(54) Title: SYSTEM FOR SOFTWARE SOURCE CODE COMPARISON

(57) **Abstract:** A system for comparing two corpuses according to the present invention comprising a proprietary intellectual property (20) is taken as input and transformed (22) using natural language processing, machine intelligence, and encryption. The transformed proprietary property is compared (26) with one or more other characterized corpuses in the characterization database (28).

INTERNATIONAL SEARCH REPORT

International application No.

PCT/US04/29747

Box No. II	Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:	
1.	Claims Nos.: 3-7 because they relate to subject matter not required to be searched by this Authority, namely: Claims 3-7 are directed to manipulate abstract ideas, non-tangible, without practical application in the technological arts
2.	Claims Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)	
This Internat	ional Searching Authority found multiple inventions in this international application, as follows:
1.	As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. As all searchable claims could be searched without effort justifying additional fees, this Authority did not invite payment of any additional fees. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. Remark on 1	No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: Protest The additional search fees were accompanied by the applicant's protest and, where applicable, the payment of a protest fee. The additional search fees were accompanied by the applicant's protest but the applicable protest fee was not paid within the time limit specified in the invitation. No protest accompanied the payment of additional search fees.
