(54) Title: TECHNIQUES FOR PROVIDING CALLER ID OF PARTICIPANTS IN A CONFERENCE CALL INVITATION

(57) Abstract: [56] In one embodiment, techniques for sending a conference invite that provides access to a list of participants in an existing conference are provided. A participant in a conference (104-1... 104-n) may decide to send an invite for the existing conference to the user (106). A request for inviting the user into the existing conference is received. A list of participants in the existing conference is determined. An invite message for the conference is then generated where the invite message includes information for the list of participants (104-1... 104-n). The invite message is then sent to the user (106) where the information for the list of participants is accessible to the user. For example, the list of participants may be displayed as caller ID information when the invite message is received by the user.
