

Startup Ecosystem Overview

A Project by LCG

Purpose

In the past few years, huge amounts of capital have been poured into Pakistan as investors worldwide realize the untapped potential that the markets here entailed. This document attempts to capture a snapshot of the active players in some of these markets, namely **Fintech**, **Healthtech** & **Agritech**.

This snapshot covers a brief description of the startup and its workings. It mentions their founders/CEOs as well as any institutional backers that they might have. Finally, it also contains a summary of their funding rounds and investors, if there are any.

The goal is to provide the readers with an overview of these markets and make them aware of prominent players within them!

Note: We realize that this might be a large document, and perhaps difficult to read through at times. That is why we've linked together every page on this deck to the main overview pages. Just quickly start your journey by clicking on the icons on the right or on the headings of the overview page. Finally, if you'd like to visit the website for any of these companies, just click on the logos of the company pages to be redirected there. We hope this may prove helpful!
