Technical Skills

Programming:	JavaScript, WordPress, NodeJS, HTML5, CSS3, SCSS, Bash Shell, SQL, MATLAB, Python
Frameworks/Libraries:	React, Redux, ExpressJS, Gatsby, NextJS, GraphQL, Jest, Mocha, jQuery, Storybook, JWT
Databases & CMS:	PostgreSQL, MongoDB, SQLite3, Sitecore, Sanity
Dev Tools:	Excel, VSCode, Figma, GitHub, GitLab, Excel, Google Analytics, Bootstrap, Tailwind, FontAwesome, Postman, Jira, Trello, Confluence, AWS S3, Okta, Algolia
Hosting:	Heroku, Netlify, Vercel, Cloudflare, AWS, Firebase, Digital Ocean
Operating Systems:	Linux, Windows, WSL, IOS

Experience

Agile Strategies, LLC: Weehawken, NJ Aug 2022 – Present

Fullstack Web Developer

- Created reusable React components to streamline development across multiple websites
- Refactored codebase to leverage functional components, resulting in improved code quality and maintainability
- Refactored stateful logic into custom hooks to eliminate duplication
- Developed a staff training portal with quizzes and automated progress reports, integrating Vimeo API
- Built a form to standardize the collection of website content, organized by page, using React and MongoDB and Node
- Implemented authentication and route authorization using Node, Bcrypt, and JSON Web Tokens
- Converted a React website to NextJS, enhancing SEO, security, and performance

Stack: React, JavaScript, WordPress, CSS, NextJS, MongoDB, ExpressJS

Duke Energy: Remote Jan 2022 – July 2022

Front End Web Developer

- Collaborated with a team to develop, test, and maintain React components for a consumer-facing website
- Ensured performance, reliability, and accessibility with a mobile-first approach
- Applied bug fixes, enhancements, and performed unit testing and documentation using Storybook
- Integrated Sitecore JSON content into React components
- Led the implementation of a cost calculator React component utilizing cookies for location-based switching

Stack: React, JavaScript, TypeScript, Storybook, Sitecore

Family Promise (Internship): Remote Sep 2021 – Dec 2021

UX Developer

- Created UI mockups and prototype interactions using Figma
- Developed a mobile-first React app for collecting data on services rendered to clients
- Utilized Redux for form state management and visualized data using the Mapbox API
- Designed user hierarchy and permission scope schema for use by the backend team

Stack: React, JavaScript, Redux, Figma

Cembre: Edison, NJ Oct 2019 – Mar 2020

Product Development Engineer

- Translated client requirements into technical specifications for the development team
- Conducted system integration, product demonstrations, and troubleshooting
- Developed internal front-end application to standardize training
- Conducted electrical conductivity and tensile testing and presided over troubleshooting railroad hardware and software

Stack: JavaScript, jQuery, HTML, CSS, Excel

Relational Concepts: Remote

Oct 2018 – Sep 2019

Front End Developer

- Front-end developer for a real estate application, offering advanced, customizable filters for targeted searches by investors and professionals
- Crafted intuitive UI/UX designs through mock-up screens, wireframes, and workflows
- Authored user stories and documentation, paving the way for future development and upkeep
- Modernized site design with Bootstrap and Font-Awesome frameworks for a sleek appearance
- Developed unit tests leveraging Mocha and Chai
- Integrated Google Analytics, enabling a data-driven and insightful dashboard experience for users

Stack: JavaScript, jQuery, Google Cloud, HTML, CSS

Web Development Blog

A web development blog featuring convenient web development tools and interactive content

[GitHub](#)

- Implemented Gatsby page models and GraphQL schema to fetch markdown content and feed it into react components
- Designed and integrated a set of convenient web-hosted developer tools and GUI interfaces
- Added interactive content including comments, video conferencing, data-structure visualization, games, and full text search

Stack: React, JavaScript, Gatsby, GraphQL, SCSS, Lodash

Education

B.S. Electrical Engineering, TCNJ, Ewing NJ

2014 – 2019

Full Stack Web Development, Lambda School

May 2021 – Nov 2021
