(54) Title: ENHANCED MESSAGING FEATURES

FIG. 1

(57) **Abstract:** The present disclosure provides various systems and methods for providing enhanced messaging features. An exemplary method for providing a predictive response messaging feature includes receiving a message from a first device (108) at a second device (110) and analyzing the message to determine at least one response option based upon the content of the message. After determining at least one response option, the at least one response option can be presented on a display (202) of the second device (110). A called party can make a selection of one of the at least one response options and the selection can be received on the second device (110). The selection can trigger the creation of a response message based upon the selected response option and the response message can be sent to the first device (108). Other methods and systems are described.

A. CLASSIFICATION OF SUBJECT MATTER
 INV. H04L12/58
 ADD. H04Q7/22

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED
 Minimum documentation searched (classification system followed by classification symbols)
 H04Q H04L

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)
 EPO-Internal

* Special categories of cited documents:

A document defining the general state of the art which is not considered to be of particular relevance	*T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
E earlier document but published on or after the international filing date	*X* document of particular relevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
L document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)	*Y* document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
O document referring to an oral disclosure, use, exhibition or other means	*Z* document member of the same patent family
P document published prior to the international filing date but later than the priority date claimed
