(57) **CLAIM**

The ornamental design for a brassiere, as shown and described.

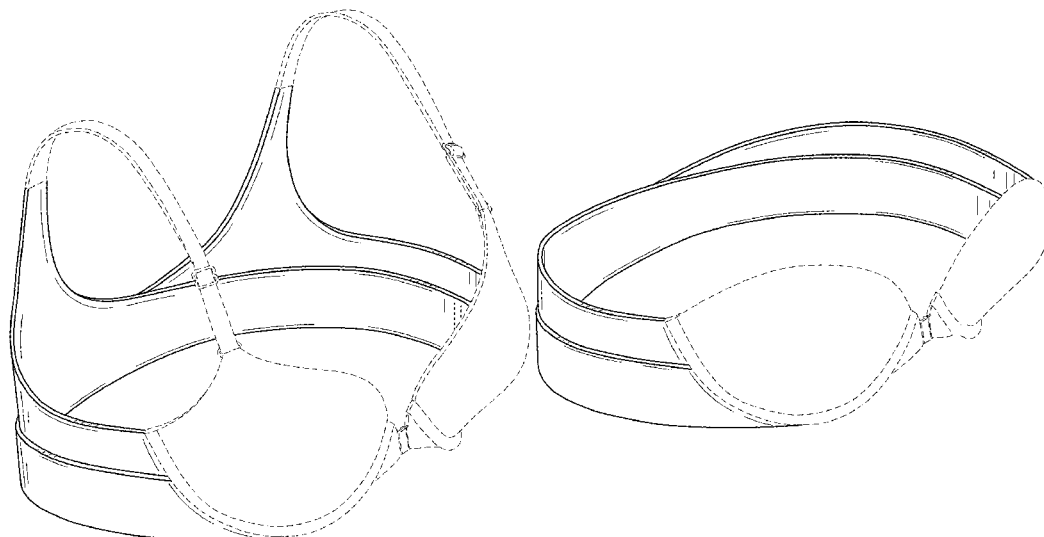

DESCRIPTION

FIG. 1 is a front left perspective view of a first embodiment of a brassiere according to my new and ornamental design; FIG. 2 is a rear left perspective view thereof; FIG. 3 is a front elevation view thereof; FIG. 4 is a rear elevation view thereof; FIG. 5 is a left side elevation view thereof; FIG. 6 is a right side elevation view thereof; FIG. 7 is a top plan view thereof; FIG. 8 is a bottom plan view thereof; FIG. 9 is a front left perspective view of a second embodiment of a brassiere according to my new and ornamental design; and, FIG. 10 is a rear left perspective view of the brassiere of FIG. 9.

The broken lines represent portions of the brassiere that form no part of the claimed design. The front elevation, rear elevation, right side elevation, left side elevation, top plan, and bottom plan views of the second embodiment of the brassiere are similar to the views shown in FIGS. 3-8, except for the lack of straps in the second embodiment of the brassiere. The brassiere is shown as it would appear on a wearer's body.

The characteristic feature of the design resides in the overlapped and crisscrossed wings of the brassiere, which taper in width.
