Our team of safety experts can partner with you to evaluate the safety of your facility and to perform over a dozen services, including Respirator Fit Testing and Logout Tagout. To learn more or to request a safety service, simply scan the adjacent QR code.

MSA
The Safety Company

ALTAIR® 4XR MULTIGAS DETECTOR
Outfitted With Rapid-Response MSA XCell® Sensors • Backed By A 4-Year Warranty

Rugged
- Survives 25 drops from 4 feet (1.2 meters) (MIL-STD-810G 516.6 Transit Drop 3rd Party Certified).
- Can survive an incidental 25-foot (7.5-m) drop onto concrete.
- Operating temperature range: -40°F to +140°F (-40°C to +60°C)
- 4-year instrument & sensor warranty.

Reliable
- Sense gas 2 times faster with our XCell® sensors.
- Confirm compliance quickly with the Bump LED & on-screen check mark.
- Bump and calibrate with 1/2 the test gas and in 1/2 the time vs. industry average.
- Bump and calibrate at a specified "Time of Day" with your MSA GALAXY® GX2 Automated Test System.
- MotionAlert option tells others that user has become immobile.
- User-activated InstantAlert notifies others of a potentially dangerous situation.

MSA
The Safety Company

ALTAIR® 5X MULTIGAS DETECTOR
Measures Up To 6 Gases Including Natural Gas • Now Available With A PID Detector

MFR #10165445

- The ALTAIR 5X Gas Detector is capable of measuring up to 6 gases simultaneously and is now available with integrated PID sensor for VOC detection. Driven by advanced MSA XCell® Sensor Technology, the ALTAIR 5X Gas Detector delivers faster response time, better stability, accuracy, longer service life, and cost savings.
- Detects combustible gases in LEL and/or volume percentage range, oxygen, carbon monoxide, carbon dioxide, hydrogen sulfide, sulfur dioxide, ammonia, chlorine, VOCs, and many others depending upon sensor configuration.
- Rugged overmolded polycarbonate housing provides unsurpassed durability, including ability to survive 10-ft. (3m) drop; IP65-certified.
- Field-proven integral pump provides consistent gas flow, eliminating concerns of externally-attached components.
- High performance XCell Sensors last longer: typical life greater than 4 years for combustible, O2, CO/H2S, SO2, CO/NO2 and CO (high concentration) sensors; typical life greater than 3 years for NH3 and Cl2 sensors

- Most sensor response and clear times <15 seconds.
- Less calibration gas used: requires about half of test gas typically used for calibration and bump tests
- Rapid bump test gives results in less than 10 seconds for most common sensor configurations.
- Span calibration time of 60 seconds for most common sensor configurations.
- MotionAlert feature option tells others that user has become immobile.
- InstantAlert feature provides manual alarm to alert others as to a potentially hazardous situation.
- PID option allows for accurate, reliable VOC response with programmable reference factors.
- Large buttons and bright display provide easy operation, even when users wear gloves.
- Exclusive end-of-sensor warning cautions users when unit's sensor nears end-of-life.
- Versatile MSA Link™ Software allows users to transmit data to a computer.
- Compatible with GALAXY® GX2 Test System.

GALAXY® GX2 AUTOMATED TEST SYSTEM
Provides Automated Calibration Of MSA ALTAIR® Gas Detector Fleet

- Provides simple, intelligent testing and calibration of ALTAIR 2X Single-Gas Detectors and ALTAIR® 4XR and ALTAIR® 5X Multigas Detectors.
- Easy-to-use automated test stand offers high performance as either stand-alone unit or integrated portable detector management system, enabling total data access and control of the MSA ALTAIR family Gas Detector fleet.
- Color touch screen for ease of setup and viewing
- Extremely simple to use; testing starts automatically without touching a single button.
- Simultaneous testing of up to ten instruments.
- GALAXY GX2 System is optimized for use with MSA's XCell® Sensors; provides up to 50% cost of ownership reduction.
- At-a-glance indicators include low calibration gas volume, expiration warnings and test stand status.

MSA The Safety Company

REGULATORS
Choose From Gas Miser™ Demand Regulator Or Fixed Flow Regulator

- Regulators are used to ensure you receive the required flow of calibration gas for your application. Based on the cost-efficient design of its diffusion based gas detectors, MSA is able to use 0,25 LPM regulators. This save users' money by delivering calibration test gas at a low rate of 0,25 LPM versus 0,50 LPM which is the market standard.

Gas Miser™ Demand Regulator
- No need to manually open or close a valve or accurate calibration once attached to the calibration cylinder, the Gas Miser™ Regulator is designed for use with pumped instruments and supplies the exact gas flow for the instrument pump.

- No ON/OFF valve is necessary because the regulator automatically turns itself off when not in use, simplifying the test and calibration process and saving calibration gas
- Calibration tubing: polyurethane tubing for use with calibration equipment
- Recommended for pumped instruments.

Fixed Flow Regulator:
- Fixed flow design provides constant and accurate flow to the gas detector.

G1 INDUSTRIAL SCBA

The G1 Industrial SCBA contains many unique design features that reduce stress and fatigue while improving performance and ease of maintenance. The new G1 iRC (industrial remote cylinder connection) version allows for cylinder compatibility among other MSA SCBA such as the G1 NFPA, Airhawk 2 and Firehawk M7.

G1 Facepiece
- Wide field of view for increased visibility.
- Cross-contamination feature prevents exhaled air from entering mask mounted regulator.
- Open-port design provides low breathing resistance, on or off air.

G1 Carrier And Harness Assembly
- Removable soft goods for easy cleaning and maintenance.
- Nanosphere coated shoulder straps improve resistance to water and chemical exposure.
- Shoulder pad placement reduces twisting, improving comfort and ease of donning.

OPTREL® PAPR FOR WELDING AND GRINDING
A PAPR Kit With The Latest In Welding Safety

Introducing the Optrel® Helix Pure Air and Clearmaxx Powered Air Purifying Respirators (PAPR). This lightweight PAPR features 3 blower speeds with low flow and low battery alarms. The NIOSH approved type HE/HEPA filter can be easily integrated with prefilters to extend the life of the HE filter. The optional Mountain Breeze system mitigates Nuisance Level odors and ozone. The Helix CLT PAPR welding helmet is a fully integrated slide-up welding helmet with auto-darkening filter (ADF) ranging from shades 4-12. The internal welding visor allows for welding and grinding while maintaining the same low profile for access in wide range of welding conditions and spaces.

- Helix Pure Air fully integrated PAPR welding helmet with auto darkening filter. Integral slide up visor provides two positions for welding and clear view for other work.
- Clearmaxx Air PAPR grinding shield to provide clear, unobstructed view of the workspace, several replacement shields and accessories available.
- e3000X PAPR includes integrated air flow sensor, 3 level airflow adjustment ranging from 170-240 liters per minute available at the touch of a button.
- Up to 14 hours of run time at lowest flow rate, 9 hours at highest flow rate.
- Modular air filtration includes type HE/HEPA master filter with spark guard and optional Mountain Breeze nuisance level odor and ozone filtration.
- Automatic low flow and low battery alarms.
- Space for product copy and/or an application image available.

V-GARD H2™ SAFETY HELMETS
A Complete Line Of Calibration Gas Cylinders To Calibrate All Instruments

MSA The Safety Company

The V-Gard H2 Safety Helmet provides superior comfort and versatility while incorporating the latest technology to help protect against lateral impacts. The optional Mips® brain protection system adds another layer of protection in industrial safety helmets, designed to help reduce the risk of brain trauma by redirecting rotational energies in the event of certain angled impacts.

MFR #10242829

- Quick and easy customization with a wide selection of existing logos, easy creation of new logos, and reflective stripes.
- Integrated headlamp strap clips for easy and secure donning and doffing of lights on the helmet.
- ANSI Z89.1 Type II certification with integrated chinstrap for enhanced protection against lateral impacts.
- Extensive accessory compatibility with nearly all V-Gard H1 and V-Gard accessories for a wide variety of industrial applications and easy integration with existing inventory.
- Comfortable ratchet suspension that's easily adjustable with a gloved hand.

- Antimicrobial sweatband, crown pad, and ratchet pad with Ionic+® high-purity silver to eliminate odor-causing bacteria.
- Optional Mips® system for additional rotational impact protection designed to help reduce the risk of traumatic brain injury.
- Non-vented options for use in electrical applications where Class E certification is needed.
- Optional venting for improved air flow, cooling and reduced heat stress.
