(54) Title of the Invention: Hand Cleaning apparatus  
Abstract Title: Hand Cleaning apparatus

(57) Hand cleaning apparatus is disclosed having a frame, fixing means for fixing the frame to a structure, a facia comprising a hand port for receiving the hands of a user, frame connecting means for connecting the facia to the frame, a chassis and chassis connecting means for connecting the chassis to the facia and/or the frame. Usually, the chassis will include a hand-sensor, an air blower and a connection to a controller, and optionally a soap dispenser and a water dispenser. The apparatus is modular which is of benefit in manufacture, use and maintenance.
