(57) **CLAIM**
The ornamental design for a bag with transparent front panel and black back panel, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of a bag showing my new design;
 FIG. 2 is a front elevation view thereof;
 FIG. 3 is a rear elevation view thereof;
 FIG. 4 is a left side elevation view thereof;
 FIG. 5 is a right side elevation view thereof;
 FIG. 6 is a top plan view thereof;
 FIG. 7 is a bottom view thereof; and
 FIG. 8 is a front elevation view of the back panel showing the embossed front surface of the back panel before the front panel is sealed to the back panel; and,
 FIG. 9 is a rear elevation view of the back panel showing the embossed rear surface of the back panel before the front panel is sealed to the back panel.

The bag includes front and back panels wherein the front panel is transparent and the rear panel is both embossed on its front and rear surface as shown in FIGS. 1-3, 8 and 9 and is colored entirely black on its front and rear surfaces. The front and rear surfaces of the back panel in FIGS. 1-3, 8 and 9 are not illustrated as black because doing so would obscure the embossing on the front and rear surfaces of the back panel. The border surrounding three sides of the bag as shown in FIGS. 1-3 as well as the side edge shown in FIG. 1 are also black in color and are lined for the color black. Applicant is claiming the color black for the front and rear surfaces of the back panel, the border and the side edges of the bag.

The border and side edges of the bag in FIGS. 1-3 are lined for the color black.

1 Claim, 3 Drawing Sheets
