(54) Abstract Title: **A disposable sanitary hand cover**

(57) A disposable sanitary hand cover (1, 13) comprises a hand covering (2, 14) and a separable outer layer (3, 15). At least a portion (9, 22) of the outer layer (3, 15) is suitable for impregnation with a sanitary or medical preparation. The outer layer (3, 15) of the hand cover (1, 13) is used first to cleanse an appropriate surface, for example a lavatory seat or similar. The outer layer (3, 15) can then be detached and disposed of to leave the hand covering (2, 14) that can be used to wash and/or dry appropriate areas of the body. The hand covering (2, 14) can then also be disposed of. Preferably, therefore, at least the hand covering is made of a biodegradable material.
