(57) **CLAIM**

The ornamental design for a cap, as shown and described.

**DESCRIPTION**

The nature of this product is as a cap for a container, such as an end cap for a bottle for holding and dispensing a personal care lotion.

FIG. 1 is a perspective view of a cap embodying our new design, when the cap has first been inverted;

FIG. 2 is a top plan view of the cap in its right side up position;

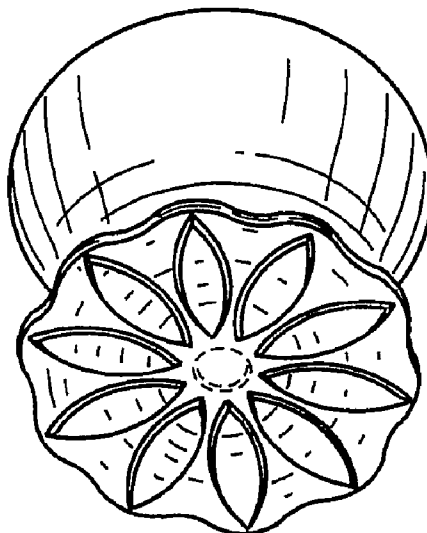

FIG. 3 is a left side elevational view of the cap, when the cap has been inverted, the right side elevational view thereof being the mirror image thereof;

FIG. 4 is a front elevational view of the cap, when the cap has been inverted, the rear elevational view thereof being a mirror image of the front elevational view shown; and,

FIG. 5 is a bottom plan view of the cap when the cap is in its right side up position.

The broken line representations of internal structures in FIG. 5 are for purposes of illustration only and form no part of the claim.
