(54) Title of the Invention: **Multivesicular liposome formulations of tranexamic acid**  
Abstract Title: **Multivesicular liposome formulations of tranexamic acid**

(57) Some embodiments of the present application are related to multivesicular liposome formulations comprising tranexamic acid (TXA) for the purpose of minimizing the side effects of unencapsulated tranexamic while maintaining or improving efficacy and lengthening the duration of the effect. Methods of making and administering the tranexamic acid encapsulated multivesicular liposome formulations and their use as medicaments are also provided.
