(54) Title of the Invention: **Modular safety valve system, valve module and method of setting parameters of a valve system**
Abstract Title: **Modular safety valve system, valve module and method of setting parameters of a valve system**

(57) A modular downhole safety valve system comprising a plurality of valve modules being selectable in the field, the valve modules being connectable to one another in the field to define a modular safety valve having desired parameters and is ready for downhole deployment without additional certification.
