Notes: Population figures (which include adults and children) are estimates calculated by using state-sensitive averages of the estimated number of people per church district. The population per district varies by region, community, affiliation, and age of the district. Thus, the actual number of people in a specific district or state may be higher or lower than the estimates in these tables. The national composite average of people per district is 137. The figures includes all Amish groups (Old Order and New Order) that use horse-and-buggy transportation, but excludes car-driving groups such as the Beachy Amish and Amish Mennonites.
