(54) **Compression belt system for use with chest compression devices**

(57) A compression belt cartridge (5) has a double-
oar shaped belt (3) and a cover plate (44) through which
the belt (3) is threaded. The cover plate (44) is provided
with hooks (51, 52, 53,54) and snap latches (47, 48, 49,
50) that fit into a belt drive platform (4). The cover plate
(44) is sized and dimensioned to fit within only selected
platforms. The belt (3) attaches to the means for tightening
(42) the belt (3) via a spline (66) attached to the belt
(3). The means for tightening (42) a belt (3) then repeti-
tively tightens the belt (3), thereby accomplishing chest
compressions.
