(54) Title of the Invention: **Nasal seal and respiratory interface**  
Abstract Title: **Nasal seal and respiratory interface**

(57) A nasal seal for a respiratory interface comprises a supple lower-nose-receiving center part having a concave shape pre-formed to receive and sealingly contact the tip, lower sides, and base of the nose and sealingly contact the upper lip, and position an aperture for gas flow beneath the nares of wearer. The seal may have resilience or memory towards this preformed shape.
