UNITED STATES PATENT OFFICE.

STANLEY KUREK, OF ROCHESTER, NEW YORK.

DESIGN FOR A CHAIR-BOTTOM.

SPECIFICATION forming part of Design No. 34,152, dated February 26, 1901.

Application filed February 1, 1901. Serial No. 45,657. Term of patent 7 years.

To all whom it may concern:

Be it known that I, STANLEY KUREK, a citizen of the United States, residing at Rochester, in the county of Monroe and State of New York, have invented and produced a new and original Design for Chair-Bottoms, of which the following is a specification, reference being had to the accompanying drawing, forming a part thereof.

My design relates to seats for chairs or similar articles of furniture; and it consists particularly in the appearance of the seat or bottom.

The perspective figure of drawing illustrates my design, in which 1 indicates the exposed corners of a frame, on which is provided a panel 2, having a ribbed or corrugated surface, said corrugations extending from side to side of the frame. A panel 4, having a similar surface provided with ribs or corruga-

tions extending at right angles to those of the panel 2, joins the latter in diagonal broken lines 5, extending inwardly from the forward corners 1, and the central portion of the panel extends rearwardly to the line 6, where it joins a panel 7, having ribs or corrugations extending in the same direction as those in the adjoining panel.

Having described my invention, what I claim as new, and desire to secure by Letters Patent, is—

The design for a chair-bottom substantially as shown and described.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

STANLEY KUREK.

Witnesses:

G. WILLARD RICH,
WALTER B. PAYNE.
