Dear Sir/Madam,

First of all, thank you for having the time to read through my cover and invest your precious time on it.

So, I'm soufiane a student at the university of Abou Bakr Belkaid, Tlemcen.

A very motivated individual when it come to different aspects of this life, from the very first and essential nature love to the really awesome and computer related articles.

One of the most interesting subject when it comes to me is Nature and Animals.

I'm a huge fan of pets and animals in general, a pet owner and a land owner and lover.

I've owned almost every single farm animal from small rabbits and fish to the very big animals such as cows and horses.

I did some trees planting and Land reclamation after our dear forest was on fire.

I'm also a big fan of sports, and an amazing swimmer.

I've participated in many competitions over the years and went to many different event, inaugurated many swimming pools and of course been awarded with medals and rewards.

One other thing about me is computer science and hacking.

From the very first day i discovered about hacking i was so into it to the point where i wasn't able to stop for a straight 3 years, learning new stuff every single day and practicing all of the different categories using CTFs and other platforms for learning cyber security and ethical hacking.

I was able to score my first job as a penetration tester after 2 year and a half of learning, found some really cool stuff on that and had a great fun working and learning at the same time.

Bug bounty on the other hand is a new topic to go deeper into for me, i've been into it for a short period of time and had some experience, no real deal bugs so far.

My education is not limited to the four walls of my classroom. After school hours, I participate in extracurricular activities to develop my social and communication skills, that's why i always aim to join multiple clubs and organizations.

Scorpio club the club i appreciate the most, since i had been a vice president role and accomplished it with great success and many prizes were awarded to our club.

These activities and achievements together show that I am a responsible and a focused individual with

the potential to do more and be more. Should you consider me for this job, I promise to

continue working to become the best in my chosen field and be of service to others in the future.

Thank you again for your time. Your kindness and generosity are greatly appreciated.

Sincerely,

Khedim Mohammed Soufiane
