54 Method for the production of a waterproof coating on a surface and sheet materials suitable for use in connection with said method.

57 A sheet material (5) for the production of a coating comprising interconnected pressure relieving passages, one side of said material comprising a large number of separate rectangular zones (6) of a bituminous binder modified with 5-40% by weight of a thermoplastic elastomer.

The sheet comprises at its left edge a continuous stripe (7) of a binder for the use of binding the sheet to an adjacent one.
