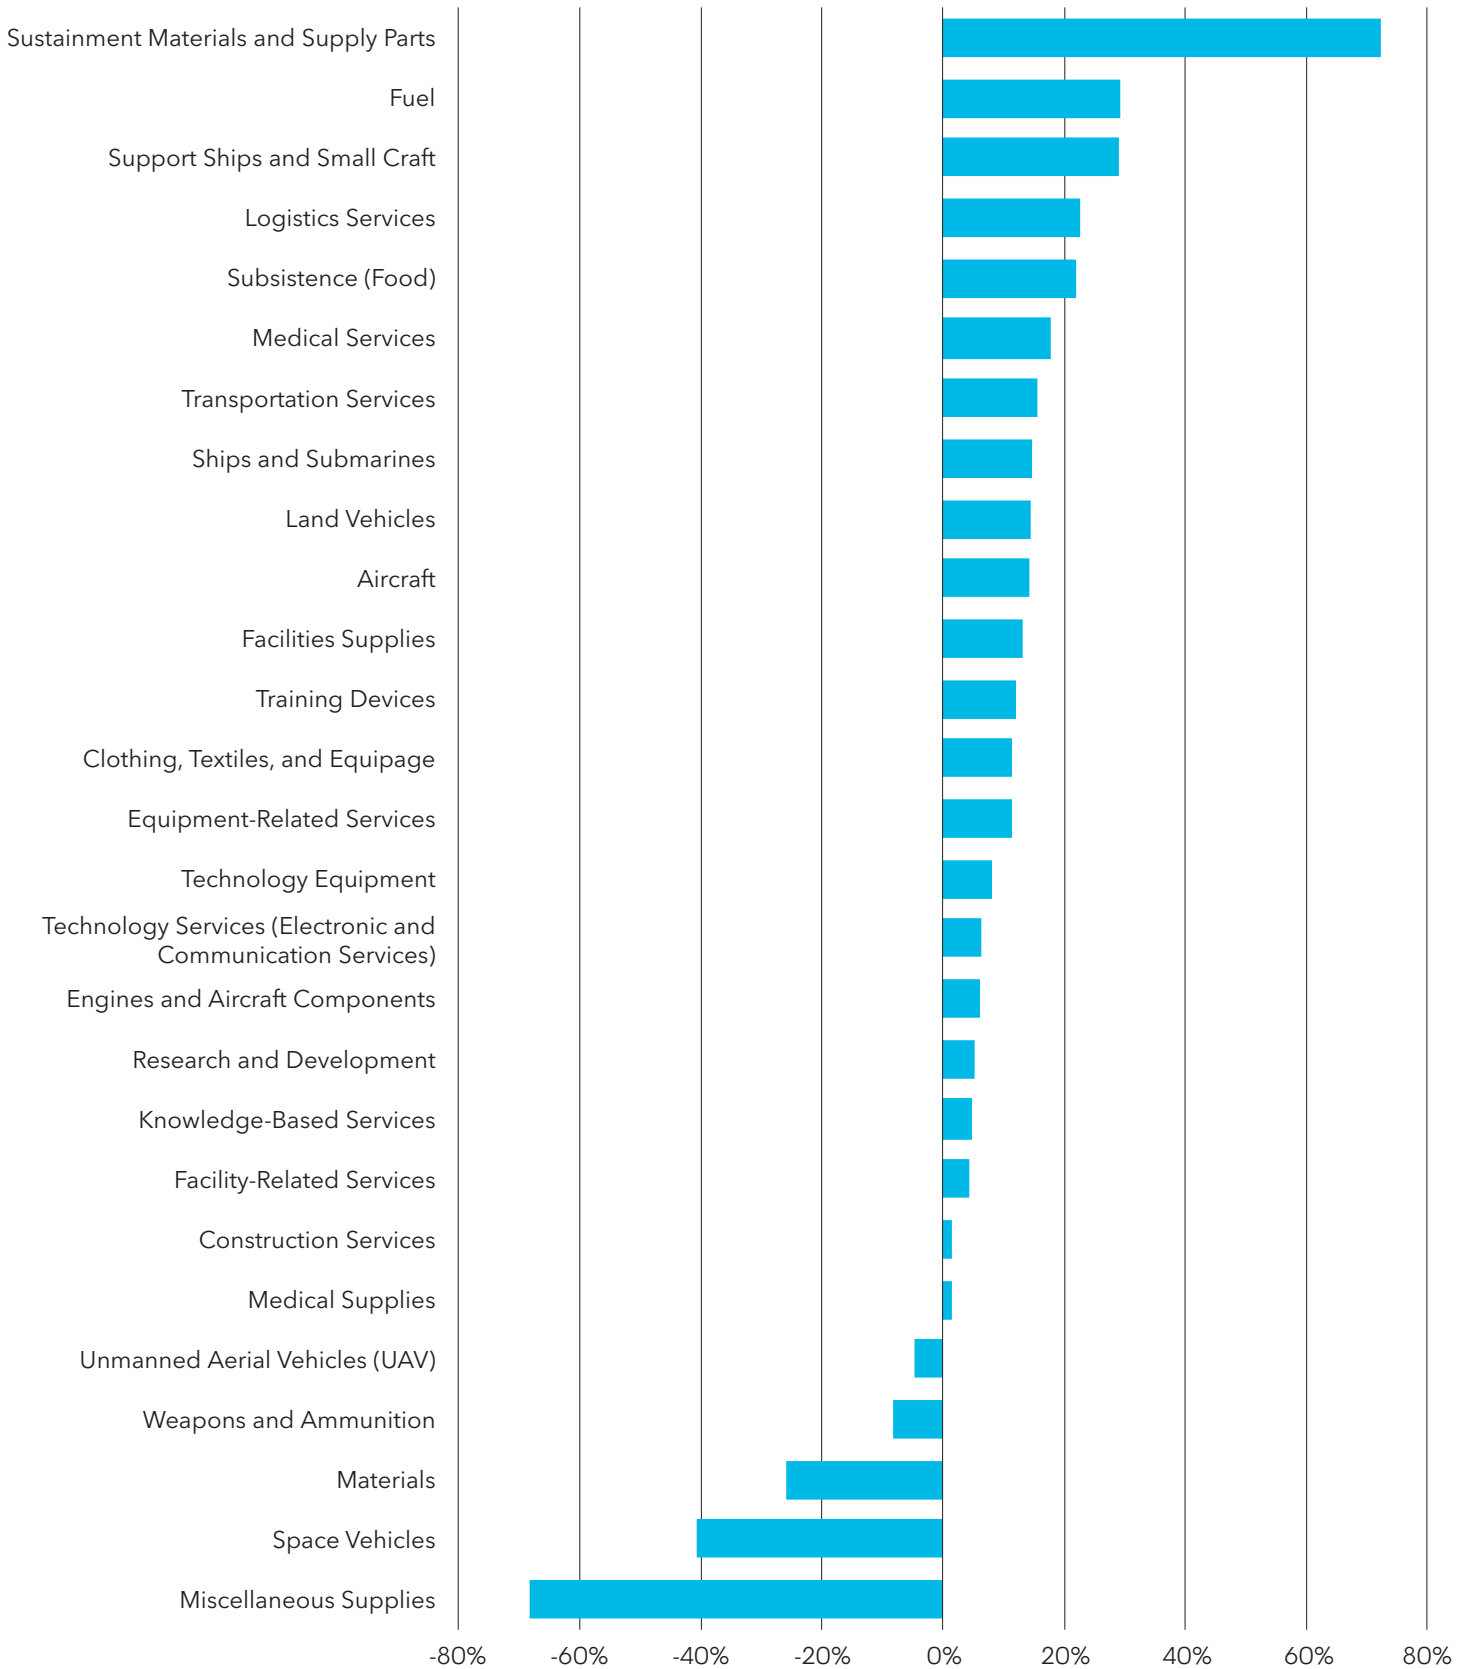

Congress passed a fiscal 2018 omnibus spending bill - valued at \$1.4 trillion - after funding the government with a series of continuing resolutions that lasted until March 23. Operating on a CR delayed government program decisions, adding uncertainty for federal contractors while compounding concerns about proposed budget cuts to civilian agencies.

The omnibus measure is consistent with the two-year budget caps deal reached in February, which allowed for \$80 billion more in defense spending and \$63 billion more for nondefense programs. The bill included \$1.6 billion for border security programs. Fiscal 2018 defense funding totals \$671 billion.

Budget Versus Contract Obligations

Fiscal 2017 contracting dollars increased by \$34.4 billion compared with the previous year. In March, Congress and the president increased spending under the existing budget caps by \$143 billion for fiscal 2018 and \$153 billion for 2019, signaling substantial growth in the near term. What's unclear is what happens in fiscal 2020 and 2021, which are the last two years affected by the caps and were left unchanged by the February deal. The 2020 caps are set at an amount that's \$27.2 billion less than the \$153 billion established by the agreement for fiscal 2019.

Market Movers

The vast majority of purchasing categories highlighted in the BGOV200 saw an uptick in fiscal 2017 spending, which grew in 22 categories and declined in 5 others. Some of the largest increases year over year are for markets such as aircraft, which increased by \$5.2 billion; professional services, which grew by \$3.4 billion; and medical services, which rose by \$3.4 billion.

Technology was a massive contributor to market growth, accounting for a combined \$4.9 billion increase in spending from 2016 levels. That includes \$2.3 billion for technology services as agencies continue investing in modernization efforts to replace legacy systems, and \$2.6 billion for hardware as agencies update equipment.

This is the third straight year that the technology market has experienced growth levels of about \$5 billion. Spending was nearly \$74 billion in fiscal 2017, up from \$69 billion in fiscal 2016 and \$64 billion in fiscal 2015.

Information Technology

DXC Technology Co. (\$1.8 billion) and Leidos Holdings Inc. (\$1.8 billion) were able to leverage the technology services market and currently lead the IT category. Both companies maintained their dominance through existing single-award contracts: DXC through the Navy's NGEN contract, and Leidos through the Defense Information Systems Agency's Global Information Grid contract. CSRA Inc. currently ranks No. 3 in this year's report, mostly by winning work on multiple-award contracts such as the General Services Administration's Alliant, the Health and Human Services Department's CIO-SP3, and others, but its merger with General Dynamics Corp. will propel the combined company to the top of the list in fiscal 2018.

Companies that increased their performance most significantly through spending in the technology equipment market include Raytheon Co. (\$2.3 billion in obligations), Lockheed Martin Corp. (\$2.3 billion), Northrop Grumman Corp. (\$1.6 billion), and Harris Corp. (\$1.1 billion).

Professional Services

The knowledge-based services or professional services market, which covers everything from engineering to marketing to debt collection, has grown by about \$3.2 billion from fiscal 2016 and \$5.4 billion from fiscal 2015.

In fiscal 2017, that growth was most advantageous to companies such as General Dynamics (\$2.7 billion in obligations), Booz Allen Hamilton Inc. (\$2.4 billion), and Boeing Co. (\$2.5 billion), which are among the vendors that generated the most obligations on GSA's Professional Services Schedule (PSS), GSA's OASIS and OASIS Small Business, and the Navy's SeaPort-e.

Agency Spending Trends

Defense contract spending was \$331 billion in fiscal 2017, a \$25 billion increase from fiscal 2016 and about \$50 billion more than in fiscal 2015. The Air Force is the only service that decreased spending from fiscal 2016, while the Navy's obligations grew by \$18 billion and the Army's by \$6 billion.

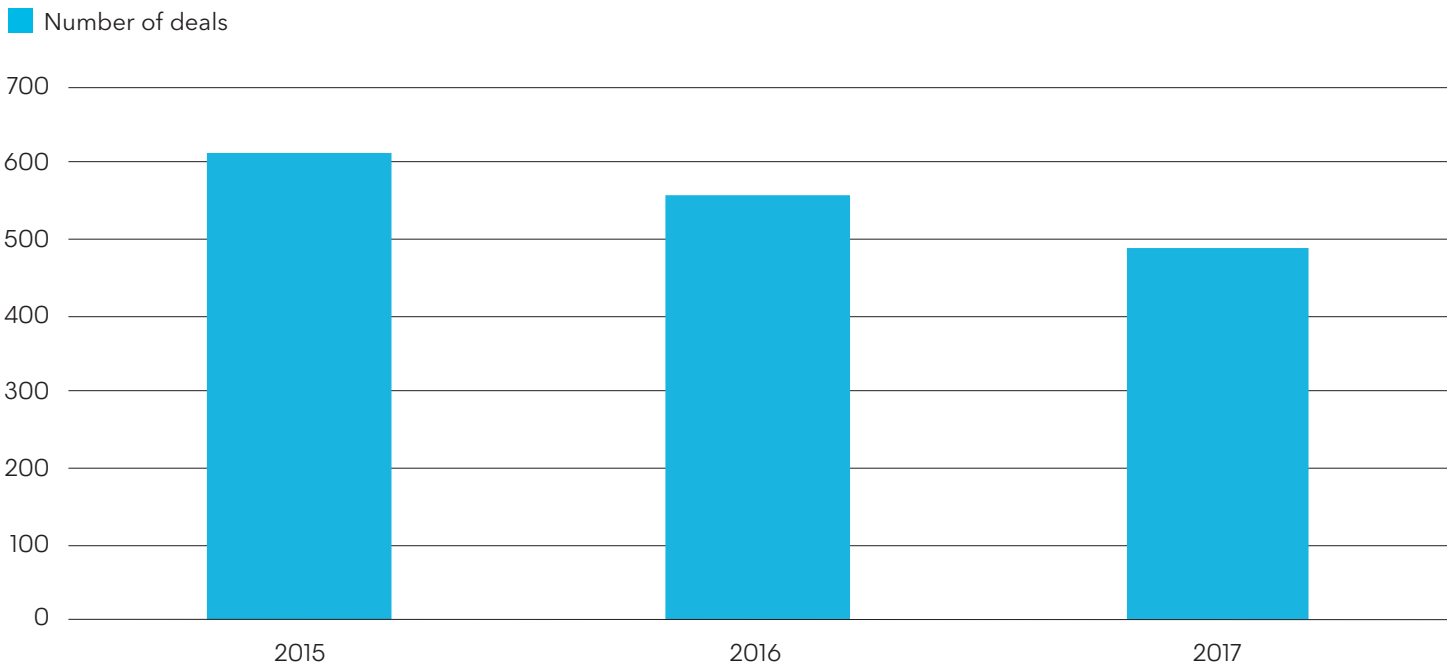

Civilian agencies account for the remaining \$181 billion in fiscal 2017 contract obligations. The departments of Homeland Security and Veterans Affairs experienced the biggest gains: Both agencies added about \$3 billion to their annual totals.

Mergers and Acquisitions

The federal marketplace has been experiencing a surge in mergers and acquisitions in recent years. Fiscal 2017 was no exception.

A shrinking pot of dollars available to maintain government legacy IT systems and the intensifying competition for lower-margin IT services work set off the wave of mergers, acquisitions, and divestitures.

Bloomberg Government tracked 491 transactions in the federal space in 2017 through our M&A Dashboard, slightly fewer than the number of 2016 deals, 557. Target companies were acquired for their government work as many contractors looked to buy access to customers through acquisitions instead of growing organically.

The majority of deals were tuck-in deals, in which an acquired business adds complementary pieces to a larger company. However, portfolio-shaping deals, which add or remove offerings that are complementary to - but outside of - the acting company's current or planned area of focus, had the largest market impact in terms of dollar value. Other transactions were market focus deals, which refine the overall focus of the company.

Some contractors used M&A to boost their existing federal market presence inorganically. For example, shipbuilder Huntington Ingalls Industries Inc. (No. 7) closed a deal in fiscal 2016 to acquire Camber Corp., a defense company with a diverse IT, intelligence, and cyber portfolio, increasing its ranking by five slots.

Other companies looked to enter markets or make federal contracting a more significant part of their revenue stream. For example, General Dynamics (No. 3), a global aerospace and defense company, expanded its information technology market presence by acquiring CSRA. The deal adds about \$3 billion in federal contracting revenue to GD's annual intake of \$15.6 billion and should solidify the company's standing as the third-largest contractor in the federal market for the foreseeable future.

A number of large transactions, such as the GD/CSRA deal, were announced or were still pending in fiscal 2017 and will continue to reshape the market. Rankings on the BGOV200 are based on the state of the market at the end of fiscal 2017, so any deals that were completed in the start of fiscal 2018 are not reflected in this year's rankings.

Best-in-Class Contracts

In last year's BGOV200, Bloomberg Government analyzed the federal government's category management initiative and its impact on consolidating spending on major multiple-award contracts. This trend accelerated in fiscal 2017 and is likely to continue. The government's strategic approach to improving the federal acquisition system by funneling spending obligations through contracts designated as best-in-class, or BIC, continues to gain momentum.

This fiscal year, the General Services Administration introduced a list of contract vehicles considered to offer the best solutions at fair and reasonable prices. The government has been referring to BICs since about 2015, but this is the first time a list of contract titles has been issued. Spending on BICs increased to \$26.7 billion in fiscal 2017 from \$23.8 billion in fiscal 2016, according to Bloomberg Government data.

Innovative Acquisition Methods Emerge

While multiple-award contracting is expected to dominate spending for years to come, agencies are also leveraging new acquisition methods to buy goods and services more quickly and easily in ways they haven't before. Developments in the past year include the increased use of other transaction authority (OTA) and establishment of a technology modernization fund (TMF).

OTA is intended for basic, applied, and advanced research prototype projects that give agencies rapid access to emerging technologies and bring more small businesses into the government market. OTA purchases grew to \$2.3 billion in fiscal 2017 from \$1.6 billion in fiscal 2016.

Congress also authorized a revolving capital fund for agencies to manage IT modernization projects. The Modernizing Government Technology Act, which became law as part of the fiscal 2018 National Defense Authorization Act, created the TMF as a governmentwide fund. Agencies will submit project proposals to borrow money for modernizing IT systems, to be repaid to the fund with the money saved by the project. Most projects approved by the TMF board will require those cost-savings mechanisms and will be directed toward digital services that improve interactions between government and the public. Digital services spending was up slightly to \$2.6 billion in fiscal 2017 from \$2.5 billion in fiscal 2016.

Moving Forward

The Trump administration is making information technology modernization a priority and a driver for improving government efficiency and effectiveness. The fiscal 2019 budget proposes \$92.4 billion for IT modernization. Civilian agency IT spending would remain level at \$45.8 billion, while Defense Department IT spending would grow to \$36.4 billion. BGOV estimates that classified IT spending would grow to \$10.2 billion.

The departments of Defense, Veterans Affairs, Commerce, and Homeland Security are among the few agencies that are slotted for overall budget increases in President Donald Trump's budget plan. Most other agencies would see reductions, including major cuts of more than 15 percent for the State Department and other international programs, the Environmental Protection Agency, and the Interior, Labor, and Agriculture departments.

With the passage of the 2018 omnibus funding bill, agencies and industry are racing to put money on contracts by Sept. 30. Civilian agencies have a greater challenge because they were obligating at lower rates, reflecting expected cuts, before enactment. Next up: fiscal 2019 spending bills, which aren't expected to be completed until after the November elections, forcing the government to pass yet another continuing resolution to start the year. The president's \$4.4 trillion budget proposal would include \$1.3 trillion in discretionary funding - the category that drives most contracting.

The Rankings.

Methodology.

2018 BGOV200 Methodology and Notes

The BGOV200 Federal Industry Leaders 2018 Study ranks contractors by the value of their prime, unclassified government contract obligations in fiscal 2017. The information in this study is drawn from Bloomberg Government's proprietary federal procurement database. Our rankings cover unclassified work in fiscal 2017 at the 24 agencies and departments that report their contract obligations to the Federal Procurement Data System - Next Generation (FPDS-NG), the government source from which BGOV derives its data.

Rankings are also provided for each of 27 categories of purchases based on the Defense Department's Taxonomy for the Acquisition of Services and Supplies & Equipment. Bloomberg Government used the Defense Department's nine top-level services portfolio groups for its services categories. We split the department's seven top-level supplies and equipment portfolio groups into 18 supplies and equipment categories. We provide rankings for all nine services categories and 11 of the 18 supplies and equipment categories.

This study covers only prime contracts – those in which companies have direct relationships with the government – and not subcontracts. The spending totals for the Defense Department comprise contracts at the Army, Air Force, Navy, and 20 other defense agencies. Spending at each of those components is also reflected in the Defense Department totals.

We also rank all nondefense cabinet departments and the four independent agencies that spent the most on procurement: the Environmental Protection Agency, the General Services Administration (GSA), the National Aeronautics and Space Administration, and the U.S. Agency for International Development. Rankings are for contracting agencies, rather than funding agencies. Nearly half of the contracts issued by the GSA and more than a quarter of those issued by the Interior Department are funded by other agencies. GSA and Interior provide contracting services to those agencies for a fee.

Joint ventures are listed separately from their parent companies when they don't have a single majority parent company. For example, United Launch Alliance LLC is a 50-50 joint venture of Lockheed Martin Corp. and Boeing Co. United Launch Alliance is listed as a separate company (No. 32). Joint ventures for which one parent company owns 51 percent or more are rolled up to the majority parent company.

Data are accurate as of April 2018. Federal procurement officials can retroactively update the government's contract data system for up to five years. Contract awards, or obligations, reported by the government for fiscal 2017 don't match contract revenue reported by companies to the Securities and Exchange Commission. This is because companies generally don't record contract awards as revenue until they are paid for their services and because corporate fiscal years often don't align with the federal fiscal year. Differences in how companies report revenue from subcontracts and joint ventures also affect the totals. Rankings are based on net contract obligations. Federal procurement officials report the funds they obligate, or reserve, when contracts are signed. Agencies pay contractors when they present bills for products and services.

Agencies sometimes de-obligate unspent funds, which are recorded as negative dollar amounts. The contract totals in this analysis are the net sum of obligations and de-obligations recorded for fiscal 2017. De-obligations recorded in fiscal 2017 can result in total spending that is lower than subordinate agency or category spending.

Prior-year rankings and dollar totals referred to in this analysis are for fiscal 2016 as of July 2017, when the BGOV200 2017 rankings were compiled. Data as of that date reflect corporate structures in place in fiscal 2016.

Dollar amounts and their assignment to agencies and product/service categories are as reported in the FPDS-NG. Inconsistencies in FPDS-NG reporting can occur.

Bloomberg Government scrubs federal procurement data to eliminate duplications and errors, to roll up subsidiaries with their parent corporations, and to organize the data for ease of analysis but generally avoids altering reported categories, which agencies sometimes correct.

Unreported data weren't included in the rankings. Federal agencies don't have to report contracts valued at less than \$3,500, although they often report purchases below that threshold. Most intelligence agencies, Congress, the federal judiciary, the U.S. Postal Service, and some other quasi-governmental or independent agencies don't report their contract data (such as the Tennessee Valley Authority and FDIC). In December 2012, certain Federal Acquisition Regulation reporting requirements changed so that resale activity is no longer reported through FPDS-NG. This particularly affected the Defense Commissary Agency (DECA) and the food category.

Classified contract actions are generally not reported to the FPDS-NG because the system isn't approved to handle classified information.

Mergers and acquisitions completed in fiscal 2017 are included in contractor totals. For example, Huntington Ingalls Inc. (No. 7), which closed its acquisition of Camber Corp., increased its ranking by five slots.

Rankings for the prior year are those published in the BGOV200 Federal Industry Leaders 2017 Study, to ensure consistency in reporting and to reflect corporate structures in place in fiscal 2016. Reported contract totals for fiscal 2015 have fluctuated for many companies in the intervening period.

Private equity-owned companies have their own listings. BGOV200 companies that are owned by private-equity firms or for whom private-equity firms are the majority shareholders are listed individually.

Unnamed foreign contractors, unknown vendors, and consolidated entries aren't included, though spending totals for agencies and categories include contract obligations assigned to them.

All reported trend data is inflation-adjusted using Bureau of Labor Statistics Consumer Price Index multipliers and are in constant 2017 U.S. dollars.
