MASSACHUSETTS INSTITUTE OF TECHNOLOGY

M.I.T. APPROVAL FOR SOFTWARE TO BE DISTRIBUTED
BY OPEN SOURCE OR TO BE PLACED IN THE PUBLIC DOMAIN

M.I.T. Case No. 16741

Case Title: Goby Underwater Autonomy Project Version 2 (Goby2)

Case Authors and Addresses:

Name: Toby Edwin Schneider
Address: 343 Old Main Rd
North Falmouth, MA 02556

Name: Christopher Alden Murphy
Address: 32 Edgewood Circle
Quincy, MA 02169

In reliance on the representations made in the completed and delivered form *"Request for Software to be Distributed by Open Source or to be Placed in the Public Domain"*, M.I.T. agrees that the software described in the above referenced case shall be:

(check one)

☐ (i) distributed by open source pursuant to the BSD License, meaning that M.I.T. will retain copyright ownership of the software code (source, object or otherwise) but shall make the software code openly available to the public by internet, worldwide web or like means, without restrictions on use or copying, without any financial consideration to M.I.T. and without the requirement that redistribution of the software include the source code (see Note 1 below); or

☒ (ii) distributed by open source pursuant to the GNU General Public License ("GPL") or the GNU Library Public License ("LGPL") authored by the Free Software Foundation (available at http://www.fsf.org), meaning that M.I.T. will retain copyright ownership of the software code (source, object or otherwise) but shall make the software code openly available to the public by internet, worldwide web or like means, without restrictions on use or copying and without any financial consideration, except as allowed under the GPL or LGPL (see Note 2 below), which requires that redistribution of the software (or any modifications) include the source code; or

☐ (iii) placed in the public domain, meaning that upon placement in the public domain M.I.T. and the undersigned authors shall not claim, and the undersigned authors represent to M.I.T. that no other person shall have the right to claim, any copyrights in the software code (source, object or otherwise) as it now exists; and the undersigned authors have agreed that placing the software in the public domain will be the most effective way to disseminate the software for public benefit (see Note 3 below).

Please understand that this approval does not waive, relinquish, or grant any rights M.I.T. may have in any patentable or patented invention implemented by the software. In addition, if this software is further developed by your making significant use of M.I.T.-administered funds or facilities such that substantial new functionality is added or a new version is implemented, you must submit a new request if you wish that new development to be placed in the public domain or to be distributed by open source.

Technology Licensing Office

Note 1 (Open Source, BSD License): In this case, M.I.T. retains copyright ownership, but makes the software openly available to the public without the requirement that redistribution of the software include the source code. M.I.T. has approved open source distribution pursuant to the BSD License, which can be found at http://www.opensource.org/licenses/bsd-license.php. The license template at that website should be included conspicuously within the released software copy and at the site where the software is downloaded.

Note 2 (Open Source, GPL version 2 or LGPL License): In this case, M.I.T. retains copyright ownership, but makes the software openly available to the public with the requirement that redistribution of the software (or any modification of the software) include the source code. M.I.T. has approved this open source distribution pursuant to the GNU General Public License, version 2 (GPL-2.0) or the GNU Library Public License authored by the Free Software Foundation, which can be found at http://www.opensource.org/licenses/GPL-2.0.php and http://www.opensource.org/licenses/lgpl-license.php. Instructions for referral to the license terms in your software are available at those sites. As a reminder, please also: 1) Note the copyright and permissions notices of the third-party codes used: CMake, Boost, Google Protocol Buffers, Crypto++, NCurses; 2) Comply with the license requirements of the third-party codes used: MOOS and Wt (GPL version 2); and 3) Do not distribute the third-party codes used: Xerces and Zero MQ 2 (i.e. have your end users obtain these codes directly for themselves).

Note 3 (Public Domain): In this case, neither M.I.T. nor the author(s) claim any copyright in the software code. Therefore, all references to M.I.T. ownership and reservation of copyright should be removed from the released software copy. If some statement is required for clarity, the following language may be added: "Massachusetts Institute of Technology and the named authors assert no copyright ownership in this software."

Note 4: The M.I.T. copyright notice to be used with any license is "© Copyright *<fill-in year or series of years>* Massachusetts Institute of Technology."

Note 5: M.I.T. recognizes that other open source licensing mechanisms exist. If you desire a different open source licensing strategy, please confer with a Technology Licensing Officer at the Technology Licensing Office, 617-253-6966.
