📍 Atasehir, Istanbul, Turkey 🚗 B 🏆 Fullfilled - 2023

I started my university life at the Faculty of Engineering and Natural Sciences, Computer Engineering(100% English). With the benefit of my above-average GPA, I earned a right to study a side branch in my university and I continued my education in the same faculty with Software Engineering(100% English). I graduated from both departments in 2021.

While I was continuing my distance education during the Covid-19 pandemic, I took my first step in my career by getting an offer from FK Bilişim. Afterwards, I started to take a huge part in the project called ShallweGo, which is an online travel platform that releases with the partnership of FK Bilişim and ACY Travel.

In July 2021, I resigned for my interest in the finance sector to achieve my goals and commenced working in the open banking applications of Eçözüm Bilgi Teknolojileri A.Ş. Today, I have been working as a software development specialist in the platform solutions at Worldline Ödeme Sistem Çözümleri A.Ş.

PROJECTS

ShallWeGo, 3 minutes on a trip with Shallwego! [🔗](#)

Shallwego provides more than 600 thousand hotels, flight tickets in more than 1,200 airlines and transfer services at 400 locations worldwide.

During the project development, a Web API has been created to provide a connection between TourVisio, HotelRunner and Amadeus's services. The front-end of the API was created with VueJs. Whole team worked with a weekly assignments to provide better working plans for one of Agile methodologies, scrum methodology. I worked in the part where TourVisio and HotelRunner during the whole project.

Rowing Club Appointment System, We exist so everyone can row!

This project serves with business logics customized according to club needs, prepared for rowing clubs that show performance and hobby rowing activities in Istanbul under the Turkish Rowing Federation, coded with .Net Core MVC on the back end and Vue.js on the front end.

İdealtepe Amatör Balıkçılar Derneği Kürek Kulübü [🔗](#) Rumeli Kürek Kulübü [🔗](#) İstanbul Kürek Spor Kulübü [🔗](#)

Hasarci [🔗](#)

This project was created to track business process between insurance and damage management sectors as a BPM with the help of .NET MVC Web App.
