UNITED STATES PATENT OFFICE

ISAAC S. WILLIAMS, OF PHILADELPHIA, PENNSYLVANIA.

IMPROVEMENT IN PORTABLE COMMDES.

Specification forming part of Letters Patent No. **162,131**, dated April 13, 1875; application filed March 11, 1875.

To all whom it may concern:

Be it known that I, ISAAC S. WILLIAMS, of Philadelphia, Pennsylvania, have invented an Improved Portable Commode, of which the following is a specification:

The object of my invention is to make a commode which can be readily folded into a small compass, and this object I attain in the manner which I will now proceed to describe, reference being had to the accompanying drawing, in which—

Figure 1 is a perspective view of the commode as it appears when adjusted for use; Fig. 2, a view of the folded supporting-frame, and Fig. 3 a perspective view of the folded top of the commode.

The supporting-frame consists of three legs, A, to each of which is secured an arm, B, and the three arms are hinged together at *x x*, in the manner best observed in Fig. 2. The an-

nular top of the commode is made in two parts, hinged together as shown in Fig. 3, and has on the under side three holes for receiving the upper ends of the three legs A, so that when the latter have been adjusted to their places, the frame and top will form the commode shown in Fig. 1, the arms B of the frame, serving to support the vessel.

I claim as my invention—

The combination of the supporting-frame, consisting of the legs A and arms B, hinged together as described, with the top D, made in two parts, hinged together, as specified.

In testimony whereof I have signed my name to this specification, in the presence of two subscribing witnesses.

ISAAC S. WILLIAMS.
