(57) **CLAIM**

The ornamental design for a bottle with lid, as shown and described.

DESCRIPTION

FIG. 1 is a top perspective view of a bottle with lid showing our new design;

FIG. 2 is a right side view thereof;

FIG. 3 is a left side view thereof;

FIG. 4 is a front view thereof;

FIG. 5 is a rear view thereof;

FIG. 6 is a top view thereof;

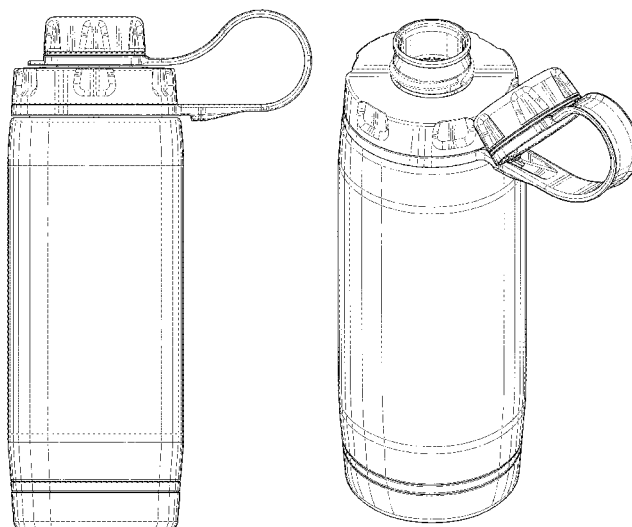

FIG. 7 is a bottom view thereof; and,

FIG. 8 is a perspective view thereof with the upper cap opened and positioned to the side of the lower cap.

The broken lines in the drawing depict portions of the bottle with lid that form no part of the claimed design.

A strap couples the upper cap portion of the lid to the lower cap portion of the lid. The perspective view of FIG. 1 shows the upper cap secured to and covering a spout portion of the lower cap. The perspective view of FIG. 8 shows the upper cap removed from the spout portion of the lower cap and stored to the side of the spout. The spout cannot be seen in FIG. 1, but is seen in FIG. 8. The position of the upper cap relative to the lower cap may vary within the constraints of the strap.

1 Claim, 8 Drawing Sheets
