54 Toothbrush with double-bristled end and auxiliary toothpick.

57 This toothbrush is characterised by a working end (3) provided with bristles (4),(5) projecting from both its opposing faces so as to be able to also clean teeth by vertical movements consequent on rotating the toothbrush about its axis (2) by manipulating its symmetrical handle (1), which is aligned with said working end (3) and is provided with a housing (7) for an auxiliary toothpick (8).
