### 1. INTRODUCTION

Figure 1 is an example of a figure that depends on a helper script. If we update the helper script, we want the figure to be re-generated the next time we build the article. In order to tell `showyourwork` about this extra dependency, we add an entry in the `showyourwork.yml` config file.

**Figure 1.** A sample figure showing the Mandelbrot set. This figure depends on the helper script `figures/utills/compute_mandelbrot.py`. The instructions for making that script an explicit dependency of this figure are specified in the `showyourwork.yml` config file.
