(54) Title: PATTERNING SYSTEM FOR SELECTED BODY TYPES AND ARTICLES OF MANUFACTURE PRODUCED THEREFROM

Fig. 3a

(57) Abstract: A method for manufacturing a garment includes creating a database of various body types, the database including variances within a selected body type. After the body type variance is selected the garment is prepared including a pant, skirt, t-shirt or the like. In creating a jean a cup is provided within the buttocks of the wearer to enable the fullness of the buttocks to reside therewithin. The database may be used to prepare it is possible articles of manufactures such as seating which is contoured to the body of the driver.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
