Patents Act 1990

NOTICE OF ENTITLEMENT

(To be filed before acceptance)

We, STAMP-N-READ HOLDINGS (PROPRIETARY) LIMITED, a Company registered according to the laws of the Republic of South Africa, of 3rd Floor, Cedar Grove, Grove City, 196 Louis Botha Avenue, Houghton, Estate, Johannesburg, South Africa, being the applicant in respect of Application No. 75712/94, state the following:-

NOMINATED PERSON

We are the Nominated Person to whom we request that the patent be granted.

ENTITLEMENT TO INVENTION

The actual inventor is LAWRENCE PAIKEN and we have entitlement from the actual inventor by virtue of the following facts:

- (1) The inventor assigned his rights to BERYL MICHELE ROTTANBURG and MELINDA ANNE PAIKEN by virtue of an assignment dated 5 July 1993.
- (2) BERYL MICHELE ROTTANBURG and MELINDA ANNE PAIKEN assigned their rights to STAMP-N-READ HOLDINGS (PROPRIETARY) LIMITED by virtue of an assignment dated 23 September 1994.

CONVENTION APPLICATION

We have entitlement from the applicant of the basic application listed on the patent request form by assignment.

The basic application listed on the request form is the first application made in a Convention country in respect of the invention.

1. A reading kit comprising at least one sheet of text, a plurality of rubber stamps, and at least one ink pad; wherein the text consists of a storyline of which key portions have been omitted, and each rubber stamp contains an image corresponding to respective key portions of the text such that, in use, a reader may complete the story by stamping the appropriate image onto the sheet of text using the appropriate rubber stamp and ink pad.

FOR A STANDARD PATENT

ORIGINAL

Name of Applicant(s): STAMP-N-READ HOLDINGS (PROPRIETARY) LIMITED

Actual Inventor(s): LAWRENCE PAIKEN

Address for Service: WRAY & ASSOCIATES, PRIMARY INDUSTRY HOUSE, 239 ADELAIDE
TERRACE, PERTH, WESTERN AUSTRALIA, 6000

Invention title: "EDUCATIONAL TOY"

The following statement is a full description of this invention, including the best method of performing it known to us.

BACKGROUND TO THE INVENTION

This invention relates to games and educational material for children. More specifically it relates to a text wherein the reader provides part of the story by adding missing text, based on clues contained in the preceding and subsequent portions of the text.

5

It is known to provide stories wherein words are omitted and replaced by graphics which suggest what the missing words should be. More recent versions of this concept include books wherein missing text is added by the reader, typically a child, by way of affixing a sticker bearing the appropriate image into a gap in the text provided for this purpose. While these books are popular, they have the disadvantage of being relatively expensive.

10

SUMMARY OF THE INVENTION

According to the invention, a reading kit comprises at least one sheet of text, a plurality of rubber stamps, and at least one ink pad; wherein the text consists of a storyline of which key portions have been omitted, and each rubber stamp contains an image corresponding to respective key portions of the text such that, in use, a reader may complete the story by stamping the appropriate image onto the sheet of text using the appropriate rubber stamp and ink pad.

5

Typically the storyline would be suitable for young children who are learning to read. The text may be selected to be suitable for the entertainment or education of the reader, or for both purposes. Ink pads may be incorporated into the individual rubber stamps, or a separate ink pad may be provided which is adapted to be used to ink-up all of the stamps.

10

BRIEF DESCRIPTIONS OF THE DRAWINGS

15

Figure 1 shows an example of text in accordance with the invention;

Figure 2 shows a selection of images for use with the text of Figure 1; and

Figure 3 shows the text of Figure 1 in which certain portions have been completed using the images of Figure 2.

20

DESCRIPTION OF THE PREFERRED EMBODIMENT

Referring initially to Figure 1, a sheet of text 1 contains a storyline having a series of gaps 2 therein. The text is so set out that the text preceding and following each gap 2 suggests the nature of the missing text.

10

Figure 2 shows a plurality of images 3 selected to complete the storyline by their insertion into the gaps in the text. These images are contained on the faces of a plurality of rubber stamps depicted by dotted lines 4. In use, the reader of the text may, at each gap in the text, decide the nature of the missing text, select a rubber stamp bearing an image the corresponding to the missing text, ink this stamp using an ink pad 5 and stamp the appropriate image in the corresponding gap in the text.

15

Figure 3 illustrates the sheet of text of Figure 1 in which the gaps in the text have been completed by the insertion of stamped images from those shown in Figure 2.

The illustrated text contains a storyline suited to a person learning to read. Other forms of storyline may also be used, including those with a more overtly educational aim, as well as those aimed at older children or even adults, for either education or entertainment, or a combination of both.

Any form of rubber stamp may be used, including self-inking pads. For

children, and to increase the fun aspect of the activity, rubber stamps with one or more separate inked pads are preferred. Where more than one pad is provided, these may be of different colours to provide variety. A washable ink is preferred in order to minimise the possibility of damage to household furnishings and fittings by small children.

5

The text is preferably printed on paper which will readily accept the stamped images. That paper will preferably also be suitable for colouring-in with wax crayons or the like so that the printed images can be coloured-in. The kit will preferably be supplied with a plurality of different story sheets or books but the storyline of each will be adapted to be completed using the same set of rubber stamps supplied with the kit.

10

THE CLAIMS DEFINING THE INVENTION ARE AS FOLLOWS:-

1. A reading kit comprising at least one sheet of text, a plurality of rubber stamps, and at least one ink pad; wherein the text consists of a storyline of which key portions have been omitted, and each rubber stamp contains an image corresponding to respective key portions of the text such that, in use, a reader may complete the story by stamping the appropriate image onto the sheet of text using the appropriate rubber stamp and ink pad.
2. A reading kit according to claim 1 wherein the kit contains a number of different sheets of text each sheet of text consisting of a storyline of which key portions have been omitted, the key portions of the different texts corresponding with each other, at least to an extent, so that the same rubber stamps can be used to complete the storylines of the different texts.
3. A reading kit according to either preceding claim wherein at least some of the images comprise picture outlines so that the stamped image provides an outline picture which can be coloured in by the reader.
4. A reading kit according to any preceding claim wherein the rubber stamps each incorporate an ink pad.
5. A reading kit substantially as hereinbefore described with

reference to the drawings.

Patent Attorneys for Applicant.

ABSTRACT

A reading kit comprises at least one sheet of text (1), a set of rubber stamps (4), and an ink pad (5). The text is in the form of a storyline of which key portions (2) have been omitted. Each rubber stamp has an image (3) which corresponds to a respective key portion in the text so that a reader may complete the story by stamping the appropriate image (3) onto the sheet using the appropriate rubber stamp and the ink pad. Typically the storyline would be suitable for young children who are learning to read.
