

Grant Middle School has a wide range of academic offerings for our students.

In addition to our high-quality core curriculum, we offer Advanced courses in English, Math and Science. Our 8th graders also have the opportunity to earn high school credit while still in Middle School. We provide support for students who may struggle in some areas of learning with Intervention Periods and Specialized Learning Centers.

We offer classes on:

- Interior Design
- Digital Art
- Spanish
- Physical Education
- Coding and many more
- 3D Art
- Music Appreciation
- Health
- Computer Science

Our students also get the opportunity to Explore Careers in Business, Technology, Engineering, and Health through our CE(Career Exploration) Courses.

Students can also join any of our many clubs or choose to be a part of our Band, Orchestra and Choir. Band offers instruction on woodwind, brass, and percussion instruments with a focus on the skills necessary for long-term student success. Fundamentals stressed include proper posture and playing position, development of characteristic tone quality, training in music literacy and development of musicality and expression. 6th grade orchestra is a chance to play exciting music with your friends and perform large concerts for your families. 7th and 8th graders get the chance to compete against other schools at Cedar Point or Kings Island! No experience required. Some school instruments are available for students if there is financial need. With Choir, students will learn

musical foundation as well as have the opportunity to perform in competition and concerts around the state.

For our students that need additional time and support with academics outside of the school day, we have the 21st Century Afterschool Program where students receive academic enrichment, positive youth development, specialized tutoring, college and career readiness, STEAM and community programming.

On top of all of these great options, Grant Middle School features a classroom dedicated to Science, Technology, Engineering and Mathematics (STEM) learning that's committed to introducing students to in-demand fields in today's workplace. The STEM Lab provides STEM-related classes for sixth, seventh and eighth grade students including non-traditional courses such as:

- Computer programming
- STEM investigations
- Grossology
- Forensics
- Engineering
- Nationally awarded robotics team

For athletes, explore our competitive athletics program with choices in:

- Football
- Basketball
- Baseball
- Soccer
- Wrestling
- Softball
- Cheerleading
- Cross Country
- Track and Field
