(54) Title of the Invention: Force-activated thermal battery for use in a wellbore  
Abstract Title: Force-activated thermal battery for use in a wellbore

(57) A thermal battery positioned in a wellbore can be force activated by a device. The device can include a body coupled to a thermal battery positioned in a wellbore. The body can include a piston retained at a first position in an inner area of the body. The piston can move from the first position to a second position in response to a force applied to the body. The thermal battery can be activated by moving the piston to the second position.
