“Perfection is Achieved Not When There Is Nothing More to Add, But When There Is Nothing Left to Take Away”

Summary

As a senior consultant, I'm holding a strong leader role throughout the company's digital transformation journey. An experienced executive with a demonstrated history of working in the platform of companies. I have built developer's ecosystems, products, and platform companies around the world. As an Agile enthusiast, I lead by using short feedback loop boosted by team collaboration and strong tool automation. 15+ years Self-proclaimed programming addict. I maintain my passion by crafting online products, connecting with various APIs and contributing to open source projects

SOFTWARE ARCHITECT - API PRODUCT OWNER

Sept. 2016 - Aug. 2018

- Active leader of the digital transformation team
- Implement the Company Business API based on a microservice architecture
- Drive the Business Api as a product
- Enable the business agility by providing a short feedback loop
- Design the overall Api architecture around 3 main principles : data, security and developer experience
- Share an internal API portal as the main source of truth by distributing the api contract, uml diagram, api logs, etc...
- Implement a contribution model around APIs. Share the api ownership across the stakeholders, product owners or developers
- Speed up the continuous delivery practice by leveraging a chatops. From 1 release a month to 1 release a day
- Built fully automated CI/CD pipelines on GoCd for containerized applications using Docker, Openshift and Kubernetes.
- Implement continuous testing on production (Test the api contract, api gateway config and api behavior)
- Onboard and support new public api consumers
- Deploy a centralized monitoring environment(AppMetrics, Grafana, prometheus) which gather system metrics.
- Promote the data driven practice by leveraging the big data platform to monitor the api performance and suspicious request
- Build an extreme confidence within the team to release at any moment
- —
- Web Platform: <http://api.krungthai-axa.co.th>
