(54) Title of the Invention: **Wearable secure data device**
 Abstract Title: **Wearable secure data device**

(57) A method for a wearable secure data device is provided. The method includes setting an operational mode for the wearable secure data device that stores a plurality of secure data items. The method also includes receiving a request for at least one of the secure data items from a client device that is communicating with a third-party device. Additionally, the method includes determining if the operational mode is associated with allowing access to the secure data items. Further, the method includes providing a response based on the determination.
