(54) **A support base for a structural member**

(57) The present invention provides a support base for a structural member such as a post, beam or joist, the support base comprising:

at least one support element (10), each support element comprising:

a ground engaging portion (20) for anchoring the support element to the ground, support surface or other support structure;

an upper portion (30) which, in use, engages with the structural member; and

a seat portion (40) extending between the ground engaging portion and the upper portion which, in use, receives, supports and spaces the base of the structural member above the ground or support surface or other support structure.
