(57) **CLAIM**

The ornamental design for a display screen with a machine learning score graphical user interface, as shown and described.

**DESCRIPTION**

FIG. 1 is a front view of a first embodiment of a display screen with a machine learning score graphical user interface.

FIG. 2 is a front view of a second embodiment of a display screen with a machine learning score graphical user interface; and,

FIG. 3 is a front view of a third embodiment of a display screen with a machine learning score graphical user interface.

The dot-dash broken lines illustrate a portion of a display screen and form no part of the claimed design. The dashed broken lines illustrate portions of the graphical user interface and form no part of the claimed design. The blank white tone of the interior of the document icon forms part of the claimed design. The graphical user interface could be displayed on the display screen of a computer server, a laptop computer, a mobile phone, a telephone, a tablet, a smart watch, or other electronic device.
