(54) **Title:** USER INTERFACE WITH EXPANDABLE WIDGETS TO REPRESENT CONTACTS

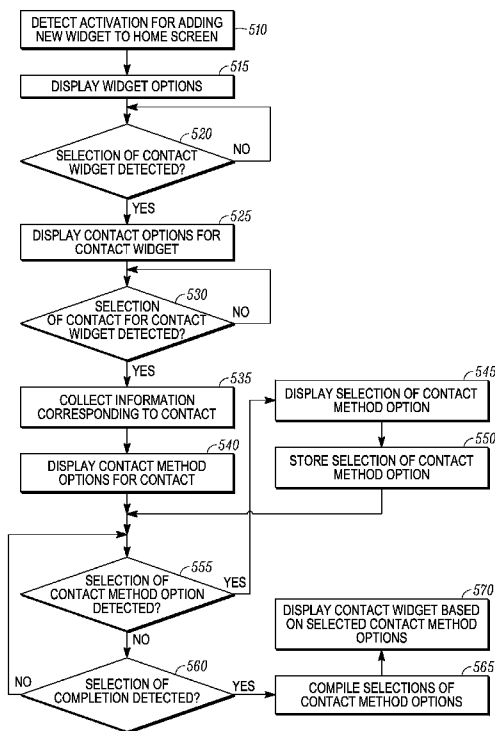

FIG. 5

(57) **Abstract:** There is disclosed an electronic device (100) and method for providing a visual representation of a contact widget. The electronic device (100) includes a display (103, 207) and an input component (209). A display (103, 207) provides a first representation of the contact widget including a first quantity of task representations. An input component (209) then detects a resizing action of the contact widget (710, 730). Thereafter, display (103, 207) provides a second representation of the contact widget, different from the first representation (770), including a second quantity of task representations in response to detecting the resizing action of the contact widget.
