New York New York 10036 (US)

④ **Curing agent for epoxy resin.**

⑵ A curing agent for epoxy resins is prepared from an amine and an epoxy, to obtain the curing agent in the form of small spherical particles the size of which is from 0.1 μm to 30 μm . This curing agent can be easily dispersed in curing agent masterbatches and curable compositions with minimal effect on their storage stability. The resulting curable compositions have a wide range of applications for example as adhesives in automobiles and electronics.
