

# CONTENTS IN DETAIL

|  |            |
|--|------------|
| <b>ACKNOWLEDGMENTS</b>                   | <b>xix</b> |
| <b>INTRODUCTION</b>                      | <b>xxi</b> |
| Why PowerShell? .....                    | xxii       |
| Who This Book Is For .....               | xxii       |
| About This Book .....                    | xxii       |
| <b>PART I: FUNDAMENTALS</b>              | <b>1</b>   |
| <b>1</b>                                 |            |
| <b>GETTING STARTED</b>                   | <b>3</b>   |
| Opening the PowerShell Console .....     | 4          |
| Using DOS Commands .....                 | 4          |
| Exploring PowerShell Commands .....      | 6          |
| Getting Help .....                       | 8          |
| Displaying the Docs .....                | 8          |
| Learning About General Topics .....      | 9          |
| Updating the Docs .....                  | 10         |
| Summary .....                            | 11         |
| <b>2</b>                                 |            |
| <b>BASIC POWERSHELL CONCEPTS</b>         | <b>13</b>  |
| Variables .....                          | 13         |
| Displaying and Changing a Variable ..... | 14         |
| User-Defined Variables .....             | 14         |
| Automatic Variables .....                | 16         |
| Data Types .....                         | 19         |
| Boolean Values .....                     | 20         |
| Integers and Floating Points .....       | 20         |
| Strings .....                            | 21         |
| Objects .....                            | 23         |
| Inspecting Properties .....              | 24         |
| Using the Get-Member cmdlet .....        | 25         |
| Calling Methods .....                    | 25         |
| Data Structures .....                    | 26         |
| Arrays .....                             | 26         |
| ArrayLists .....                         | 29         |
| Hashtables .....                         | 31         |
| Creating Custom Objects .....            | 33         |
| Summary .....                            | 35         |

|  |                           |           |
|--|---------------------------|-----------|
| <b>3</b>   | <b>COMBINING COMMANDS</b> | <b>37</b> |
| Starting a Windows Service . . . . .               | 37                        |           |
| Using the Pipeline . . . . .                       | 38                        |           |
| Piping Objects Between Commands . . . . .          | 38                        |           |
| Piping Arrays Between Commands . . . . .           | 39                        |           |
| Looking at Parameter Binding . . . . .             | 40                        |           |
| Writing Scripts . . . . .                          | 42                        |           |
| Setting the Execution Policy . . . . .             | 42                        |           |
| Scripting in PowerShell . . . . .                  | 44                        |           |
| Summary . . . . .                                  | 46                        |           |
| <b>4</b>   | <b>CONTROL FLOW</b>       | <b>47</b> |
| Understanding Control Flow . . . . .               | 48                        |           |
| Using Conditional Statements . . . . .             | 49                        |           |
| Building Expressions by Using Operators . . . . .  | 49                        |           |
| The if Statement . . . . .                         | 50                        |           |
| The else Statement . . . . .                       | 51                        |           |
| The elseif Statement . . . . .                     | 51                        |           |
| The switch Statement . . . . .                     | 52                        |           |
| Using Loops . . . . .                              | 54                        |           |
| The foreach Loop . . . . .                         | 54                        |           |
| The for Loop . . . . .                             | 57                        |           |
| The while Loop . . . . .                           | 58                        |           |
| The do/while and do/until Loops . . . . .          | 58                        |           |
| Summary . . . . .                                  | 59                        |           |
| <b>5</b>   | <b>ERROR HANDLING</b>     | <b>61</b> |
| Working with Exceptions and Errors . . . . .       | 62                        |           |
| Handling Nonterminating Errors . . . . .           | 63                        |           |
| Handling Terminating Errors . . . . .              | 64                        |           |
| Exploring the \$Error Automatic Variable . . . . . | 66                        |           |
| Summary . . . . .                                  | 67                        |           |
| <b>6</b>   | <b>WRITING FUNCTIONS</b>  | <b>69</b> |
| Functions vs. Cmdlets . . . . .                    | 70                        |           |
| Defining a Function . . . . .                      | 70                        |           |
| Adding Parameters to Functions . . . . .           | 71                        |           |
| Creating a Simple Parameter . . . . .              | 72                        |           |
| The Mandatory Parameter Attribute . . . . .        | 73                        |           |
| Default Parameter Values . . . . .                 | 74                        |           |
| Adding Parameter Validation Attributes . . . . .   | 74                        |           |

|   |    |
|---|----|
| Accepting Pipeline Input . . . . .                | 76 |
| Adding Another Parameter . . . . .                | 76 |
| Making the Function Pipeline Compatible . . . . . | 77 |
| Adding a process Block . . . . .                  | 77 |
| Summary . . . . .                                 | 78 |

## **7 EXPLORING MODULES 79**

|   |    |
|---|----|
| Exploring Default Modules . . . . .             | 80 |
| Finding Modules in Your Session . . . . .       | 80 |
| Finding Modules on Your Computer . . . . .      | 81 |
| Importing Modules . . . . .                     | 82 |
| The Components of a PowerShell Module . . . . . | 84 |
| The .psm1 File . . . . .                        | 84 |
| The Module Manifest . . . . .                   | 84 |
| Working with Custom Modules . . . . .           | 86 |
| Finding Modules . . . . .                       | 86 |
| Installing Modules . . . . .                    | 87 |
| Uninstalling Modules . . . . .                  | 88 |
| Creating Your Own Module . . . . .              | 88 |
| Summary . . . . .                               | 89 |

## **8 RUNNING SCRIPTS REMOTELY 91**

|  |     |
|--|-----|
| Working with Scriptblocks . . . . .                              | 92  |
| Using Invoke-Command to Execute Code on Remote Systems . . . . . | 93  |
| Running Local Scripts on Remote Computers . . . . .              | 94  |
| Using Local Variables Remotely . . . . .                         | 95  |
| Working with Sessions . . . . .                                  | 96  |
| Creating a New Session . . . . .                                 | 97  |
| Invoking Commands in a Session . . . . .                         | 98  |
| Opening Interactive Sessions . . . . .                           | 98  |
| Disconnecting from and Reconnecting to Sessions . . . . .        | 99  |
| Removing Sessions with Remove-PSSession . . . . .                | 101 |
| Understanding PowerShell Remoting Authentication . . . . .       | 101 |
| The Double Hop Problem . . . . .                                 | 102 |
| Double Hopping with CredSSP . . . . .                            | 103 |
| Summary . . . . .  | 105 |

## **9 TESTING WITH PESTER 107**

|                                   |     |
|-----------------------------------|-----|
| Introducing Pester . . . . .      | 108 |
| Pester Basics . . . . .           | 108 |
| A Pester File . . . . .           | 108 |
| The describe Block . . . . .      | 109 |
| The context Block . . . . .       | 109 |
| The it Block . . . . .            | 110 |
| Assertions . . . . .              | 110 |
| Executing a Pester Test . . . . . | 111 |
| Summary . . . . .                 | 112 |

## PART II: AUTOMATING DAY-TO-DAY TASKS

113

|   |                                    |            |
|---|------------------------------------|------------|
| <b>10</b>   | <b>PARSING STRUCTURED DATA</b>     | <b>117</b> |
| CSV Files . . . . .   | 118                                |            |
| Reading CSV Files . . . . .   | 118                                |            |
| Creating CSV Files . . . . .  | 122                                |            |
| Project 1: Building a Computer Inventory Report . . . . .                                 | 123                                |            |
| Excel Spreadsheets . . . . .  | 126                                |            |
| Creating Excel Spreadsheets . . . . .   | 126                                |            |
| Reading Excel Spreadsheets . . . . .  | 127                                |            |
| Adding to Excel Spreadsheets . . . . .  | 128                                |            |
| Project 2: Creating a Windows Service Monitoring Tool . . . . .                           | 129                                |            |
| JSON Data . . . . .   | 131                                |            |
| Reading JSON . . . . .  | 131                                |            |
| Creating JSON Strings . . . . .   | 132                                |            |
| Project 3: Querying and Parsing a REST API . . . . .                                      | 134                                |            |
| Summary . . . . .   | 136                                |            |
| <b>11</b>   | <b>AUTOMATING ACTIVE DIRECTORY</b> | <b>137</b> |
| Prerequisites . . . . .   | 138                                |            |
| Installing the ActiveDirectory PowerShell Module . . . . .                                | 138                                |            |
| Querying and Filtering AD Objects . . . . .   | 139                                |            |
| Filtering Objects . . . . .   | 139                                |            |
| Returning Single Objects . . . . .  | 141                                |            |
| Project 4: Finding User Accounts That Haven't Changed Their Password in 30 Days . . . . . | 141                                |            |
| Creating and Changing AD Objects . . . . .  | 143                                |            |
| Users and Computers . . . . .   | 143                                |            |
| Groups . . . . .  | 145                                |            |
| Project 5: Creating an Employee Provisioning Script . . . . .                             | 146                                |            |
| Syncing from Other Data Sources . . . . .   | 149                                |            |
| Project 6: Creating a Syncing Script . . . . .  | 150                                |            |
| Mapping Data Source Attributes . . . . .  | 150                                |            |
| Creating Functions to Return Similar Properties . . . . .                                 | 151                                |            |
| Finding Matches in Active Directory . . . . .   | 153                                |            |
| Changing Active Directory Attributes . . . . .  | 155                                |            |
| Summary . . . . .   | 156                                |            |
| <b>12</b>   | <b>WORKING WITH AZURE</b>          | <b>157</b> |
| Prerequisites . . . . .   | 157                                |            |
| Azure Authentication . . . . .  | 158                                |            |
| Creating a Service Principal . . . . .  | 158                                |            |
| Noninteractively Authenticating with Connect-AzAccount . . . . .                          | 160                                |            |
| Creating an Azure Virtual Machine and All Dependencies . . . . .                          | 161                                |            |
| Creating a Resource Group . . . . .   | 161                                |            |
| Creating the Network Stack . . . . .  | 162                                |            |

|  |     |
|--|-----|
| Creating a Storage Account . . . . .               | 164 |
| Creating the Operating System Image . . . . .      | 164 |

## **13 WORKING WITH AWS 173**

|  |     |
|--|-----|
| Prerequisites . . . . .                              | 174 |
| AWS Authentication . . . . .                         | 174 |
| Authenticating with the Root User . . . . .          | 174 |
| Creating an IAM User and Role . . . . .              | 175 |
| Authenticating Your IAM User . . . . .               | 177 |
| Creating an AWS EC2 Instance . . . . .               | 178 |
| The Virtual Private Cloud . . . . .                  | 178 |
| The Internet Gateway . . . . .                       | 179 |
| Routes . . . . .                                     | 180 |
| Subnet . . . . .                                     | 180 |
| Assigning an AMI to Your EC2 Instance . . . . .      | 181 |
| Wrapping Up . . . . .                                | 182 |
| Deploying an Elastic Beanstalk Application . . . . . | 184 |
| Creating the Application . . . . .                   | 184 |
| Deploying a Package . . . . .                        | 186 |
| Creating a SQL Server Database in AWS . . . . .      | 188 |
| Summary . . . . .                                    | 191 |

## **14 CREATING A SERVER INVENTORY SCRIPT 193**

|  |     |
|--|-----|
| Prerequisites . . . . .  | 194 |
| Creating the Project Script(s) . . . . .                           | 194 |
| Defining the Final Output . . . . .                                | 194 |
| Discovery and Script Input . . . . .                               | 194 |
| Querying Each Server . . . . .                                     | 196 |
| Thinking Ahead: Combining Different Types of Information . . . . . | 196 |
| Querying Remote Files . . . . .                                    | 199 |
| Querying Windows Management Instrumentation . . . . .              | 201 |
| Disk Free Space . . . . .  | 202 |
| Operating System Information . . . . .                             | 202 |
| Memory . . . . .   | 203 |
| Network Information . . . . .                                      | 205 |
| Windows Services . . . . .   | 208 |
| Script Cleanup and Optimization . . . . .                          | 210 |
| Summary . . . . .  | 212 |

## PART III: BUILDING YOUR OWN MODULE

**213**

**15**

### PROVISIONING A VIRTUAL ENVIRONMENT

**217**

|   |     |
|---|-----|
| PowerLab Module Prerequisites . . . . .               | 218 |
| Creating the Module . . . . .                         | 219 |
| Creating a Blank Module . . . . .                     | 219 |
| Creating a Module Manifest . . . . .                  | 219 |
| Using Built-In Prefixes for Function Names . . . . .  | 220 |
| Importing the New Module . . . . .                    | 220 |
| Automating Virtual Environment Provisioning . . . . . | 221 |
| Virtual Switches . . . . .                            | 221 |
| Creating Virtual Machines . . . . .                   | 223 |
| Virtual Hard Disks . . . . .                          | 225 |
| Testing the New Functions with Pester . . . . .       | 228 |
| Summary . . . . .                                     | 229 |

**16**

### INSTALLING AN OPERATING SYSTEM

**231**

|   |     |
|---|-----|
| Prerequisites . . . . .                         | 231 |
| OS Deployments . . . . .                        | 232 |
| Creating the VHDX . . . . .                     | 232 |
| Attaching the VM . . . . .                      | 234 |
| Automating OS Deployments . . . . .             | 235 |
| Storing Encrypted Credentials on Disk . . . . . | 237 |
| PowerShell Direct . . . . .                     | 238 |
| Pester Tests . . . . .                          | 239 |
| Summary . . . . .                               | 240 |

**17**

### DEPLOYING ACTIVE DIRECTORY

**241**

|   |     |
|---|-----|
| Prerequisites . . . . .                       | 242 |
| Creating an Active Directory Forest . . . . . | 242 |
| Building the Forest . . . . .                 | 242 |
| Saving Secure Strings to Disk . . . . .       | 243 |
| Automating Forest Creation . . . . .          | 244 |
| Populating the Domain . . . . .               | 246 |
| Building and Running Pester Tests . . . . .   | 250 |
| Summary . . . . .                             | 252 |

**18**

### CREATING AND CONFIGURING A SQL SERVER

**253**

|   |     |
|---|-----|
| Prerequisites . . . . .                           | 253 |
| Creating the Virtual Machine . . . . .            | 254 |
| Installing the Operating System . . . . .         | 254 |
| Adding a Windows Unattended Answer File . . . . . | 255 |

|   |     |
|---|-----|
| Adding the SQL Server to a Domain . . . . . | 256 |
| Installing the SQL Server . . . . .         | 257 |
| Copying Files to the SQL Server . . . . .   | 257 |
| Running the SQL Server Installer . . . . .  | 259 |
| Automating the SQL Server . . . . .         | 259 |
| Running Pester Tests . . . . .              | 263 |
| Summary . . . . .                           | 263 |

**19**  
**REFACTORING YOUR CODE** **265**

|  |     |
|--|-----|
| A Second Look at New-PowerLabSqlServer . . . . . | 266 |
| Using Parameter Sets . . . . .                   | 269 |
| Summary . . . . .                                | 272 |

**20**  
**CREATING AND CONFIGURING AN IIS WEB SERVER** **275**

|   |     |
|---|-----|
| Prerequisites . . . . .                     | 275 |
| Installation and Setup . . . . .            | 276 |
| Building Web Servers from Scratch . . . . . | 277 |
| The WebAdministration Module . . . . .      | 277 |
| Websites and Application Pools . . . . .    | 278 |
| Configuring SSL on a Website . . . . .      | 281 |
| Summary . . . . .                           | 284 |
