

Contemplation on the heavens.

My soul the heavenly worlds survey
The regions of eternal day
There Jesus reigns & round his seat
Millions of glorious angels meet

Those morning stars how bright they shine
How sweetly all their voices join
To praise their maker watchful still
To mark the signals of his will.

Whilst with their outstretched wings they stand
To fly at his divine command
All happy as they are and great
Yet scorn they not on men to wait.

And little children in their arms
They gently lead secure from harm
Oh! may I with such humble zeal
My heavenly Father's word fulfil.

That I when time has run its race
May with blest angels find a place
Borne on their friendly wings on high
To joys like theirs that never die.

[October 1838]

A busy neighborhood - sometimes a thousand people engaged on the work of a new meeting house began just before our windows. The natives had a lively job of it in digging the cellar, which was an excavation at least 144 feet by 72. In accomplishing this they were obliged to disturb the repose of the dead. The remains of several persons with whom we had been formerly acquainted and names that have been mentioned in the communications of the mission were disinterred exhumed their remains and removed to another place by their friends - It was to my mind a very impressive transaction. It was indeed looking into the grave; and to see the dust of an acquaintance which had some ten years ago been consigned as it was supposed to its final resting place, filled my mind with very solemn emotions.

Honolulu October 1st 1838 (Monday)

H.B.M. Sloop of war Fly, Cap. Elliott, sailed this afternoon for the Society Islands thence she is to proceed for Pitcairns & South America.

The intercourse of the Cap. has been very polite & respectful. He has been desirous of reconciling and uniting all parties and healing all discensions. In some instances he has been successful. He succeeded in prevailing on Mr. Charlton to accompany him to the house of Mr. Bingham. The first time he had been in the house for years.

Our acquaintance with Count Strzelecki a polish nobleman who is a passenger in the Fly has been one of much interest. He has recommended himself to our regard by a very gentlemanly demeanor and by an enthusiastic interest in the work of improvement at the islands.

Tuesday Oct. 9th. The Ship Illinois sailed this afternoon for the United States. Her port of entry is New York. Mr. & Mrs. Cushing take passage in this vessel. We send all our remaining letters together with the lists of the families containing their wants for 1840.

A valuable ox died to day. It had been yoked with its fellow for training not being accustomed to the yoke. The native took them to Punahou and drove them about. Towards evening he returned with them and after unyoking them one fell down and died in a few minutes. The other also fell a short time after much in the same way, but we hope he will not die. After a vein had been opened he seemed to revive.

Tuesday Octr. 16. Attended an apana meeting at Waikiki. Nothing special occurred.

In the evening had vivid lightning but no thunder or rain.

Thursday 18. Walked to Manoa with Mr. Castle for a short visit to his family together with the family of Mr. Cooke who occupy the same house which belongs to Haalilio near the lot of land originally granted to the mission.

On our way we stopped at Punahou where Mrs. Bingham is occupying two of our carts & the oxen drawg. stone for a fence. The premises are pretty nearly surrounded. That part of the wall built by the mission is very heavy and substantial. The other will answer a good purpose to secure the enclosure from encroachment.

The alledged cause is Mr. .B's neglecting to attend to a message in a manner agreeable to his majesty. Mr. Richards says Mr. B. was not in fault; and he thinks the interdiction of the King should be made serious business of.

Sabbath Octr. 28th 1838. Mr. Diell is so seriously indisposed that he was not able to have service in the Chapel.

Monday 29. The funeral of Kohupuu was attended this afternoon. This was a sudden death. He was Cap. of the Becket wh. sailed on Friday evening in his command. He was taken ill before the vessel had

proceeded far and the vessel ret'd; he was bro't. on shore in the night and Dr. Judd sent for. Next day (Saturday) he died.

Saturday Novr. 3. At 20 min. before 5 o'ck this morning Mrs. Chamberlain became the mother of another daughter. This is our seventh child, and she was born on the 11th anniversary of the Parthian's sailing from Boston, my wife being one of the missionaries which embarked in that vessel.

Saturday Novr. 10 1838. Dr. Judd returned from Waialua - He found Mr. Locke in a distressing state and sat upon attendance on him last night and this after the fatigue of about 30 miles riding during the day. As Mr. Locke was some what relieved this morn'g. Dr. Judd thought it expedient in reference to Mrs. Dimond's case, every hour expected, to ride home to day.

Sabbath, Novr. 11. Mrs. Dimond was confined with a son this morning. A messenger had previously arrived from Waialua with an urgent call from Mr. Locke for the Doctor, he being more ill than when the Dr. left him yesterday. He started as soon as he could be spared, in company with Mr. Cooke for Waialua.

The illness of Mr. Diell continues so that the chapel was not opened for morning service; but was opened in the evening and a sermon preached by Mr. Bingham. A full meeting.

Saturday Novr. 17. A man belonging to an English ship was tried before the Chiefs & Consul today for jeopardizing the life of a lad an apprentice of the same vessel. As I understand the case the man undertook to desert and got this lad to go ashore with him in one of the boats. After he had reached the shore he left the lad to get back to the vessel alone. The wind blew very strong and the boat with only one person in it became unmanageable and was driven out of the harbor into the open sea. He was out two nights & one day * drifting about in a perfectly destitute condition but providentially got to shore at Puuloa 15 or 16 miles from this. No further particulars have come to my knowledge. The man was acquitted of any murderous intentions, but by a false statement had prevented measures being taken to look after the lad or any attempt to rescue him from so melancholly a death as that to which he was exposed. *[Later] Learn the time was only 12 hours.

Mr. Cooke returned from Waialua left this morning at 6 o'ck - Mr. Locke recovering.

Tuesday Novr. 27. Early this morning the ships lying in the roads (five in number) made signals for getting under way either to come in or to go off as the wind had increased during the night and was blowing heavy from the South. Four of the ships were during the forenoon brought safely into the harbor. The fifth - the Oscar, Cap. Dagget of New Bedford, took her anchor to go to sea but it was found she could not clear the shore, and having fallen to the leeward of the passage could not be taken into the harbor. The captain finding himself in this condition dropped his anchor, but it did not hold, he dropped another, the chain of this after awhile parted and the ship dragged and continued to drag until she struck the reef. The sails were then hoisted with a view to force the ship to the best situation for saving her cargo. She stuck fast on the reef just inside or to the North of what is called the middle ground. She careened very much in going on but as she swung round she became upright or nearly so and stood with her lower sails spread till nearly night.

At about 2 o'ck she was abandoned by the crew and Kekuanaoa by agreement with the Cap. took direction to save what he could for 1/4 Salvage.

Saturday Decr. 1st 1838. The gale having abated on Tuesday night the natives began early on Wednesday morning to take out the cargo of the Oscar and they were busily occupied until last evening by which time they had very much lighted her of her cargo. During the night by taking advantage of the high tide of the full moon they succeeded in getting the ship off, and this morning she was towed into the harbor and brought along side of Ladd & Co's wharf, part of her oil being still on board.

Sabbath Jan. 13. The Brig Lama arrived this forenoon. She appeared with colors pendant at half mast. The intelligence which she brings is of the death of her master, Cap. Bancroft massacred by the North W. Indians employed by him for the purposes of the voyage to take sea otter. Some misunderstanding arose or complaint of the indians in regard to food, which was not settled to the satisfaction of the indians ; they being armed followed the captain to the after part of the vessel & shot him. They also shot one of the seamen in the act of going to the arm chest for means of resistance. The wife of Cap. Bancroft came upon hearing her husband in distress & fell upon his body & she received several severe wounds: but was not killed. The indians took possession and compelled the crew to take the vessel to Sitga and there to land them. They were 27 days beating up from Cape Rose to Sitga - The indians abandoned the vessel to the crew after robbing her of most that was valuable on board. The Lama was 17 days on her passage from Scitga to this port.

Mrs. Bancroft (formerly Mary Homes) has returned in a very distressing condition. It is hoped she will recover.

In the afternoon the Brig Indus arrived from Mazatlan and brot the distressing intelligence of the loss of the Brig Griffon & the death of Cap. Little, he being the only person not saved. Cap. L. had been very prosperous in his business and pretty nearly ready for sea - In the early part of the evening of the night in which the disaster occurred Cap. L. was on shore with the owner of the vessel and another Cap. whose vessel lay in port. They invited & urged him to remain on shore, he declined on the ground of having business to attend to on board requiring his presence, which was supposed to be the reciving of specie - to be smuggled into the vessel. In the night a sudden gale sprung up which blew with such violence as to part the chain and the vessel was driven on shore and dashed to pieces in a very short time. Cap. Little went below soon after the vessel struck to put in the dead lights: but so violent was the movement that he was thrown down & dashed about in the cabin and when he reached the deck he was wounded and exhausted. The mast went by the board & he told the crew to take care each man of himself - He was securing himself when a tremendous wave struck the vessel & washed every man overboard: That part where he was holding on divided and he fell into the opening and was seen no more. Every search was made afterward but without success to find the body. The money or most of it we understand was recovered after the vessel went to pieces - it was found in bags as it was put on board on the sand. Every thing else lost.

The day has been one of gloom. The news to Mrs. Little was overwhelming.

The Indus it is said was not intending to stop: but being in want of water she put in to replenish her store.

The adopted son of Kaikioewa - Moses - the true son of Kinau & Kekuanaoa remained to be under the care of his parents. This seemed to be a very necessary step as the lad is fast gaining knowledge of evil and running swiftly in the way of his own heart, and if longer left to himself will bring his parents to shame.

Mr. Thurston & family went to Koolau.

The following is a copy of a Manifesto addressed to the King of the Sand. Islds. by Cap. L. Place commanding the French Frigate L'Artemise in the name of her government.

His majesty the king of the French having commanded me to come to Honolulu in order to put an end either by force of persuasion, to the ill treatment to which the French have been victims at the Sand. Islds. I hasten first to employ this last means as the most conformable to the political noble and liberal system pursued by France against the powerless, hoping thereby that I shall make the principal chiefs of these islands understand how fatal the conduct which they pursue towards her will be to their interests, and perhaps cause disasters to them and to their country, should they be obstinate in their perseverance. Misled by perfidious counsellors; deceived by the excessive indulgence which the French govt. has extend toward them for several years they are undoubtedly ignorant how potent it is, and that in the world there is not a power which is capable of preventing it from punishing its enemies; otherwise they would have endeavored to merit its favor, or, not to incur its displeasure, as they have done in ill treating the French. They would have faithfully put into execution the treaties, in place of violating them as soon as the fear disappeared, as well as the ships of war wh. had caused it, whereby bad intentions had been constrained. In fine they will comprehend that to persecute the Catholic religion, to tarnish it with the name of idolatry, and to expel, under this absurd pretext, the French from this Archipelago, was to offer an insult to French and to its

Sovereign.

It is without doubt the formal intention of France that the King of the Sandwich Island be powerful independent of every foreign power which he considers his ally: but she also demands that he conform to the usages of civilized nations. Now, amongst these is not even one which does not permit in its territory the free toleration of all religions: and yet at the Sandwich Islands the French are not allowed publicly the exercise of theirs, while Protestants enjoy therein the most extensive privileges; for these all favor, for those the most cruel persecutions. Such a state of affairs being contrary to the laws of nations, insulting to those of Catholics, can no longer continue, and I am sent to put an end to it. Consequently I demand in the name of my Government.

1st. That Catholic worship be declared free throughout all the dominions subject to the King of the Sand. Islds.; that the members of this religious faith shall enjoy in them all the privileges granted to Protestants.

2nd. That a site for a Catholic church be given by the Govt. at Honolulu, a port frequented by the French, and that this church be ministered by priests of their nation.

3rd. That all Catholics imprisoned on account of religion since the last persecutions extended to the French missionaries be immediately set at liberty.

4th. That the King of the S.I. deposite in the hands of the cap. of the L.A. the sum of twenty thousand dollars as a guarantee of his future conduct towards France, which sum the Govt. will restore to him when it shall consider that the accompanying treaty will be complied with.

5. That the treaty signed by the King of the Sand Islds. as well as the sum above mentioned be conveyed on board the Frigate L'Artemise by one of the principal chiefs of the country; and also that the Batteries of Honolulu do salute the French flag with twenty one guns, which will be returned by the Frigate.

These are the equitable conditions at the price of which the King of the S.I. shall conserve friendship with France. I am induced to hope, that, understanding better how necessary it is for the prosperity of his people & the preservation of this power, he will remain in peace with the whole world, and hasten to subscribe to them, and thus imitate the laudable example which the Queen of Tahiti has given in permitting the free toleration of the Catholic religion in her Dominons; but, if contrary to my expectations, it should be otherwise, and the King and principal chiefs of the S.I. led on by bad counsellors refuse to sign the treaty wh. I present, war will immediately commence, and all the devastations, all the calamities, which

may be the unhappy but necessary results will be imputed to themselves alone, and they must also pay the losses which the aggrieved foreigners, in these circumstances, shall have a right to claim.

The 10th of July (9th according to date here) 1839

Captain of the French Frigate L. Artemise

Signed C. Laplace

(For further incidents see S.I. Gazette of July 13th).

The Schr. Kinau sailed for the King, a hostage being detained on board the Frigate as security for his arrival.

Wednesday July 10th. Haalilio who was detained as hostage was exchanged for John Ii who went on board the l'Artemise this morning.

Many reports are in circulation respecting the intentions of the Comdr. of the Frigate - It is very certain that very decided measures will be taken to carry into effect the designs of the French.

Saturday 13th July 1839. Fears are entertained that the King will not arrive in season, and as the Chiefs feel that nothing short of compliance with the demands of the French will prevent hostilities, a result to which it would be the ruin of their nation to be brought, they have resolved to pledge the consent of the king to the conditions of the Treaty and to offer the money required as security for the fulfilment.

The money was accordingly sent off this afternoon and a salute of 21 guns fired from the fort, which was responded to from the Frigate in token of acceptance.

Kikuanaoa & Haalilio were the agents of govt. acting on the occasion and Mr. Richards accompanied them as linguist.

He stated that his return would depend upon the intelligence he might receive from the islands.

Friday 26th. Mrs. Clark arrived from Waialua, with her four children. She was attended from Ewa by Bishop.

British Brig Elizabeth Buckham Scott, arrived this afternoon, 51 days from Canton, bound to Buenos Ayres. A letter was rec. by Mrs. Carter from her husband by which we get the information that Mr. Diell had sailed for England, that the health of Mr. Clark was improving and that Mrs. Diell and daugtr. Anna would return with Mr. Clark in the Europa which may be expected in six weeks. Very serious difficulties it seems have existed for some months between the Chinese authorities & the Foreign merchants in consequence of the immense quantities of opium which of late have been introduced into that country. All foreign trade had been suspended, and the residents at Canton imprisoned in their own factories by armed soldiers, till all the opium on hand was given up, amounting to 22,000 chests, valued at \$12,000,000 of

dollars. Trade had partially commenced again and a fast sailing vessel had been despatched to convey the intelligence to the govt. of Eng. The Am. Frigate Columbia, Comd. Reed, and Sloop John Adams, Wiet, were at Macao and may be expected here in two months.

The brethren met to converse on the subject of a communication recd. from Mr. Emerson.

"1st. Will it not be well for us to have an island meeting for a day or two, to consult in relation to measures to be pursued by us, to best serve and save our Churches and this people at this peculiar crises."

It was thought that the brethren could do more to subserve the cause by remaining at their posts than by meeting together at the present time, when so much is to be done at every station, that by correspondence with one another by letter the good might be effected which was sought by a meeting.

"2nd. Will it not be well to put the Bible immediately into the hands of readers letting them have it on credit - with the assurance that they shall not be distressed for the payment of the same - although all will be expected to pay for it when they can - no family to have more than one Bible on credit and that to be the Family Bible."

It has been decided by the br. of this station - that the Bible should as fast as possible be put into the hands of those who are able to read, and desirous to obtain the Scripture, but unable to pay for them, without much regard to compensation, as such a course as this would fall in precisely with the intention of the Bible Society.

"3rd. May it not be well for Mr. Locke to suspend building and spend the remainder of the year up Koolau at Haula or near there exerting the best influence he can among the people."

On this enquiry the br. thought it highly desirable that operations should be carried on in that part of the island - that Mr. Locke might go once a week or not so frequent and labor - that Mr. Emerson might go occasionally and spend a week or part of a week in preaching & looking after the people: that at any rate the best teacher that can be found be placed there and vigorous efforts made to instruct the people in the knowledge of the Scriptures and of the only way in which they can be saved.

Thursday Augt. 1st 1839. The Sch. Keola sent by Mr. Reynolds to carry letters to St. Blas for

conveyance across the continent returned and brought Amn. news into April. The papers make known that the State of Maine are assuming a hostile attitude toward their neighbors of New Brunswick on account of the north east boundary. The information however has been recd. in a private letter that the subject of the difficulties had been committed to Commissioners and it was expected that it would be adjusted amicably.

Thursday Aug. 8th. Had the company of Mr. Brewer & Mr. Hooper to tea this evening yesterday Mr. Tinker's family, the evening before Mr. & Mrs. Brinsmade.

The Hawaiian Spectator for July having been circulated, the article written by Mr. Jarves giving account of the visit of the French Frigate L'Artemise to this place, which is contained in this number, is producing a great excitement. The French and English Consul seem to be most affected, the French Consul in a particular manner, and has represented the article to the King as a libel and has solicited the King to punish the writer.

The health of Mrs. Castle has assumed a very unfavorable appearance within a day or two (yesterday or rather last evening) an attack of bleeding from the lungs has quite prostrated her and it cannot but be feared a decline may set in.

Wednesday Aug. 14 1839. The case of Mr. Jarves having been referred to arbitrators to decide upon the testimony of witnesses - the testimony to be given in writing - Two of the arbitrators were chosen by Mr. Dudoit and two by Mr. Jarves - those of the former were Mr. Reynolds & French - of the latter Mr. Hooper & Dr. Wood, - the fifth chosen of the others was Mr. Pelly, - the investigation took place today.

The testimony which Mr. Richards gave in offended Mr. Dudoit very highly, and he did not forbear to express in words and in gestures his displeasure - When Mr. Richards left the room he was followed out by Dudoit who had a horse whip in his hand, which he shook at Mr. R. & said nothing, but his black coat defended him. He employed other language which was highly uncivil - and which none but a man of honor

in the popular sense would allow himself to use; who deemed himself insulted.

The decision was not made up to day - the arbitrators meet again tomorrow to make up their minds.

Thursday Aug. 15. Mr. & Mrs. Dimond & Mrs. Smith set out to make a tour of this island via Ewa & Waialua.

Mr. Bishop came up this day from Ewa and returned again.

The arbitrators of Mr. Jarves case made known their decision was was that The statements continued in his piece had not been sustained.

A letter recd. yesterday from Mr. Armstrong makes known the afflictive intelligence of the death of Mr. Vanduzee's daughter by Colara infantum. Mr. & Mrs. V. had come to Wailuku.

Saturday Aug. 24th. The voice of wailing is again raised in our midst - the sudden death of Liliha this evening has furnished the occasion. She has been taken away with a stroke - an appoplectic shock as it is believed. She was at her house just beyond the creek and was about to return to her residence to Honolulu. Having eaten a hearty supper, she laid herself upon her sleeping place surrounded by curtains, where she remained, not coming out to go to her other house as she had proposed. Some of her attendants remarked to an enquiry about her going Why, she surely does not intend to go to night, Let us go in and lomi her - On going in & taking hold upon her they perceived a singularity in her appearance and said he hiamoe ano e keia and raised an alarm - on examination she was found to be dead.

Sabbath Aug. 25 1839. An Eng. Brig of war arrived this afternoon - the Sparrowhawk, Cap. Shepherd from Valparaiso - Having stopped at the Marquesas islands and at Hilo on her way.

Monday Aug. 26 1839. The Sparrowhawk was brought into the harbor this morning & salutes exchanged with the government. We understand that she has no business with the government.

We understand that the people are extravagant in their expressions of grief on account of the death of Liliha - and some appear to be returning to the custom of naaupo times - cutting the hair, burning the skin

and knocking out teeth - These practices are principally confined to the poe naupo, though some of the more enlightened have cut off their hair, & have been occupied in singing a mele in praise of the deceased.

During this week the old meeting house has been rethatched.

Wednesday Oct. 2. The remains of Liliha which have been lying in state since her decease Aug. 24th were this afternoon borne in grand procession to the meeting house where funeral services were performed. The procession was formed at her house near Mr. Smiths meeting house; the coffin was covered with red

velvet ornament with bronze decorations and placed on a horse attached to four carriage wheels and surmounted with a canopy of black silk edged with a neat white fringe. A majestic black Kahili was carried in front and bearers of small Kahilis of variegated colors walked on each side. Mr. Bingham & Mr. Walsh in white sacerdotal garments with John Stevens in full military dress in the centre led the procession and they were followed by the band playing a funeral dirge — the missionaries foreigners and foreign consuls coming in behind in their order and directly preceeding the coffin, with the Kings guard in single column & measured step on each side.

The sermon was preached by Mr. Bingham from Rev. 3: 2 & 3 v. It was a discourse well adapted to the circumstance of the case of the deceased, and contained serious warnings to those who profess to be the followers of Christ but afford only dubious evidence of being sincere.

It was a singular arrangement to place a Roman Catholic Priest by the side of Mr. Bingham who walked as the officiating clergyman, but I hear that it was at the instance of Mr. Charlton, who declared that he would leave the procession unless Mr. Walsh was allowed to take his place by the side of Mr. Bingham in front. Mr. Walsh walked into the meeting house in the procession; but on arriving opposite the pulpit, and a seat being assigned to him he declined the acceptance and walked out of the house. The English Consul did not enter the house and was seen abroad during the exercises.

The body was removed in procession to the Fort, whence it is to be removed to Lahaina. Mr. Walsh joined the procession after it had left the meeting house, occupying the same place as before. No guns were fired on the occasion, probably because the chiefs did not wish to use up the powder.

Thursday Octr. 3rd 1839. The Kahalaea with the remains of Liliha on board with Kekauonohe, Kehikili & others sailed in company with the Keola for Lahaina.

We learn that the Eng. Consul is much displeased with the Sandwich Island government, and has hauled down his flag. One ground of displeasure was the refusal of Auhea to order the magistrates of Waimea to be brought down here to be tried for alledged illegal conduct in regard to depriving a British subject by the name of William Hughs of his property. Auhea said she would write to Gov. Adams to investigate the subject: but this would not satisfy his Consularship. Another ground of offense was the refusal of the government to acknowledge a claim of about 20 thousand dollars against the estate of Liliha.

The English consul is also much displeased with the mission and declares he will have nothing to do with any business in the conducting of which a missionary is invited to take a part.

The four arrived at this place some time ago having been put on bd. another

vessel at sea by Cap. Cathcart. The three who were landed at Lahaina being strongly recommended to our attention by Mr. Baldwin, we have taken in and afforded them accommodations in the dobie house built by Mr. Parker for his accommodation during gen. meeting.

Monday Novr. 4 1839. The Frigate Columbia & sloop of war John Adams left early this morning. The influence which the officers of this squadron has exerted in favor of the mission & on the govt. of these islands we have reason to believe will be extensively salutary. Some of the officers particularly Lt. Foot & Turner of the John Adams have been indefatigable to set to rights the public mind in regard to the principles & system of the mission, and they have secured a testimony from the officers in our favor which will be widely circulated.

Tuesday Novr. 5 1839. This morning George informed me that one of the Japanese which we have lodged was unwell, that he had been ill according to the testimony of his companions during the night in consequence of which they had all been deprived of rest, and that they did not wish to be disturbed to receive food. Hearing that the old man was sick I directed George to inform Dr. Judd which he immediately went to do but failed to find him. About noon he went again to the house where the men were lodged and now found to his surprise that the man was dead and from the fact of his body's being perfectly cold it was judged that he had been dead some time. As soon as I had received this information I requested George to give notice to the Dr. that he might examine the corpse, which was done. From the account of the case given by the two companions of the deceased it was concluded that the disease was cramp or inflammation of the bowels, as the signs given implied that the seat of the pain was the bowels & stomach. The men did not appear to be aware that their companion was dead till George called about noon to arouse them. When on uncovering him supposing him only to be asleep he was found stiff and cold, they were much affected and bowing their heads low they wept with many tears; but made no noise.

The other four who had been their fellow sufferers in the junk and with them rescued from the jaws of a lingering death to which they were exposed in their wrecked condition, were made acquainted with the melancholly fact and came to mingle their tears and perform superstitious ceremonies over the body of their companion and commander, as the deceased was owner of the wrecked vessel.

I gave directions to have a coffin made and pointed out a spot in the burying ground where his body might be interred - for these attentions they seemed to be grateful, and desirous that the interment soon take place. It was thought best to delay it however until tomorrow, as the time for doing all the work was short, and it seemed also proper that as the death was so sudden and happening in such circumstances, the

body should be further examined; which was done in the evening by Dr. Judd. The King also calling at the house to observe the strangers in their grief. No suspicions were entertained by Dr. Judd of any unfairness in relation to the cause of the death; on the contrary it was regarded by him as one of those visitations of providence around which a veil is drawn by him who doeth his own will & giveth no account of his matters.

Wednesday Novr. 6, 1839. The interment of the stranger took place in the common burying ground. Quite a number of natives, church members & others collected around the house where the remains were laying decently enclosed in a coffin; which when placed in a cart were drawn to the grave followed by the Japanese as mourners & by the natives who fell in behind. At the grave Mr. Bingham read a portion of Scripture & offered a prayer part in native & part in English.

The mans [sic] name as communicated by Mr. Baldwin is "Heshero". He left a wife & children in Japan - three sons & two daughters - His desire to return was very strong. Alas! he has gone to his long home and will never see again in the flesh the faces of those he seemed so much to love. And they - long since probably have ceased to expect his return, or if the hope of it has at any time lighted up a feeling of joy in the bosom of the desolate mother it was but for a moment:- and the chilling uncertainty of his fate has again frozen her joy.

Wednesday 13. Gerrit Judd is so low that scarcely no hopes are entertained of his recovery. He is aware

of his danger and is willing to die. He took an affectionate & affecting leave of his parents & brothers & sisters and left messages for the children. As there is hope of all the living I would not give him up: but commend his case earnestly to God, who will all that is best - best for the child - for the parents & for the cause.

After writing the above I was called to assist in the last sad office of laying out the body of the child. He breathed his last just before 11 o'clock, few minutes before I was called.

Friday Novr. 15 1839. The funeral of Gerrit took place to day at 10 o'ck. A verse of a hymn was sung & a short prayer offered at the house; at the close of which when the procession formed and proceeded to the school house, the remains being carried by four of Dr. Judds domestics. The exercises were conducted by Mr. Bingham who preached an hour and a quarter upon the words of Job. "The Lord gave & the Lord hath taken away. Blessed be the name of the Lord. The exercises being closed the procession formed again and the remains were borne to the place of interment - the grave was opened just at the feet of Mrs. Rogers' in the range of Mrs. Stetson's. A short address and prayer were further offered by Mr. Bingham, and the earth was returned to its place over the coffin on which were green leaves of geranium & pink flowers of the Peruvian jessamine sprinkled together in a cluster. Being a little withered and faded they expressively told the truth of what our choicest earthly comforts are — a fading flower - a withering leaf.

"So fades the lovely blooming flower

Frail smiling solace of an hour."

I recd. a line from Mrs. C. this morning giving notice of her arrival at Kaneohe last evening, and of her purpose to start early for the pali, requesting a horse to be sent hither for her. Sabbath Novr. 17 1839. The funeral of Robert S. Morris was attended at 4 o'ck from the house of Dr.

Judd, under the direction of Mr. Hooper acting as Consular agent. A prayer at the house and church burial service at the grave was the exercises on the occasion, performed by Mr. Bingham. The grave was a few feet outside of that opened for Gerrit Judd in the same range.

Kamanawa the husband and Lono captain of the Hooikaika were the persons. A jury was empannelled and advocates chosen - and the business of the court opened - On trial it appeared by the confession of the husband that he administered the substance which caused her death and that Lono assisted in preparing it as well as having made known that he was acquainted with the substances that would form a compound that would cause death. It appeared also in the confession that the said Lono had administered the same kind of medicine to Keawehawaii a former cap. of the Hooikaika which caused almost instant death, and that he had also poisoned a former wife, and had it in purpose to poison his present wife. These facts he had stated to Kamanawa and the same Kamanawa communicated to the court; and it is believed that they were the truth. Lono stated they were not true tho. he did not deny having made such disclosures to Kamanawa. The plea of the individuals were that he Kamanawa did not know that the medicine would kill - and of the other that he did not administer the preparation. So flimsy was their plea and yet they imagined that they should escape punishment!!

Kekaulohe has, we have learned, passed sentence of death upon the persons, tho. the time is not fixed for the execution of it.

Peacock arrived this evening.

Monday Novr. 23rd. 1840. Since the last entry I have been afflicted with sickness; but God in great goodness to me has raised me so as to be able again to attend to business a little.

The Brig Thomas Perkins arrived 151 days from New York. A few letters have come to hand but we hope to receive more.

Tuesday Novr. 24th. Several parcels of letters have come to hand from the Thomas Perkins, among them we find several from our two sons. Also a general letter of 8 sheets from the Secretary for the mission and a letter from the Treasurer. We are happy to hear that the receipts of the Board have been such notwithstanding general commercial embarrassments, that there is a prospect that the Board will be able to furnish us as much for our support the next year as they appropriated for the current year; that is as much of \$35,000 as we may need.

Saturday Novr. 28th. Mr. Agate, artist belonging to the Peacock called and sketched my likeness - he commenced about 12 o'ck and abating the time which it took to eat diner was occupied till sundown. I sat about 5 hours.

The Schooner Flying Fish having been absent about 18 days on a trip to Hawaii to carry several scientific gentlemen of the Explor .Exp. for a visit to the volcano accompanied by Mr. Hall. return towards eveng.

Wednesday December 2nd 1840. Mr. & Mrs. Diell and their four children embarked in the ship Lausanne Cap. Spalding for the U.S. Dr. & Mrs. White & two children of the Methodist Mission from Columbia river - and Miss Mary Smith take passage in the same ship. She sailed in the afternoon, together with several other vessels; one of which was U.S. Sloop of War Peacock Cap. Hudson. The Flying Fish started to go out and struck aground so that she did not get off till after dark.

Thursday Decr. 3. The U.S. Sloop of War Vincennes, Comd. Wilkes left the harbor bound for Hilo, Mr. Brinsmade & Dr. Judd go passengers. The comd. has made arrangements to ascend Maunaloa in order to make observations there - he will carry various apparatus for astronomical observations, & will be employing natives to carry the apparatus & means of living and directing the native corps.

Sabbath, 7. The Lord's Supper was celebrated in the native congregation. No new additions none propounded. Notice was given that the 1st day of January next would be observed as a day of Thanksgiving.

Wednesday 10. The Ship Alciope, Cap. Clap sailed for the U.S. Cap. Carter & family - Mr. Couthovy a Scientific gentlemen of the Explo. Expedition & Mary Warren are passenger. One or more of the children of foreign parents are sent to the U.S.

I met Mr. Couthovy yesterday afternoon leading a foreigners child by the hand. He remarked she was to be a scholar of his as he intended to keep school on board - and he also said he should act in the capacity of Parson Physician & School master.

Friday Decr. 11. 1840. Had company to tea - Dr. & Mrs. .Wood, Mrs. Hooper, Mrs. Taylor, Mr. & Mrs.

Skinner & Cap. Varney of the Brig Thomas Perkins. Also Mr. H.A. Peirce. The evening passed pleasantly - Mr. Hall came in after tea.

Mr. Armstrong set out on a tour of the island - going by the way of Waikiki intending to spend the Sabbath at Kaneohe - and on Monday to return by the way of the Pali and then direct his course to Ewa & Waianae so as to be at Koolau the latter part of next week in order to attend a protracted meeting with Mr. Emerson in that division of his field.

Saturday 12th. Took tea at Mr. Dimond's. On Thursday evening we took tea at Mr. Hall's.

Sabbath 13th. Mr. Armstrong being absent John Li conducted the exercises in the native cong. The method was much as usual except that he read a printed sermon.

I attended my Sabbath School the first time for eleven weeks. I was able to ask questions on the verses of the week. I hope my health will allow of my attending.

Monday Decr. 14 1840. Took a dose of salts today in consequence of having something coming on my neck of the nature of a boil. It has been troublesome for about six days and I fear it will prove to be a carbuncle. Mr. Hall obtained the Clarion to carry lumber &c. to Wailuku & to bring from thence sugar & molasses belonging to Mr. Armstrong.

It was stated this evening in our meeting at the house of br. Castle & Knapp, — being the Sab. Sch. Con., that the number of children in the Sab. Sch. of the two congregations in this village amounts to about 500. This increase of scholars is owing to the taking effect of laws on the subject of schools; which laws are now in the press & will soon be out.

Mr. Armstrong returned this afternoon from Kaneohe where he spent the Sabbath. He will not set out till next week to prosecute the tour of the island.

Tuesday Decr. 15. It has been stated to me to day that the French Consul has asserted that in consequence of the law of the chiefs on the subject of schools the treaty is broken. I do not know how the law can be construed into a breach of treaty unless it be that privileges are enjoyed by protestants which seem to be denied to Catholics. I have not seen the laws on the subject of schools and therefore do not know whether a fair construction of them can involve the imputation.

Friday Decr. 18 1840. After breakfast I rode to Dr. Wood's in company with Mr. Castle, and Dr. W. examined and lanced the swelling on my neck. He says it is an abscess not a carbuncle as I supposed.

Recd. letters to day from the windward by the Don Quixote which arrived last night and by a small Schr. from Maui this morning.

Hear of the arrival of the Vincennes at Hilo on the 9th inst. and of the Expedition to Maunaloa being about ready to set off - 20 days are expected to be occupied in the excursion & the accomplishment of the objects of the visit.

Took tea this evening at Mr. Rogers.

Sabbath Decr. 20. I found my Sabbath School exercise so fatiguing that I did not attend the afternoon service. I have some fears that I shall be obliged to abridge the part I have taken in the exercises of the School.

This evening Mr. Armstrong preached in the chapel. I did not attend.

Monday Decr. 21. Mr. Armstrong set out to renew his journey round the island by the way of Ewa, Waiane & Waialua.

Tuesday Decr. 22. Mr. Bishop being here from Ewa the printing Committee held a meeting on the subject of an edition of the New Test. It seems there are not a sufficient number of copies on hand to bind up with the Old Testament, and N.T. is called for in a separate volume.

The Com. decided to print forthwith an edition of 10,000 in the duodecimo form.

They also decided to reprint the Geography & Helunau.

The weather being unfavorable Mr. B. did not return to Ewa. He gave us some account of an interview which he had with the Catholic priest Maigret, at Waiane. It seems he had a kind of public disputation with him on several points of doctrine. - The real presence in the Eucharist - prayer to the virgin Mary - purgatory were subjects of discussion. The discussion was carried on in the native language & without any asperity - and the native scriptures were referred to as authority. The Catholic of course could not prove his doctrines but only assert them - and say the sentiments he maintained were truth. For authority for mainting the doctrine of purgatory he cited 1 Cor. 3:15 - "Saved: yet so as by fire."

Wednesday, Decr. 23rd. Mr. Bishop returned to Ewa.

The Kahalaia sailed for the windward - Mr. Hall shipped a few things for Hilo in this vessel, as Hilo is her ultimate destination. We had a pretty heavy shower in the night. Wind from the sea.

Thursday Decr. 24. Mr. Hall is now erecting an addition to his house, desigened for a sleeping room. The foundation is laid & raised 4 or 5 courses. It is of stone.

Friday Decr. 25 1840. Christmas day. It is said that the Catholics applied to Kekuanaoa to have work suspended this day. I presume he did not give orders to this effect, as work seemed to be going on as usual. All had liberty doubtless to lay aside work who chose.

Mr. Dudoit it is said had an entertainment in the vally.

Marshal music was heard in the morning and evening.

It has been unusually cold today wind from the north. Thermometer 60 to 61 - sometimes.

Mrs. Chamberlain was called up about 3 o'ck this morning to go to Mr. Rogers; but Mrs. R. had not been confined, and those acquainted with such subjects think it may be delayed some time.

Saturday Decr. 26. The Schooner Clarion arrived last night for Waialuku & the Paalua this morning from Lahaina. The Clarion brought about one ton of sugar & twenty eight barrels of molasses for Mr. Armstrong.

Mr. Armstrong returned this evening by the way of Ewa, from his excursion of visiting the remote places of this island.

Sabbath Decr. 27. It was mentioned that Friday which is the first day of the New year will be observed as a day of Thanksgiving and that an exercise will take place at 11 o'ck in which natives will be expected to take a part.

At the Chapel in the evening there was a service. Mr. Johnstone read a sermon.

Friday January 1st 1841. The families of this station united in observing this day as a day of Thanksgiving and the natives of the Church & Congregation were encouraged to do the same.

The sky was mild & clear

The sun's last penciled ray

Was steaming in the wester sky

And the clouds were bright & gay

That is an end to my poetry for there is none in my head however much there may be of it in my heart.

At Three o'ck the brethren & sisters & their children assembled at this house having previously made provision for the entertainment & sent in their contributions - which were liberally spread out on two tables extended lengthwise of our middle room. Around these tables the families seated themselves - none being absent, but Mr. & Mrs. Cooke, who were necessarily detained in consequence of an entertainment

made by them for Kekuanaoa & the scholars of the school. Mrs. Cooke however came in before the close of our interview. The season was a pleasant one - much harmony of feeling seemed to exist - After thanks and the removal of the tables - Two hymns were sung, remarks made & a prayer offered by Mr. Armstrong.

Saturday Jany 2. The Barque Columbia arrived from Columbia river & letters have been recd. from the brethren & others The mission of the Board is not represented as in a prosperous state. There is an unhappy difference among some of the brethren and it is feared it will lead to the breaking up of the mission.

Wednesday Jany 6th 1841. A protracted meeting commenced at this place - Mr. Smith uniting in it, his congregation assembled with this. Mr. S. preached in the morning and Mr. Armstrong in the afternoon.

The weather is uncomfortable - strong wind and occasional showers, but notwithstanding this the attendance was good - the congregation amounting to, as was supposed, about 3,000. The number that were converted on the day of pentecost. The attention of the people to the preached word was good.

We hear from Lahaina that some of the church members of our church there have been drinking. They were tempted probably by the King's feast - The names of some were mentioned - Auhea, Kekauonohi, Keliiahonui & Paki.

Thursday Jany 7. Last evening just as Mrs. C. was going to bed she was called for by Mr. Rogers. She obeyed the summons. Before 3 o'ck A.M. she returned & reported the birth of a son to Mrs. R.

Friday Jany 8th 1841. Mr. Bishop arrived from Ewa to assist in the protracted meeting in progress. A few cases of awakening.

A prayer meeting this evening at the house of Mr. Castle.

Mr. Geiger came this evening to board with us. He is accommodated in the house in the yard.

Sabbath Jany 10. Mr. Smith preached to the 1st Cong. this morning & Mr. Armstrong in the 2nd. The wind has been strong from the North and the day uncomfortable. Close of pule hoomau.

The Harlequin sailed this morning for Manilla.

Monday Jany 11th. The thermometer stood at 56 degrees this morning - 3 degrees lower than I have even noticed at this place. It may have been lower during the time I have been here (nearly 13 years) but I have not taken account of it.

Mr. Armstrong left towards evening in the Schr. Hooikaika for Maui. He expects to be absent about a fortnight.

Tuesday Jany 12. This morning the Thermo. stood at 56 degrees in the air as it did yesterday morning.

Mr. Geiger who has been instructing the children of this station about 4 mos. closed his school as he is about taking passage to California.

The different families have made him some presents & made up the sum of \$30 in cash which has been presented to him as compensation, besides giving him his board.

Took tea with our children except the youngest at the house of Mr. Ladd in company with Mr. & Mrs. Hall. Mr. Ladd occupies the house vacated by Mr. Diell belonging to the Seamen's Friend Socy. - adjoining these premises Mr. Ladd has a lot leased for 25 years of the govt. \$25 pr. year - which he has laid out in plats for cultivation & grass with walks & a row of trees within the wall all around the premises.

The natives with the assistance of Antone the Portugese Mason have been raising the wall at the N.W. corner to the full height and placing the topmost stone.

Thursday Jany 14th 1841.

The Brig Thomas Perkins sailed for California - Mr. Geiger took passage in her. He hopes to obtain land of the government, in which case it is his purpose to settle on the coast.

This evening took tea at the house of Mr. & Mrs. Cooke - with Mr. Peck. Mrs. Chamberlain not being well did not go.

Saturday Jany. 16th 1841. The Barque Vancouver, Cap. Duncan, sailed for London. She belongs to the H.H. Bay Co. and has a valuable cargo of skins on board.

Sabbath Jan. 17. The services this mornng. in the native church were conducted by John Ii - He addressed the cong. in a very acceptable manner - from the words "Escape for thy life". Gen. 19:17. In the afternoon, Mr. Knapp addressed the cong. from the words, "Cease to do evil, learn to do well." The exercises both parts of the day were creditable to those who conducted them and calculated with a divine blessing to do good to the congregation & in the absence of the pastor were a desirable substitute for his labors.

In attending my Sabbath School I was informed that a female was present who had once been connected with the Catholics but has now forsaken them. The number of Scholars is upwards of 500, principally adults.

Thursday Jany 21st. It is just one year to day since my illness commenced. I have been twice during the year quite low - the last of Feby. and the last of September. My illness in September was the most serious of anything I have experienced since I was in the 22nd year of my age. I am now about as comfortable as I have been any time during the year. I think I feel that it is of the Lord's mercies that I still live and that I

am able to keep about. I desire to give God the entire praise.

Mrs. Hooper & Mrs. Dominis have spent most of the day with us. They came by invitation before dinner & stopped till after tea. Mr. Peck took tea with us and attended the ladies home.

Friday January 22nd 1841. It has been sometime a subject of inquiry with Mrs. Chamberlain what her duty is in respect to assuming the charge of Mary Castle. The health of Mrs. Castle is declining and she has become too feeble to have the care of her little daughter and she is desirous to make that disposition of her which shall give relief to her own mind and place her daughter in circumstances to receive proper attention when she shall be no more - an event she regards as not far distant.

Mrs. Chamberlain has expressed her willingness to assume the charge of the child, should it not appear that some other of the families of this station could take this care more conveniently & with greater propriety & the prospect of doing better by the child. The subject was referred to Mrs. Smith & Mrs. Chamberlain and this morning they had a consultation on the subject and it was decided that Mrs. C. should take the child. She will not at present remain permanently with us, but will spend the day or part of the day here and go to be with her parents at night. This is more agreeable to them than to have her entirely separated.

Saturday Jan. 23rd. 1841. By the Kahalaia which arrived from Hilo by the way of Lahaina letters have been received from Dr. Judd and others by which we have learned that Com. Wilkes and his scientific corps had ascended Maunaloa and had accomplished their observations there, and it was supposed had descended the mountain as far as Kiluaea, where they would remain about a week to investigate the objects in the vicinity of the great crater and make observations.

Mr. Brinsmade came passenger from Hilo and Mr. Armstrong from Lahaina.

Mr. Locke who came up from Waialua a week ago in order to wait for the Pilot to take passage to Kauai, returned to day to his station as the Pilot which arrived last evening from Kauai instead of returning as was expected sailed this afternoon for Maui.

Tuesday Jan. 26th 1841. I am making arrangements this morning to ride round the island by the way of Ewa. I have obtained a mule of Mr. Armstrong & Nalinu will accompany me.

Monday Feby 1st 1841. I returned this evening from a journey around this island, having rode from Kaneohe to day and being much fatigued. On the day I started I reached Ewa - about half past 4 o'clock P.M. Spent the night with Mr. Bishop. Next day about 1 o'clock P.M. I reached Waialua, - found Mr. Emerson absent having gone to Koolau to preach & perform other missionary labor. I stopped one night with Mr.

Locke - Thursday night Mr. Emerson returned and I lodged at his house that night. Next morning being Friday I set out on my journey & reached Haula where I spent the night - Next day I pursued my way through the division of Koolau and at 4 o'clock P.M. reached Kaneohe. Was very hospitably entertained by Mrs. Parker, and spent the Sabbath. About 8 o'clock this morning I started to return by the way of the east end of the island.

Friday February 5th. Mrs. Judd has received intelligence from her husband and learns that he had narrowly escaped destruction from heated lava. He had descended a fissure or an opening to obtain some fresh specimens and lava in a heated state, when suddenly the steam became insufferably hot & the liquid lava began to ascend in the opening - He called to his native for assistance but the heat was so great that he fled: but was induced by the cries & intreaties of the doctor to return, & thus he was rescued, but not without having been some burned in his face. At one time the Dr. gave himself up as lost, without hope of being saved.

Monday Feby 8th 1841. The foreigners are making heavy complaints for being stopped on the Sabbath in riding out; and also on account of milk men being stopped, in consequence of which the community have not been able to get their milk as usual. Some individuals were called to account a week ago, for having rode the day previous - the reasons in most cases assigned, were regarded satisfactory, & no fines were imposed.

Mr. Dudoit complains of having been insulted yesterday by different constables on his way to and from his country seat in Nuuanu - the ground of the insult was his riding on the Sabbath day. He complains too of his milk man having been stopped.

The movements of the Govt. are in consequence of the laws recently published. It is probably that in some cases the officers have exceeded the design of the laws, which was only to prevent outrage & the disturbance of the peace: - and have complained to the governor of persons who were quietly pursuing their way on some necessary employment.

Wednesday Feby 10th. Sent a number of cattle to Waialua by the hand of two natives, and have ordered them to bring back three fresh cows & their calves.

Wind from the westward accompanied with some rain both yesterday & to day.

Learn that Dudoit is calling frequently these days upon the Govr. - and complains loudly of the school laws their bearing upon Catholics & he is joined by the Engl. Consul - and he threatens hiring a vessel at the expense of this govt. to send for a ship of War!! to redress the violation of Treaty.

Thursday Feb.y 11th 1841. The cattle which were driven away yesterday to go to Waialua have returned. The natives had proceeded with them as far as Ewa, where they stopped for the night. The cattle not being yarded got away and came towards home. They were found this morning & driven back to Honolulu.

The wind has been strong from the west & accompanied with showers of rain.

Monday Feb:y 15. The natives started again with the cattle for Waialua.

Tuesday 16th. The Governor is about issuing a notice to inform the foreign residents that he purposes to commence next week a work for the government upon a road commencing at the creek - and making known that he will allow to each foreigner a cook and steward exempted from the public work; but that 25 cents per day will be exacted from each such cook & stwerd as a commutation for the work on the road. Moreover all the carriers of grass & the milk men will be required to carry their burdens and to supply their customers early in the morning that this class of men may not be interrupted in their work on the roads. The hours of work are from morning till 3 o'ck P.M.

This notice I understand occasions some uneasiness to the foreign residents. They complain of the tax upon their domestics; But their complainings show their unreasonableness: the road is principally for the benefit of those foreigners who have dwellings or possessions in Nuuanu, and the work is to be commenced principally through their solicitations, and now the chiefs are about to take it up they complain because they will suffer some slight inconvenience from the tax laid upon their stewards & cooks &c.

Thursday Feb.y 18 1841. The natives returned from Waialua with three cows and their calves. They were assigned as follows: viz. - to Mrs. Judd - Smith & Knapp. one of them had been milked by Mr. Judd before.

Friday 19th. Notice having been given to the brethren of the station to meet this evening to converse on the subject of dividing the herd - the following brethren met at the house of Mr. Hall. Viz. Messrs. Armstrong, Smith, Hall, Knapp, Cook, Rogers & Chamberlain.

The following resolution was offered by Mr. Chamberlain:

Voted that the cows & female calves of the mission herd of the Station of Honolulu be apportioned to the different families in proportion to the wants of each; it being understood that the original animals, together with the increase as it may arise, are the property of the Board; and that while the female calves shall be assigned in the same manner as their mothers, except in cases where there is a disproportion of milch cows among the families, the males shall be at the direction of the secular department of the mission,

and may be disposed of at discretion for defraying the expenses of the herd.

After some discussion it was motioned and carried that the words, "Except in cases where there is a disproportion of milch cows among the families," be stricken out.

The following addition was proposed by Mr. Armstrong: "Understanding however that a portion of the males may be so disposed of as to furnish a competent supply of milch cows to any family that may be deficient"; which was carried.

The Resolution as a whole was adopted and left with Mr. Chamberlain to re-write & correct to express the intentions of the brethren.

And it is corrected as follows:

RESOLVED that the cows and female calves of the mission herd of the station at Honolulu, be apportioned to the different families in proportion to the wants of each; it being understood that the original animals together with the increase as it may arise, are the property of the Board; and that while the designation of the female calves shall be the same as that of the mothers, the male calves shall be at the direction of the secular department of the mission, and may be disposed of at discretion for defraying the expenses of the herd; * (*or such a portion of the proceeds as may be necessary may be employed to furnish a competent supply of milch cows to any family that may be deficient.)

Appointed Dr. Judd & Mr. Hall to make the division recommended in the above resolution.

Saturday February 20 1841. The Trades have set in today after a suspension of about a fortnight. The health of Mrs. Castle has materially declined during the few past weeks - She has generally been able to ride out twice a day, within a few days however it has been with less comfort, and this day she has not been able to ride at all; and it is her impression that she will not be able to ride again. She has a number of times when riding out said that her days were almost ended & that she should be able to ride out but a few times more. As she anticipates a speedy removal to a better world, she invited the children of the families to call upon her this morning, in order that she might distribute among them some small tokens of remembrance. She gave every little child something addressing some words of advice & affectionate counsel.

I called upon her this afternoon and found her very feeble, but in a pleasant frame of mind.

Sabbath Feb. 21. For the first time for many months I attended English service at the Chapel - I rode in the waggon with Mr. Castle & Mary & Levi. Mr. Brinsmade read church service and a sermon.

Monday Feb. 22. Mr. Bishop came up from Ewa & staid with us.

Tuesday Feb. 23. The natives are all turning out to work on roads and other works for the government. I

understand they are to work three days a week for four weeks.

An arrival this mornng. of an Eng. Brig.

Towards evening the Schr. Kahalaia arrived from the windward with Dr. Judd. He was last from Lahaina. Three of the Scientific Corps from the Vincennes accompanied him from Hilo to Maui. They remain there to make observations until the Vincennes arrived from Hilo which will perhaps be in a fortnight.

The Eng. Brig is from Liverpool by the way of Valparaiso, whence she has made a passage in 39 days, and brings information of the U.S. Sloop of War St. Louis - as having left Valparaiso in comp.y bound for these islands by the way of the Marquesas.

We learn that Mr. Skinner is disposed to resist the measure of the govt. in calling out the people to perform govt. work - So far at least as his own domestics are concerned. He refuses to give them up, and drove out of his yard the officer of govt. who went to call them to the work.

Wednesday Feb. 24 1841. Great numbers of the laboring men of Waikiki, & Maunalua have passed to day carrying stones for the work at the creek. It seems to be a great waste of human strength and of time for such numbers to be employed a whole day in making two trips from Waikiki & back for stone - each man carrying only one perhaps on an average not larger than a mans head.

Friday Feb. 26 1841. This afternoon the ship Morea arrived 143 days from New York. I had letters from Mr. Hill & the mission a short letter from Mr. Anderson. I also recd. a letter from W.F. - and one from my bro. Wm. - it gave the very pleasing notice of his having made a profession of religion.

We have no supplies by this vessel; but one is expected to sail from Boston about the 1st of Novr. which is to bring about 100 tons of supplies and two ordained missionaries for this mission and several for Oregon.

Saturday Feb. 27. A messenger arrived from Waialua with express design to inform us of the illness of Mr. Emerson & to request the presence of a physician. They had not heard of the return of Dr. Judd - but Dr. J. started in the course of the forenoon.

Mrs. Castle is very low and will probably continue but a short time - most of the brethren & sisters have been taking their leave of her. She is in a quiet and pleasing state of mind.

Monday March 1st 1841. Monthly Concert as usual attended at the residence of Mr. Armstrong. Mr. A. read a letter from a clerical friend in the U. States, which communicated views differing from those generally entertained respecting the millennium. These views are that Christ will in due time appear in person and rule as a temporal & was as spiritual prince - the time will then have arrived when the saints

shall possess the Kingdom. He did not pretend, very wisely, to fix on the time of the Saviors coming, but thinks this view of the subject will remove many difficulties attendant on the other system - in which Christ's Kingdom on earth is represented as a spiritual Kingdom only.

A protracted meeting will commence this week at Ewa.

Mr. Emerson remained quite unwell when Dr. Judd left him. The state of things in his church is improving - many who have gone out of the way seem to be returning - and are enquiring how they may get back.

This night Mrs. Chamberlain has been invited to watch with Mrs. Castle. She is failing fast and needs some one to be constantly with her. Her mind is graciously sustained.

Tuesday March 2nd 1841. Mrs. Hooper took tea with us this evening. She will watch with Mrs. Castle tonight.

Wednesday 3rd. As Mrs. Armstrong watches tonight with Mrs. C. we had not the assistance of Mr. Armstrong at our weekly meeting. Mr. Brinsmade was invited to take direction of the exercises.

Thursday, March 4th. Mrs. Chamberlain is to watch again with Mrs. Castle, who is sinking rapidly. We are all called upon to watch and pray. But Sister Castle's watching is almost over - it is with her almost dawn of day. The bright and morning star seems to be rising in her horizon. Her soul will not long be imprisoned in a dark and sickly frame: it will not long groan in its earthly tabernacle being burdened. She has been long a great sufferer & for several days her sufferings have been intense; but she has bourn them with entire Christian resignation. Life seems to dispute every inch of encroachment of disease, but the stern foe will not relinquish a step of the advance he has made, and the wearied & exhausted energies must soon give up to superior power. But the victim will, we trust, be able to say with triumph, "Tho. after my skin, worms destroy this body, yet in my flesh shall I see God; whom I shall see for myself and not another." "O death, where is thy sting! O grave, where is thy victory!"

This morning Mrs. C. had a sinking turn and it was thought she was dying. Mary who was at our house was sent for, and she was taken over. Her mother was able to take notice of her and to give a parting kiss.

Dr. Judd went again to Waiialua to visit Mr. Emerson. It had been proposed that Mr. Hall should accompany him to assist in designating the cow & females of the herd and assigning to each family an equable proportion, but owing to the change in Mrs. Castle it was concluded he should remain.

Friday March 5th 1841. Mrs. Chamberlain remained with Mrs. Castle till about half past two o'clock this morning when she bade her an affectionate adieu and returned home to get some rest. About six o'clock

we had notice that Mrs. C. was dying. We went over immediately and found her gasping, her husband standing over her enquiring the state of her mind & whether she recognized him. She said - My husband - and to the inquiry whether she found the Savior precious - She replied - precious - precious. — Her breathing became more & more labored - the tired powers of nature were exhausted and at quarter past six o'clock she ceased to breathe. Her happy soul was liberated and we could only say, Blessed are the dead that die in the Lord from hence forth, yea sayth the Spirit, They rest from their labors and their works do follow them.: We all kneeled and Mr. Armstrong offered a prayer.

A vessel sailed for Maui & Hawaii by which notice was communicated.

The Pilot returned from Kauai and sailed again towards evening. An answer to the letter requesting the return of Miss Smith was recd. Mr. Alexander does not consent to her coming.

Saturday March 6th 1841. The funeral of Sister Castle took place this afternoon. Notice was communicated to the foreign residents that it would occur at 3 o'ck and their attendance was solicited. A few only attended owing probably to the claims of business. A procession was formed at the residence of Mr. Castle and proceeded to the makai school house, where Mr. Armstrong delivered a sermon from the words: "Weep ye not for the dead neither bemoan him." Jer. 22:10.

After the close of the exercises the remains were followed to the grave. And the precious relics consigned to the house appointed for all living. The hymn was read at the grave beginning with the words, - "Unveil thy bosom faithful tomb." &c.

Sabbath March 7th 1841. Monday March 8th. Consul Charlton and the supercargo of an Eng. Brig. now in port were called up before the Governor for an assault on Mr. Jarves on Saturday night last. The cause of the assault was the publishing in the Polynesian a correspondence between some British subjects, the Eng. Consul & the Governor in relation to a late act of the govt. - which gave great offense to the Eng. Consul.

He first called upon the Govr. to enquire of him by whose authority this correspondence had been printed. The Govr. informed him that it was published by his own authority. He - the Consul - then went

to the house of Mr. Jarves attended by the Supercargo of the Brig - and called Mr. Jarves to the door & began to make inquiry, and used abusive language; - Mr. Jarves replied that considering the source whence this abuse came he should not regard it - Charlton then drew a whip and laid it over Mr. J's shoulders - Mr. Marshall who was in the house made a sally & threw Charlton down with whom he had a squabble both upon the ground; the other attacked Mr. Jarves and he in the mean time laid a cane over the shoulders of his antagonist - and the tussel became rather warm but our two friends got rather the advantage. Some of the neighbors coming in & Charlton having become disengaged made his escape, leaving his hat & whip which were afterwards carried off by the Supercargo. The affray produced considerable excitement, and a representation having been made to the govr. the case was tried before him to day & the two persons fined six dollars each; and they without complaining paid their fines, taking a receipt of the Govr. for the sum paid. - But Charlton threatens a prosecution & swears vengeance for the injury he has received, having received a pretty severe blow upon the hip & had one of his fingers broken. The investigation of the case called together a large concourse of foreigners and the Govr. conducted the assize in a manner creditable to him.

As soon as it was understood that those who had joined the Catholics would be required to work for the support of teachers, then those who felt no interest in the subject of instruction declared themselves to be of the Catholic party: and the same was true of people residing at Ewa.

This afternoon there was quite an assemblage in our neighborhood to witness a feat of a native physician in healing a sick woman, the wife Naiwi a brother of Kaina and captain of the Schr. Paalua. It was the most glaring act of superstitious infatuation I ever witnessed. The native physician professed to be able to heal the sick woman by entrancing the husband and while he lay in a state of insensibility the woman would by the power he possessed of healing diseases be quite restored. It was really amusing to see the numbers that assembled to witness this feat. A bed was spread in front of the door upon which the man was to be laid to be entranced and the sick woman, who was unable to sit up, was placed directly in the door way within the house. And the whole ceremony was to be a public exhibition. Several majestates were present - Naiwi stated what the physician professed to be able to do, and that if he succeeded to restore his wife he was to reward him with the sum of twenty five dollars. All things being ready the physician commenced operations. He displayed a box containing about half a dozen small block, and another containing two or three bottles of water. He shuffled the blocks a moment as though he was making some calculations & then took a bottle containing water & instead of taking out the cork he struck

it against a chair & severed the neck from the body & poured part of the contents upon the ground and wetted his hands. He then shuffled the blocks again & putting some more water on his hands advanced to the man who was sitting upon the bed and extended him upon it his full length placing one hand upon his stomach and with the other put some water upon his head and then drew his hand leisurly from his chin to his forehead pressing his mouth and nose. This was the final act of the charm in the case of the man, who gave sufficient signs of life to apprise all present that he was neither entranced nor dead. The woman was next to be operated upon - Water was applied to her, and further ceremony practiced (performed): but all without effect to raise her up. Finding she did not rise & that she was insensible to the power of his art, he declared she was not sick. Dr. Judd was present and carfully witnessed all his movements - and said, Not Sick? Look at her how pale and emaciated how feeble & powerless and not sick! It was time now for the majestrates to interpose and they lead him off to the for there to answer for his deception.

Our passage to Hilo occupied 8 days the passengers were Mrs. Johnstone, Mr. Calkins, Newton Ladd & Mr. Moore & native wife.

I remained at Hilo till Monday evening Aug. 30, when I embarked in Schr. Hawaii for Kohala, it being my purpose to visit that station, in order to forward the business of Mr. Bliss' removal, in pursuance of the decision of the Gen. Meeting. I made an arrangement with Mr. Pitman who was at Hilo to land me at Kohala & to send the vessel after her arrival at Honolulu to convey me & Mr. Bliss to Honolulu.

I arrived at Mahukona Tuesday afternoon - and started for Ioli, the mission station, the same evening on foot, but after walking half way, I became much exhausted, and stopped for the night at the house of a

native. In the morning I sent to Mr. Bliss for a horse, and between 9 & 10 o'ck I arrived at the station. Mr. Bliss began the same day to make arrangements to leave. On Monday Sep. 6th Mr. Bliss began to send his effects to Mahukona - a distance of 7 or 8 miles and was occupied till Wednesday, when about all his baggage was removed except what he wished to retain until the arrival of the vessel.

On Friday Sep. 10th I recd. letters from Honolulu brought by Schr. Hawaii wh. had gone to Kelakekua with Mrs. Paris & family accompanied by Mr. Hall who wrote to me from Kealakekua stating that the vessel was going on to Kau and when it had discharged his freight & Messrs. Forbes & Paris it would come to Mahukona, & he hoped to be there on Friday evening.

Saturday 11th. About half past one o'ck Mr. Hall arrived and apprised us that the vessel had come. He was desirous that Mr. Bliss should pack up the remaind of his effects and start immediately, being confident he said that we could get off that evening! but Mr. B. said he could not get ready and must wait till Monday. It was therefore decided to stop at Ioli till after the Sabbath.

On Monday about half past 8 o'ck I set out for Mahukona in an old four wheeled one horse wagon drawn by 6 natives & reached the landing at 1/2 pst. 11 o'ck and about 1 o'ck we got under way.

We had a good breeze till dark when we were not far from Kahoolawe - Did not have much wind during the night and on Tuesday morning we were off the western part of Lanai - We had scarcely no wind all this day and all the night following; but still we made some progress so that on Wednesday morning at sun rise we were off Diamond hill, but the wind being very light we did not get into the harbor and alongside of Robinson's wharf till 10 o'ck A.M.

The effects of Mr. Bliss were landed as fast as possible, and the effects of Mr. Conde & Mr. Rice we put on board and just about sun down the vessel was off again with Messrs. Conde & Rice & their families.

I found Mrs. Chamberlain ill - She had been sick about 10 days but was getting better.

Mr. Bliss & family were invited to the house of Mr. Smith.

Friday Sep. 24 1841. Mr. Castle, being desirous to make some inquiries of the chiefs respecting their treatment of the Catholics in order that he might know how to reply to charges made by them against the chiefs, he called upon them in company with Mr. Armstrong & myself. We met Kekuanaoa in the new house of native structure built for the King. He had called together such of the natives as he supposed would know what treatment they had received. The catholics who adhered to their system were prosecuted - this he did not deny - the ground of their being treated as criminals was not their being Catholics - they were prosecuted on the ground of their being idolaters, because those persons employed images in their

worship; and they regarded it as a new system of idolatry and as opposed to government, and in this they acted in accordance with established custom: for in old times when any one departed from the established religion - which was of course an establishment of idolatry & set up a new idol in opposition to government he was dealt with as a criminal: for in such way was rebellion promoted. This was the ground of the treatment, - as to the treatment it was of the kind inflicted on all criminals its severity was no greater - they denied most of the charges - and altogether the severity of the punishments alledged to have been inflicted.

Saturday Sep. 25 1841. The vacant house opposite Mr. Knapps in which was stored some goods of Mr. Wilcox & Mr. Bliss was discovered this morning to have been entered by some thief, and various articles stolen belonging to Mr. Wilcox.

Friday October 1st 1841. Mr. Armstrong's son Samuel in playing this afternoon upon a low dobie fence fell & fractured his arm. On examination Dr. Judd found that the bone was not broken entirely off, but was bent so as to have produced a perceptible curviture of the bone which to straighten occasioned as much pain and required the same kind of bandaging as tho. the bone had been broken. Mr. Armstrong was absent at Kaneohe assisting Mr. Parker in a protracted meeting. He was sent for & returned in the evening.

Wednesday Octr. 6 1841. An Eng. Sloop of War the Curacoa Capt. Jones arrived to day from Valparaiso by the way of the Soc. Islands. She is last from Kealakekua where she stopped about 10 days. Mr. Munn came passenger from Kealakekua. The vessel brings word of the existence of the small pox at Tahiti brought there by the Don Quixote. It is said she is bound hence to Monterey to call the government to account for their ill treatment of British subjects in April 1840.

Mr. Rogers & family sailed for Lahaina in the schooner Hawaii. He goes on account of the illness of his youngest child & expects to be absent about one month.

The gable ends of the meeting house are nearly completed and it is expected the roof will be raised before long. The carpenters are engaged in framing it.

Thursday Octr. 7th 1841. Some of the brethren made a call on board the Eng. ship of war in the roads. The Cap. had an interview with Kekuanaoa.

Friday Octr. 8th. This afternoon at about 4 o'ck I left the house in company with Mrs. Chamberlain and our three daughters to go down and embark on board the Schr. Kekauluohi bound to Lahaina. The health of Mrs. C. is such as to require the use of some measures for its restoration, & as she has not been off the island for almost 12 years she has thought that a visit to Lahaina might prove serviceable to her, and I

have been unwilling to let her go unattended & so, concluded to accompany her with a view to return in a few days leaving her there.

Thursday October 21st. At about 10 o'ck this morning I arrived from Lahaina in the ship Galen, Cap. Borden, having had a passage of nearly 45 hours. Our passage to Lahaina in the Kekauluohi was made in about 53 hours & was pleasant.

On Wednesday 13 inst. Mrs. C. myself & the children in company with Miss Ogden set out in a double canoe for Maalaea with a view to visit Wailuku, having previously acquainted Mr. Green & requested the means of conveyance to be sent for us for the residue of the way - which is about 7 or 8 miles across the isthmus which separates W. & E. Maui. We arrived at the place of land carriage at 10 o'ck A.M. & found two manele & two horses and a sufficient numbers of carries for Mrs. C. the children & the baggage. In about 3 hours more we arrived at the habitations of the brethren & recd a hearty welcome.

I staid at the station until Saturday morning 18th inst., when in company with Mr. G., after parting with Mrs. C. & the children, I set out for Maalaea & arrived there about 10 o'ck A.M. where I found the canoe from Lahaina in waiting. I stepped on board & in a few minutes I was on my way towards Lahaina, which I reached about 2 o'ck - having come along very leisurely.

On my arrival at Lahaina I found that there had been an arrival from the U.S. The Wm. Gray, arrived at Oahu on the 9th & the letters for me had been sent to Lahaina & I had the pleasure of receiving them.

Monday Octr. 25 1841. This morning we had the satisfaction of receiving a letter from Mr. Hill brought by the brig Joseph Peabody which arrived yesterday from Mazatlan. There were 3 dates June 17 & 28 & July 10 - The two former were of duplicates forwarded by the Lausanne which sailed about the 1st of July for these islands via Valparaiso and contained 2nd of Ex. to two Bills on Ladd & Co. The Joseph Peabody contained dates as late as Aug. 25. The Presidents message containing his veto to the Bill for a National Bank.

went ashore and that she is to be broken up.

We hear from Kauai that the health of Mrs. Whitney is very feeble, and that Mr. W. thinks of coming up with her soon to this place.

Thursday Novr. 4th 1841. We hear that the Gloucester which was very nearly ready for sea & expected to sail early next week was discovered last evening about 9 o'ck to be on fire, which seems to have been contained in some pulu hapu which was put on board yesterday. The alarm was given as soon as the fire was discovered and an engine brought to throw water into the hold, but as the fire seemed to increase the hatches were closed, loose sails thrown over them & upon deck & water continually thrown upon them. This morning the fire was not extinguished tho - the decks had somewhat cooled. In the course of the forenoon the captain & three or four men ventured into the hold with a view to ascertain the state of the fire and they drew out some of the bags of pulu which were found to be on fire. Soon after they came out they became insensible as the effects of the carbonic acid gass generated in the hold. They remained some time in this state.

The hose of an engine was adjusted so as to throw water to the parts of the vessel under the action of fire and by this means it was extinguished. As soon as this was effected the vessel was taken along side of the wharf and the cargo between decks thrown out consisting of a quantity of pulu, fire wood and dry goods. A survey was also had upon the vessel. The lower hold has been opened and the cargo will be taken up so far as there is any appearance of damage. Orders for insurance were sent by the Yorktown.

On the next day they undertook to elevate the first pair but before it was raised to its place it got a cant, & the beam broke under and the whole came down as far as the ropes would allow of it. On Monday of the present week they succeeded in getting up a pair and they have got up a pair every day of this week so far.

Wednesday 10. An examination of the Catholic Schools on this island took place in the yard occupied by their foreign teachers at this place. The number of scholars present was about 700, which Mr. Dudoit says is only part of what are under their instruction - They chanted prayers it is supposed in Latin, pointed to places on the maps in answer to questions, in which they seemed to be expert and answered some questions in Chronology - as to the age when Peter & other primitive Christians lived, and the era of Luther. These interrogations it was thought were designed to make the impression that the Catholic religions is the ancient and true religion whereas that of the Protestant is modern & corrupt. The examination was conducted by Ii, the luna kula, and a number of foreigners were present - Mr. Smith was also present part of the time - Wine & other refreshments were offered the visitors. The Examination was doubtless designed to make an impression.

The last set of rafters to the meeting house were drawn up this evening with shouting. Continued cheers by those on the wall and those in the body of the house.

The California in attempting to enter the harbor this morning was struck by a squall when near the passage and was carried upon the coral reef which constitutes what is called the middle ground and fastened upon it; she pressed sail in hopes of driving off, but did not succeed. She lay all day the wind blowing a gale off shore. Owing to the strong wind off shore then there was very little surff, and none at all in the middle ground. In consequence of which the vessel lay comparatively easy, but it was a gloomy sight to see the

noble vessel lying fast and careening upon her larboard side exhibiting an appearance of distress. Many boats were employed to afford every assistance that could be rendered. The Governor was off with a double canoe & men. In the course of the afternoon the Joseph Peabody went out and anchored near by and a haultzer was taken on board. The sun went down, and she was still fast on the rocks. The wind blew strong during the night.

Mr. W. had journeyed to Hilo yet the Schr. had not arrived and as she was leaky & the weather inclement it was feared she had gone to the bottom. It proved that she reached Hilo safely after a months absence from this place.

Saturday Jan. 22. There is a report to day that a canoe from Molokai has been lost and 8 persons drowned.

Sabbath Jan. 23. Mr. Armstrong read a letter to the native congregation from Mr. Parker giving an account of 11 natives being lost coming from Molokai to this island the same event noticed in the above note. It seems that on Saturday the 15th inst. four canoes started from Kalaupapa having in them 9 men & 4 women. That having proceeded on their way to the middle of the passage they were overtaken with a strong wind & turbulent sea - the canoes were upset - the natives of one of the canoes succeeded in loosening the iama with a view of righting it, but the sea was so bad they did not effect it. Two men and one woman attached themselves to the iama - on which they floated endeavoring to direct their way to this island - one of the men fell off - the woman seized him by the hair & drew him up - She lomai'd him - he pretty soon became chilled again - she honi'd him & he fell off & was drowned - the other man stuck longer but by & by he became chilly & stiff & fell off and disappeared - the woman forsook the iama and swum - she continued her course toward this island all night & on Sabbath morning she arrived somewhere near the east end of this island. - One man in a small canoe after having been upset three times succeed in getting same to land. Thus eleven persons were lost.

Mr. Armstrong improved this event and the death of Hoapiliwahine to impress on the cong. the importance of being ready for death. This text was - Let me die the death of the righteous, and let my last end be like his.

Saturday 12. Our letters by the Joseph Peabody came to hand this morning. Mr. Bingham's letter is dated New York Octr. 23 1841. He says. "The cause of the Sandwich Island Mission has a strong hold on the affections of the friends of Christ in the U.S." He complains however of the apathy prevailing in regard to the general subject of foreign missions. And the following remark seems to imply that the Board are deeply in debt. — "The American Board prostrate and weeping before God from the apprehension that the churches, and the friends of Christianity would not freely pay \$57,000 for services rendered to the heathen and give this year 250,000 more to go on and increase the work a little! It is amazing beyond

measure! "The Synod of New York & New Jersey have passed a resolution pledging themselves to comply with the request of the Board to raise their subscription 25 pr. ct. on the last year."

"In the Gen. association of Masstts. nearly the same measure was carried through from a similar source."

"I have at length presented the claims of the church at Honolulu to a few select friends of the cause in this city & Brooklyn showing them a lithographic view of the building as published by Mr. Olmsted and I have easily raised \$1500 which will soon be remitted by Mr. Hill: and I think I can quickly double it, if necessary in order to complete the building according to plan."

"My health has been much improved though the long seated derangement of the liver is not fully removed. The dropsical symptoms and cough in Mrs. Bingham's case have been much relieved tho. her unceasing solicitude for her children who are not yet provided for remains, and prevents the restoration hoped for." —

"I have just heard that a vessel is expected to sail from Boston for the islands about the 1st of Decr. next. Another from this city, Cap. Spring for the Oregon via Sand. Islands to leave here in January. Mrs. Thurston has spoken of going with him with her younger children. She left this city in good health a short time since to visit her friends in Mass. Thomas has had his shoulder bone broken but was recovering.

"Mr. Damon & his lady for the Bethel Ch. expect to sail from Boston the 1st of Decr.

"Whether we shall be sent in December of Jan. or next year, is yet all uncertain. - We should not stop on acct. of friends if our health were sufficiently restored to commence the work anew at the islands."

Thursday July 21st. The new Stone Church was dedicated this afternoon. Messrs. Armstrong, Bishop & Smith officiated on the occasion.

The congregation was seated in order principally on settees of their own manufacture. The people were all dressed in a very decent manner and many of them richly & gaily. The King, Auhea, Gov. Adams Kekauonohi & Paki - Kekuanaoa, Kanaina & other chiefs of the second order with the young chiefs of Mr. Cooke's school were present dressed in their fine clothing. The King was attended to the house by his armed body guards & martial music.

At the proper time the King walked from his seat and took his stand a little raised in front of the pulpit holding in his hand a document of the nature of a Deed of Dedication giving the house to God for his worship and making over the property for the use of the church & congregation for purposes specified in the Deed of Dedication, to extend to the end of time. The address of the King was short, he began by remarking the object for which he rose and stating the nature of the document he held in his hand, which he should not read, but merely state the substance of. This he did clearly and fully confirmed the cession of the property & possession to the church & cong. worshipping according to the faith set forth in the document, to such and to no other. The cession he fully made for himself and heirs forever.

When he had handed the document to Mr. A. & returned to his seat, Mr. Armstrong arose and made some statements in regard to the amount of money expended & length of time employed in the construction of the building - And enquired of the different apana the object for which they had taken a part in the erection of the edifice and their wish in respect to it now; to which each successive apana made reply. That they had built it for the Lord and that to him they wished it to be consecrated - to be his for his worship to the end of time.

This ceremony was followed by the consecrating pray by Mr. Smith.

The sermon was preached by Mr. Armstrong from Genesis 28:17.

After the services the brethren and sisters by invitation of Mrs. Chamberlain assembled at our house to partake of a social entertainment. The King, Kekauluohi, Gov. Adams, Kekuanaoa, Kanaina and eight of the young chiefs of Mr. Cooke's school were also of the guests.
