ABOUT THE INSTITUTE

The Philippine Institute for Development Studies (PIDS) was created on September 26, 1977 by virtue of Presidential Decree 1201 as an agency attached to the National Economic and Development Authority (NEDA). It is organized as a nonstock, nonprofit government corporation.

PIDS serves as the Philippine government's primary socioeconomic policy think tank performing policy-oriented research on various aspects of the Philippine economy to assist the government in formulating plans and policies that are based on research evidence.

Based on this mandate, it is the mission of PIDS to serve the interests of the Filipino people through the provision of rigorous analyses of policy issues that can guide policymakers and leaders in decisionmaking.

PIDS is ranked as one of the best think tanks in the world in the *Global Go To Think Tank Index Report* annually published by the Think Tanks and Civil Societies Program of the University of Pennsylvania.

It has been an ISO-certified organization since 2019.

OUR VISION

By 2025, PIDS is the country's foremost think tank and a globally recognized policy research organization.

OUR MISSION

To provide relevant, reliable, and timely policy research to guide policymaking and enable informed public discourse in the country.

OUR QUALITY POLICY

- ✓ We uphold excellence and commitment to public service by providing and promoting policy-oriented research on development issues to assist the government in evidence-based policymaking.
- ✓ We adhere to legal, professional, and ethical standards in the conduct and dissemination of policy research.
- ✓ We abide by standards of professionalism and competence in all levels of the organization.
- ✓ We commit to the continual improvement of our personnel, processes, and our Quality Management System.

AS WITH THE REST of the country and the world, it was a challenging year for us, but we coped with everyone's hard work and cooperation.

The whole stretch of 2020 saw us revisiting our strategies to adapt to a new work setup and ensure the health and safety of everyone as we faced the pandemic. We also endeavored to forge closer ties with one another despite the physical distance that separated us.

The first few months were particularly challenging as we tried to navigate the situation. The rising cases of COVID-19 and the ensuing lockdown astounded us all, but just like in any emergency, we needed to act fast. We immediately installed the needed health and safety measures in accordance with Department of Health guidelines and the procedures in transitioning to alternative work arrangements following Civil Service Commission regulations. Support services were provided to all staff, such as subsidy for internet expenses, provision of desktop or laptop for those without computer units to use at home, and transportation assistance for those who needed to report to the office physically.

By May 2020, we were almost fully operational. It was also at this time of the year when we welcome the appointment of Secretary Karl Kendrick Chua as the acting Socioeconomic Planning Secretary and Chairperson of the PIDS Board of Trustees.

Our research program continued despite the difficulty of collecting data face-to-face. We overcame this by shifting to online data collection tools. Our research teams also closely coordinated with relevant agencies and organizations for their data needs.

By the end of December, we have completed 61 research projects while 22 were ongoing. The Institute also managed to continue forging strategic partnerships with various organizations. PIDS entered into 12 memorandums of agreement with the following organizations: United Nations Children's Fund, International Development Research Centre, Asian Development Bank, Asia-Pacific Economic Cooperation Secretariat through the Department of Trade and Industry's Bureau of International Trade Relations, Department of Information and Communications Technology (DICT), United Nations Development Programme, United Nations Economic and Social Commission for Asia and the Pacific, Department of the Interior and Local Government, Technical Education and Skills Development Authority, and Center for International Knowledge on Development; and

PRESIDENT'S MESSAGE

two memorandums of understanding with the Intellectual Property Office of the Philippines and DICT.

Fulfilling its role in national policy as the main socioeconomic think tank of the government, PIDS pursued the following studies as part of its contributions to the response of the government to the COVID-19 pandemic: (1) Projected Disease Transmission, Health System Requirements, and Macroeconomic Impacts of COVID-19 in the Philippines (DP 2020-15), (2) Poverty, the Middle Class, and Income Distribution amid COVID-19 (DP 2020-22), and (3) Mitigating the Impact of COVID-19 Pandemic on Poverty (DP 2020-25).

We also produced 1 book, 5 issues of the *Research Paper Series*, 1 issue of the *Philippine Journal of Development*, 1 issue of the *Economic Policy Monitor*, 9 Policy Notes, 4 issues of the *Development Research News*, and 59 Discussion Papers.

Despite the lockdowns, we managed to sustain our seminars and events by going virtual. We were able to organize 31 events, 27 of which were webinars. These were attended by more than 5,000 participants from various sectors and by viewers on Facebook.

We also continued distributing printed copies of our new publications to our key networks in government, higher education institutions, research institutes, private sector, nongovernment organizations, local government units (LGUs), international organizations, state colleges and universities, and PIDS Corners across the country. Furthermore, we enhanced our online tools, which included our website, social media pages, and knowledge databases.

In addition to the publications download survey that we started in 2019 to monitor the utilization of our studies, we began tracking the citation of our studies via the Research Papers in Economics (RePEc) and Google Scholar databases. It was heartening to see so many of our studies being used by other scholars in their work. So far, we monitored through RePEc a total of 645 PIDS studies with 1,859 citations. In Google Scholar, we monitored 1,009 PIDS studies with 10,425 citations.

The media remained very supportive of us. We had 661 citations in both print and online media in 2020, 53 percent higher than in 2019.

We also continued to assist our legislators in the crafting or deliberation of proposed bills in both houses of Congress. Our senior researchers participated in 18 congressional meetings/hearings, technical committees, or working groups, and submitted position papers or comments as inputs to 46 proposed pieces of legislation pending before the Senate and the House of Representatives. We also monitored several House bills filed in the 18th Congress that directly cited or referenced PIDS studies. We also provided initial evidence of the utilization of our policy recommendations based on the feedback of some policymakers and government officials.

Our Development Policy Research Month (DPRM) celebration in September transpired and remained well-attended despite the shift to virtual mode. In response to the pandemic, we chose the theme “Bouncing Back Together: Innovating Governance for the New Normal” to rouse our collective consciousness as a nation as we move forward to recover from this pandemic and face other challenges. Through this theme, we hoped to emphasize the need to innovate governance across all sectors of society to steer the country toward the path of renewed growth and dynamism.

We organized and conducted three virtual events to mark the DPRM: a kickoff seminar, a forum that we co-organized with Mindanao Development Authority and Ateneo de Davao University, and the four-part Annual Public Policy Conference, which is the main and culminating activity of the DPRM.

We also continued to cultivate productive relationship and engagement with key international networks, such as the APEC Study Centers Consortium, East Asian Development Network, Global Trade and Policy Alliance, Network of East Asian Think Tanks, and Research Institutes Network.

Amid the challenges brought by the pandemic, I am pleased to share that the Institute was conferred with the Program to Institutionalize Meritocracy and Excellence in Human Resource Management (PRIME-HRM) Bronze Award on August 18, 2020, based on the validation conducted by the Human Resource Policies and Standards Office of the Civil Service Commission-National Capital Region.

I am also proud to tell you that we passed our first surveillance audit this year for the ISO certification we got in 2019.

You will find more details of our activities and accomplishments in 2020 as you leaf through the pages of this annual report.

On behalf of the PIDS family, I would like to thank you all for your continued support.

Rest assured that PIDS will remain committed to serving the Filipino people through policy research.

CELIA M. REYES
President

2020-2025

RESEARCH AGENDA

Catching FIRE as the Global Economy Reshapes

IN RESPONSE TO the demand for systematic and comprehensive studies that can guide and support planning and policymaking, the Philippine Institute for Development Studies (PIDS) regularly crafts a five-year research agenda to have an objective prioritization of prevailing domestic and global issues that affect the country.

The new research agenda 2020-2025 covers emerging policy issues that need to be studied thoroughly not only by PIDS but by other research and academic institutions as well. Anchored on the *AmBisyon Natin 2040* as a guiding vision, the report proposes topics revolving on the following major themes: Fourth Industrial Revolution (FIRE), climate change, trading arrangements, competition framework, and inequality.

The agenda was crafted by an external team of experts consisting of Dr. Mario Lamberte (project leader), Dr. George Manzano, and Dr. Alvin Culaba (members). The methodology included desk review, key informant interviews with key officials and representatives of government agencies, academe, private sector, civil society, and international organizations, and focus group discussions with PIDS research fellows and management committee.

You may download the full version of the PIDS research agenda at <http://bit.ly/pidsagenda2020>.

61 PROJECTS COMPLETED IN 2020

 13 AGRICULTURE, NATURAL RESOURCES, AND ENVIRONMENTAL MANAGEMENT	 16 PUBLIC ECONOMICS AND GOVERNANCE
 17 HUMAN DEVELOPMENT, LABOR MARKETS, AND POVERTY	 2 REGIONAL, URBAN, AND RURAL DEVELOPMENT
 2 INSTITUTIONS, LAW, AND ECONOMICS	 5 SCIENCE, TECHNOLOGY, AND INNOVATION
 1 MACROECONOMICS, FINANCE, AND GROWTH	 5 TRADE AND INDUSTRY AND INTERNATIONAL ECONOMY

22 ONGOING PROJECTS BY END OF 2020

 3 AGRICULTURE, NATURAL RESOURCES, AND ENVIRONMENTAL MANAGEMENT	 4 PUBLIC ECONOMICS AND GOVERNANCE
 8 HUMAN DEVELOPMENT, LABOR MARKETS, AND POVERTY	 4 SCIENCE, TECHNOLOGY, AND INNOVATION
 1 MACROECONOMICS, FINANCE, AND GROWTH	 2 TRADE AND INDUSTRY AND INTERNATIONAL ECONOMY

COMPLETED STUDIES

The inability to do face-to-face data collection in 2020 due to the COVID-19 pandemic posed a significant challenge to the Institute's research program. A shift to online data collection tools was made for studies in need of primary data. The research teams also closely coordinated with relevant agencies and organizations for their data needs.

AGRICULTURE, NATURAL RESOURCES, AND ENVIRONMENTAL MANAGEMENT

Assessing the Resurgent Irrigation Development Program of the Philippines

This paper synthesizes the findings of the component studies under the resurgent irrigation development assessment. Among its recommendations include improving irrigation system design and watershed management, conducting environmental assessments, establishing an asset management plan and baseline data, determining the appropriate level of operations and maintenance funds, using technology in monitoring and evaluation and data collection and analysis, using modeling in system water allocation management, and establishing a reliable and up-to-date database on water supply and

demand to improve the allocation of water rights. It also suggests that the National Irrigation Administration beef up its technical capacity and better understand the bottlenecks in program implementation. It also recommends having a shared vision, goals, and objectives among government agencies and other sectors to motivate them to work together, pool and share resources, synergize, and agree on strategic directions for watershed management.

Development of Crop Climate Calendars for High-Value Crops in Atok, Benguet: Report from Preliminary Co-Learning and Co-Development Engagements with Agricultural Stakeholders in Benguet Province

Crop climate calendars augment traditional crop calendars by specifying planting and harvest schedules and describing phenological states, cultivation practices, and weather and climate requirements that any crop faces throughout a

cropping season. Its value to Benguet is compelling as this mountainous province experiences a unique microclimate and phenomena (e.g., frost and hail) and derives income from the cultivation of high-value crops (e.g., carrots, cabbage, and potatoes) amid this challenge. This study aims to understand farmers' experiences and assist them in constructing their crop climate calendars. If constructed well and used properly, they are a valuable tool for agricultural extension workers and farmers in making climate-sensitive agricultural decisions.

Barriers to Application of Weather and Climate Information in Cut Flower Production in Benguet

This paper explores the barriers in applying weather and climate information to cut flower production in Atok, Benguet, which has a competitive advantage in cut flower production due to its unique weather and climate. Results show that while barriers exist on the side of the weather agencies' dissemination of information, there also exist significant financial, infrastructural, and capacity barriers, including the lack of working capital to implement optimal decision alternatives dictated by adverse weather conditions, the absence of reliable phone service and power to disseminate and access the information, and the lack of forecasts translated into the vernacular or laymanized.

Developing Rapid Climate Decision Analysis Tool in Smallholder High-Value Crop Farming in Atok, Benguet

Weather and climate information are useful tools for smallholder farmers to manage climate risk. This paper discusses collected data and initial results in developing the rapid climate decision analysis (RCDA) tool applicable to smallholder high-value crop farming in Atok, Benguet. This excel-based tool harnesses farmers' and agricultural extension workers' knowledge and aids them in decisionmaking. Information gathered are yields, production costs, and prices by crop, season, and amount of rainfall. Rainfall is the most important weather and climate risk in Atok because most farms are rainfed and with limited sources of supplemental irrigation. The tool is being fine-tuned to make it more appropriate and user-friendly to farmers, agricultural extension workers, and other change agents involved in smallholder farming.

Barriers to Application of Weather and Climate Information in Smallholder Vegetable Farming in Benguet

This paper aims to understand the barriers to the access and use of weather and climate information in agricultural decisionmaking as a means to cope with the changing climate. Results show that while vegetable farmers see the value of using weather and climate information, there is no localized weather and climate information applicable to Benguet's microclimate. The provision of weather and climate information must also be supported with other interventions, such as access to low-cost credit, to enable farmers to implement the optimal decision alternative.

Agricultural Employment and the Rural Household: A Characterization for Selected Provinces in the Philippines

This study addresses data gaps on the socioeconomic profile of agricultural workers within rural households. Using a survey, it collected panel data on the full range of rural households' labor and economic activities with agricultural workers, including patterns of employment and seasonality, other relevant worker and household characteristics, and the community-level context. Results show that working-age individuals are more likely to become agricultural workers if they are male, older, less educated, and are in a barangay with better rural infrastructure and more remote from the urban center. Weekly working hours for agricultural workers are greater for younger, better educated workers, and in barangays nearer the urban center. The study notes several implications for policy and further research, including the need to nuance structural change in terms of sectoral employment trends, analyze the volatility of agricultural employment, aggressively expand quality schooling in the rural areas, increase investments in rural infrastructure, and design programs addressing the implications of gender.

The Role of Agrarian Reform Beneficiary Organizations (ARBOs) in Agriculture Value Chain

This paper evaluates how ARBOs participate in the value chain and engage actors along the value chain. Farmer organizations, such as ARBOs, are essential conduits for smallholders to participate,

especially in higher value chains, enabling them to pool resources, jointly carry out profitable activities, reduce risks and transaction costs, and operate on scale economies. However, many farmer organizations in the country have a low level of organizational maturity and are mainly formed to access funding. The paper suggests that farmer organizations and their participation in higher value chains can be improved by enabling farmer members to commit to the organization through equity participation, empowering farmer organizations to establish enterprises that will generate income for their members, and capacitating farmer organizations on building alliances/networking.

Boosting Agricultural Productivity through Parcelization of Collective Certificate of Land Ownership Awards (CCLOAs)

This paper identifies the benefits and problems concerning the subdivision of collective land titles. Based on findings of existing studies, individual land ownership positively impacts farmers' decisionmaking and their farming outcomes. The analysis of the Department of Agrarian Reform's Project ConVERGE's survey data provides evidence favoring the acceleration of the subdivision of CCLOAs. It likewise shows that parcelization needs to be pursued alongside other rural development strategies, such as farm consolidation. For a faster and smoother implementation of the program, a modern cadaster and record-keeping system should be adopted, and the agrarian justice delivery system of DAR should be improved.

The Unfinished Agenda of Trade Liberalization in Philippine Agriculture: Assessing the Impact of Reducing Tariff and Nontariff Barriers

Much progress has been made in pursuing the liberalization of agricultural trade in the Philippines. However, some significant tariff and nontariff barriers remain. This study evaluates the economic impacts of completing the policy reform agenda by removing these remaining trade barriers. Scenario analysis using computable general equilibrium (CGE) modeling finds that trade liberalization is associated with a more rapid expansion in imports and a wider agricultural trade deficit, slower growth of agricultural gross domestic product (GDP) and wages, and higher overall GDP and higher industry fiscal position and

national savings. Liberalization radically accelerates the growth of imports for hogs and sugar while slowing down the export contraction of coconut, banana, mango, and other exports. It slows down the output growth of most import-substituting goods while accelerating export-oriented sectors' output growth. Trade liberalization also accelerates growth in per capita consumption, as well as total per capita expenditure. Lastly, it increases social welfare, though the gain is small in relation to base year expenditure.

Did the Opening up of Rice Importation in the Philippines Worsen Income Poverty and Inequality? A General Equilibrium with Microsimulation Approach

Tariffication of quantitative restrictions on rice imports is a key policy reform of the Duterte administration. This study reviews recent trends in the rice market and assesses the poverty and distributional effects of rice tariffication using a CGE model with microsimulation. Owing to the price difference between domestic prices in the Philippines and exporting countries, rice imports have surged under tariffication. As a result, domestic prices have fallen, though gross marketing margins have increased, amplifying retail prices' drop on wholesale prices and *palay* prices. The price and associated economic adjustments are expected to cause an increase in income poverty as conventionally measured. However, the gains are relatively small and would diminish over time. The value of the poor's income loss is far below the amount provided by law to address problems in the rice economy with tariffication.

Land Tenure, Access to Credit, and Agricultural Performance of ARBs, Farmer-beneficiaries, and Other Rural Workers

Policymakers and donors have long viewed credit programs as salient means to develop the agriculture sector, especially small-farm agriculture. Using primary data from Project ConVERGE, this study analyzed the borrowing incidence among ARBO member-households, particularly those engaged in farm production. The results indicate that membership in an ARBO is associated with better credit access; borrowing ARBO agricultural households are better off than

“Ensuring available financing is necessary to keep small farmers and fishers above poverty and boost food security in the country.”

nonborrowing ARBO agricultural households; farmer associations/cooperatives are among the top sources of agricultural credit in the countryside aside from microfinance institutions; and CLOA-holding ARBO agricultural households have higher borrowing incidence than the average ARBO agricultural households. Strengthening credit retailers' capacity through training, especially in leadership and credit management, is needed to further improve their lending performance and widen their reach in the countryside.

Projecting Loan Demand from Small Farmers and Fishers in the Philippines

This study develops and applies a method for estimating loan demand from small farmers and fishers (SFFs) in the Philippines and projects future demand. It recommends revising the Small Farmers and Fisherfolk Indebtedness Survey's sampling design using the most recent Census of Agriculture and Fishers as sampling frame to make it nationally and regionally representative. The government should also ensure there is adequate fund, whether from the government or formal private sources, to meet the loan demand of SFFs for production purposes while

still maintaining prudence. Ensuring available financing is necessary to keep SFFs above poverty and boost food security in the country, given the continuing risks of supply chain disruptions.

Toward a More Sustainable Financing of Small Farmers and Fisherfolk's Agricultural Production

This paper looks into the SFFs' access to finance and provides recommendations on how the existing agricultural value chain financing (AVCF) can be made more inclusive and sustainable. In the short run, a facilitator-driven AVCF is recommended to pave the way for an inclusive AVCF. In the long run, the facilitator-driven AVCF has to evolve into an integrated AVCF with SFF associations and financial institutions closely linked to facilitate the value chain's various activities. Given that the value chain in the country is still traditional and setting up the requisites of successful AVCFs (e.g., capacitating SFFs, associations, and small cooperatives; conduits to link SFFs with input and output markets; forging linkages with institutional buyers) takes time, a buyer-driven AVCF can be explored as a second-best alternative in the long run.

“The financial capacity of local government units and households must be enhanced to provide better care for children. This goes hand in hand with efforts to mitigate violence and provide safe and clean environments for children to grow up in.”

HUMAN DEVELOPMENT, LABOR MARKETS, AND POVERTY

ECCD-F1KD Situation Analysis in KOICA-UNICEF Project Areas

Persistently high malnutrition remains a significant issue in the Philippines, especially across subnational regions, despite its sustained economic growth. The study aims to inform the development and implementation of health and nutrition initiatives, particularly those related to early childhood care and development (ECCD) for the first 1,000 days (F1KD) of children in UNICEF-KOICA areas in Northern Samar, Western Samar, and Zamboanga del Norte. The findings from the three case studies emphasize the need to enhance the financial capacity of both local government units and households to provide better care for children. This should come hand-in-hand with efforts to mitigate violence and provide safe and clean environments for children to grow up in. There is also a need for greater integration and clarity in the formulation, implementation, and monitoring of F1KD initiatives. Health workers' capacity building should be intensified as well as

the further education of parents and collaborative efforts to disseminate insights and provide services to every stakeholder.

Primary Health Care for Noncommunicable Diseases in the Philippines

Noncommunicable diseases (NCDs) have become the major cause of disease burden in the Philippines, accounting for 70 percent of the 600,000 deaths nationwide in 2019. The growing burden of NCDs in poor communities has implications on the country's poverty reduction efforts and economic prospects. Assessing the Philippine primary health care system's (PHC) readiness to manage the rising NCD cases, this paper finds that it remains historically designed and oriented to address infectious diseases and maternal and child health. This has led to episodic and fragmented delivery of health services. To improve the government's response to NCDs' growing threat, health reforms are needed in the areas of governance, financing, human resources, and technology use. It is also essential to accelerate the Universal Health Care Law's implementation to realize a modern, integrated, and PHC-oriented health system.

On the Employability of the Senior High School Graduates: Evidence from the Labor Force Survey

A follow-up to the 2018 study, this study intends to gauge the senior high school graduates' (SHS) actual labor market performance. It confirms the results in the earlier study that only a little over 20 percent enter the labor force, and more than 70 percent continue with their education. The mixed result in labor market outcomes—that SHS graduates sometimes perform better and sometimes poorer relative to their peers—indicates the need to re-examine the employment and entrepreneurial objectives of the SHS and assess and validate the effectiveness of the SHS curriculum's work preparation component. Furthermore, there is a need to continue working with employers to inform and demonstrate what SHS graduates can do and solicit their help in defining the right niche for SHS graduates in the labor market. Finally, this calls for continued close monitoring and generating empirical evidence that will help understand SHS graduates' role in the labor market.

Correlates of Test Performance of 15-year-old Students in the Philippines: Evidence from PISA

To provide evidence on the drivers of the quality of education in the country, this study focuses on the correlations of Philippine students' test performance to quantitatively measure the roles of individual, family, and school characteristics in test performance. It uses data from the 2018 Program for International Student Assessment (PISA), which measures students' literacy in mathematics, science, and reading, and includes a rich set of student, family, and school characteristics. In terms of individual characteristics, the estimation results show a consistent negative correlation between grade repetition, age at the start of primary schooling, and incidence of bullying and test scores across mathematics, science, and reading. For household characteristics, parental occupation and emotional support are positively correlated with test scores. For school characteristics, disciplinary climate provided a consistent positive correlation with test scores. The paper also finds puzzling results in learning time and teacher qualifications that require in-depth studies.

Future Science and Technology Human Resource Requirements in the Philippines: A Labor Market Analysis

This study aims to describe current trends in the supply and demand of science and technology (S&T) human resources in the Philippines. It finds that despite increasing demand for S&T human resources and indicators on employability prospects, many of the young do not pursue science, technology, engineering, and mathematics (STEM) careers. Thus, the government and the private sector should be incentivizing them toward STEM even as early as junior high school. Providing financial assistance or scholarships can be helpful but not enough. The study suggests gaining more insights into the various factors that affect the supply of S&T workers and providing supporting mechanisms to make the country's S&T human resources more agile.

Toward a Sustainable Online Work in the Philippines: Learnings from the Online Survey of Market and Nonmarket Work during the Enhanced Community Quarantine

This paper analyzes patterns of online work in the Philippines and looks into issues on skills, social protection, and other challenges, and provides ways to address these issues to make online work sustainable. It finds that (1) platform workers in the Philippines are young, which has implications on skill formation and human capital development since a quarter of Filipino online workers are performing tasks that are at the lower end of the value chain; (2) those who have no work experience have practically zero probabilities of including an online work in their current work portfolio; (3) they take advantage of economies of scope as they leverage skills and resources common across platform work and other economic activities; (4) women are more likely to engage in platform work than men; and (5) motivations in doing past platform work influence the worker's transition to a given work portfolio.

Online Work in the Philippines: Some Lessons in the Asian Context

This paper looks into some stylized patterns in online work in the Philippines within the bigger context of the Asian experience. It highlights some of the challenges that pertain to skills and social protection. It recommends creating skills and

training systems that apply to any work setting, not just platform work, designing a social protection system that covers all workers, strengthening infrastructure support for the creative industry and the creative process outsourcing, and exploring platform economy as an area of cooperation among Asian nations.

Updating of UN Common Country Assessment for the Philippines

The Common Country Assessment (CCA) is a tool that provides grounding and direction for the United Nations (UN) Sustainable Development Cooperation Framework. It presents an overview of the trajectories of national outcomes over the years and examines areas for improvement. Released in 2018, the last CCA underpins the *Partnership Framework for Sustainable Development (PFSD) 2019-2023* between the UN and the Philippines. Given recent developments, especially the coronavirus disease 2019 (COVID-19) pandemic and its socioeconomic impacts, the key assumptions and development trajectories envisaged in the PFSD 2019-2023 and the CCA underpinning the PFSD may no longer be valid. The newly formulated CCA notes that the trajectory of the Philippine Sustainable Development Goal (SDG) indicators is off-track and will be exacerbated by the pandemic. It shows how COVID-19 impacts the three pillars of the PFSD, namely, people, prosperity and planet, and peace.

Review of Indigenous Peoples Policy and Institutional Grounding

Indigenous peoples and cultural communities have been typically caught in the middle of development projects, extractive industries, and land use, infringing on their fundamental rights and the domains they call home and disrupting their natural way of life. This study reviews the Indigenous Peoples Rights Act provisions and how it ties up salient provisions with implementation outcomes. The analysis shows that while the landmark legislation seemingly provided and safeguarded their basic core rights, the situation on the ground proved otherwise. It also reveals the implementation challenges faced by the National Commission on Indigenous Peoples tasked to implement the law. These challenges include limitations on fiscal and labor resources, policy overlaps on resource management and tenurial conflicts, and weak process and anthropological documentation of ancestral domains.

Projected Disease Transmission, Health System Requirements, and Macroeconomic Impacts of the Coronavirus Disease 2019 (COVID-19) in the Philippines

This study discusses the potential socioeconomic impacts of the COVID-19 pandemic in the Philippines under different scenarios, the projections on the resource requirements needed by the health sector to cope with the pandemic, and the possible burden of COVID-19 on the Philippine macroeconomy. It notes that aggressive efforts in the post-enhanced community quarantine (ECQ) period to isolate at least 70 percent of infectious cases through better contact tracing, social distancing, individual or household isolation, and reduced delays in time to seek care for symptomatic patients are necessary to suppress the outbreak. For all scenarios that do not successfully isolate at least 70 percent of infectious individuals, demand for healthcare resources at the peak of the outbreak, i.e., by August 2020, far exceeds available supply in the health sector. The Philippine economy may lose between PHP 276.3 billion (best case) and PHP 2.5 trillion (worse case) due to COVID-19. The transport, storage, and communication sector is expected to suffer substantial losses because of expected declines in tourism (PHP 11.7-124.3 billion). Extending the ECQ by one more month may potentially cost the Philippine economy at least PHP 150 billion due to possible declines in household consumption as workers remain unemployed for longer periods.

Poverty, the Middle Class, and Income Distribution amid COVID-19

This study presents an updated profile of the poor and various segments of the income distribution based on the 2018 Family Income and Expenditure Survey. It also simulates the likely effects of contractions in per capita income on poverty and the entire income distribution amid the COVID-19 pandemic. The study finds that in a medium-case scenario of declines of incomes by 10 percent across the entire income distribution, the number of poor Filipinos can increase by 5.5 million; with emergency financial subsidies (i.e., the social amelioration program and the small business wage subsidy in place), only 1.5 million would fall into poverty. These results illustrate the importance of providing social protection for the poor and the nonpoor segments that could likely fall into poverty. The study also urges the

“Long-term measures and an inclusive economic recovery process must be put in place to enable the most affected to bounce back quickly from the COVID-19 crisis and avoid falling into chronic poverty.”

Philippine Statistics Authority to review its official poverty measurement system, given the changes in income and expenditure patterns in the past decade (before the onset of COVID-19).

Does Economic Growth Benefit the Poor? Evidence from the 2015–2018 Growth Episode

The Philippines is generally winning its fight against poverty, given the substantial decrease in the magnitude, incidence, intensity, and severity of poverty in 2018. Poverty decomposition analysis shows that economic growth and income redistribution have equally contributed to this decline. However, poverty continues to vary widely across the regions. Given these, the government has been implementing various policies and programs to further address poverty and inequality. The global COVID-19 pandemic, however, which caused economic recession in many countries, including the Philippines, can reverse the gains made in recent years and push poverty rates even higher than the 2015 levels. Thus, government efforts to contain the spread of the virus are critical to restart and steer the economy back to its growth path. Moreover, safety

nets are also essential to help affected individuals and families recover more quickly.

Mitigating the Impact of the COVID-19 Pandemic on Poverty

Poverty simulations under different scenarios on the impacts of COVID-19 suggest that the pandemic will increase the number of poor people in the country. Both national and local governments have implemented different emergency assistance programs to help affected individuals, families, and enterprises cope with the economic effects of COVID-19 and smoothen their consumption. Among others, the paper recommends long-term measures and an inclusive economic recovery process to enable the most affected to bounce back quickly from the crisis and avoid falling into chronic poverty, having a universal health insurance with greater benefits to assist in future health-related public emergencies, establishing a stronger infrastructure so that response to future shocks and hazards will be done more efficiently, and developing interoperable databases across government for easier and more accurate identification and targeting of potential beneficiaries.

Who Wins and Who Loses from PhilHealth? Cost and Benefit Incidence of Social Health Insurance in a Lifecycle Perspective

This study examines the National Health Insurance Program's (NHIP) financial costs and benefits through the Philippine Health Insurance Corporation (PhilHealth). It finds the current system of premium contributions and benefits payment fiscally unsustainable, with the NHIP estimated to lose about 40 centavos for every peso an individual contributes directly or indirectly as a premium to PhilHealth. As a government reallocation program that provides a social safety net to ensure universal access to health care, benefits may need to be further increased to encourage pro-social health-seeking behavior, especially among the poor. As a pseudopension system that transfers resources from current workers to retirees for health spending, these benefits may need to be re-assessed based on current and future workers' capacity to carry the burden of financing these entitlements. As a health insurance program, population risks and utilization levels need to be rigorously accounted for to ensure that the system remains actuarially fair.

Impacts of the Sustainable Livelihood Program's Microenterprise Development Assistance with Seed Capital Fund on Poor Households in the Philippines

This study evaluates the impact of the Microenterprise Development (MD) assistance provided by the Department of Social Welfare and Development's (DSWD) Sustainable Livelihood Program. This assistance consists of capacity building, group formation, and a seed capital fund grant of PHP 10,000 per household used as a startup or additional microenterprise capital. The microenterprise may be run individually or as a group. The findings show that the MD intervention increased the number of hours worked, labor force participation, and employment rate among spouses in poor households that used the grant for individual business. Labor impacts among households that used the grant for group projects were smaller. There was no improvement in household income, expenditure, savings, and capital investment, which seem plausible given reported problems in business implementation, such as high rate of business closure, low profitability, and lack of participation of group

members. The study concludes that livelihood assistance to the poor should be combined with other risk-reducing interventions. It recommends that DSWD consider the relative advantages and disadvantages of group-based and individual livelihood projects and improve business project selection and the quality of its support services.

Deepening the Narrative: Qualitative Follow-up Study on the Third Impact Evaluation of *Pantawid Pamilya*

This study provides deeper insights into selected outcomes of the third impact evaluation of the *Pantawid Pamilyang Pilipino* Program (4Ps), where unexpected results on child nutrition, maternal health, and labor market outcomes were observed. The analysis of the results shows that the lack of proper understanding of the importance of postnatal check-ups can be the reason for the low avialment even if the utilization of prenatal check-ups is high. There appear to be no differences in the nutrition-related knowledge, attitudes, and practices between Pantawid and non-Pantawid beneficiaries, suggesting that the explanation for the perverse program impact on stunting may come from other factors not captured in the study. The perverse employment outcomes appear to result from low educational attainment and the lack of and seasonality of job opportunities.

Giving Cash to the Poor: A Study of *Pantawid Pamilya* Cash Grants Generosity, Frequency, and Modality

This study assesses the payment system of the 4Ps in terms of the benefit levels or amount of cash transfers, frequency, and mode of payment delivery. The results show that the program should consider adjusting the cash grants' benefit level to account for inflation. There is no strong demand from the beneficiaries for more frequent payouts. Changes in payment frequency should also be carefully examined to know if benefits outweigh the additional operations costs. Although the payment delivery system has improved through the years due to the shift to cash cards in the grants' release, other enhancements may help. These include improving the beneficiaries' access to reliable ATMs and/or banks where they can withdraw their grants, streamlining program procedures to reduce the processing time of beneficiary updates and grievances, and improving the payment IT systems and monitoring.

“The ability of platforms to engage in cross-border transactions or operations is affected by the stringent requirements of data protection laws, coupled with the divergent regulations among jurisdictions.”

INSTITUTIONS, LAW, AND ECONOMICS

Cross-border Issues for Digital Platforms: A review of Regulations Applicable to Philippine Digital Platforms

This paper identifies specific policy issues in the Philippines' current regulatory infrastructure that prevent digital platforms from innovating and participating in the global digital economy. These issues include the incoherence between the government's national innovation strategy and the mishmash of regulations that digital platforms are subjected to. These regulations pertain to investment regulations and regulations on mass media, retail, advertising, logistics, telecommunications, and education. Such a landscape has led to a regulatory environment that is unable to provide certainty as to the legality of the activities of Philippine-based digital platforms.

Cross-border Data Regulation for Digital Platforms: Data Privacy and Security

The rise of digital platforms entails the processing of personal data between platforms and their users. More than enabling the delivery of services by the platforms, data shared by users have increasingly become valuable as various businesses can leverage their access to data to create and upsell other services. However, the ability of platforms to engage in cross-border transactions or operations is affected by the stringent requirements of data protection laws, coupled with the divergent regulations among jurisdictions. With the Philippines as an example, this paper underscores the salient points in existing data protection regulations and the impact of these principles on both platforms and data subjects. It emphasizes the need to push for stronger intergovernmental and regional data protection frameworks and presents recommendations to facilitate digital platform transactions with due consideration to personal data protection and national security considerations.

MACROECONOMICS, FINANCE, AND GROWTH

PIDS-BSP Annual Macroeconometric Model for the Philippines: Preliminary Estimates and Ways Forward

Given new programs and policies in the Philippines, there is a need to formulate a macroeconometric model (MEM) to gain more insights into how the economy and its sectors are affected. This paper discusses an annual MEM estimation useful for policy analysis and forecasting concerning the opportunities and challenges brought about by new developments. The formulation of an annual MEM can assist major macroeconomic stakeholders, such as the National Economic and Development Authority (NEDA) and the *Bangko Sentral ng Pilipinas* (BSP), in their policy simulations, macroeconomic surveillance, and economic analysis. Given this backdrop, PIDS and BSP have collaborated to estimate an annual MEM, which has four blocks, namely, real sector, fiscal sector, trade sector, and monetary sector.

PUBLIC ECONOMICS AND GOVERNANCE

Baseline Study on Policy and Governance Gaps for the Local Government Support Fund Assistance to Municipalities (LGSF-AM) Program

One major challenge in assessing the impact of various national government interventions is the lack of baseline data. This study aims to identify policy and governance gaps in infrastructure and planning to provide baseline data on key areas and current planning practices of local government units (LGUs). It reveals the LGUs' low revenue effort and low utilization of their local development fund due to poor planning. The study recommends improving LGUs' compliance in the regular updating of their multisectoral development plans, revisiting the basis for establishing the current situation of a locality, improving project readiness and feasibility, and strengthening capacity development programs to address governance gaps in development planning.

Assessment of the Performance Challenge Fund and the Seal of Good Local Governance: Perceptions from Municipalities

This study evaluates the Performance Challenge Fund (PCF), a performance-based incentive program that gives financial subsidies to LGUs awarded the Seal of Good Local Governance (SGLG). It uses the results of a survey of 1,373 Philippine municipalities, which focus on the perceptions of the municipal planning team's core members on the usefulness and importance of the PCF. Appreciation of the PCF was high, but 20 percent of the surveyed municipalities were never eligible to receive it. Most of these municipalities were from the fifth and sixth income classes and concentrated in the Bicol and Central and Eastern Visayas regions. Furthermore, there were some LGUs that were either consistently recipients or consistently not recipients of the PCF. These results can help policymakers prepare for the implementation of the Seal of Good Local Governance Law.

Fiscal Decentralization and Health Service Delivery: An Assessment

This study determines the impact of fiscal decentralization on health service delivery in LGUs. The findings suggest that greater health decentralization has a negative impact on access to hospital inpatient services and access to sanitation (toilet). This is consistent with the narrative in the literature that points to the lower province-level spending on hospitals due to the mismatch between the cost of devolved hospitals and the internal revenue allotment (IRA). These adverse effects have remained because most LGUs do not have adequate health budgets to maintain and upgrade devolved health facilities. The study thus underscores the importance of a sound financial resource base for LGUs to reap decentralization benefits.

Efficiency of Local Governments in Health Service Delivery: A Stochastic Frontier Analysis

This study analyzes the efficiency implications of fiscal decentralization using stochastic frontier analysis (SFA). The findings lend empirical

evidence to what the literature says about the health devolution experience in the country. Issues on the mismatch between local government fiscal capacity and devolved functions, fragmentation of health system, the existence of a two-track delivery system, and unclear expenditure assignments, among others, inevitably create inefficiency. These issues should be addressed to fully reap the benefits (e.g., efficiency gains) of fiscal decentralization, particularly health devolution.

Assessment of the 2020 President's Budget

The government budget reflects the government's spending priorities. It is essential to assess whether the priorities outlined in the proposed 2020 President's Budget are consistent with the current administration's policy pronouncements. It also evaluates the overall fiscal picture projected in the proposed budget and its consistency with the macroeconomic assumptions. Also, it examines the national revenue program, which, together with the national expenditure program, indicates the overall fiscal health in 2020.

The Community-Based Monitoring System (CBMS) as a Local Planning Tool: Results from the PIDS-DILG Baseline Study on Policy and Governance Gaps for the Local Government Support Fund Assistance to Municipalities (LGSF-AM) Program

The study examines the use of the CBMS as a tool in drafting the local Comprehensive Development Plan. Results of a nationwide survey of 1,373 municipalities show that most municipalities use CBMS not just for ecological profiling in development planning but also for budget preparations and priority setting. Local governments allocate funds for CBMS data collection (primarily to hire data enumerators), but not regularly so. Furthermore, there was evidence that there could be improved utilization of existing CBMS data and indicators. These results seem to suggest that municipal development planning practices generally follow the DILG-prescribed development planning and recognize the importance of this being evidence-based. Among the identified areas for improvement include reorientating local planners on the CBMS and regularly updating the development indicators for more relevant and impactful development policies.

Evidence-based Local Planning and Budgeting Using CBMS

Local government units (LGUs) are mandated to deliver services to their constituents. However, a major challenge is the lack of disaggregated data to prepare local plans and budgets. This paper illustrates how the CBMS can address some of the Philippine Statistical System gaps to respond to local planning and budgeting needs. The study finds that since the CBMS provides disaggregated local-level data, local planners can use the CBMS to identify the needs of the population subgroups and formulate interventions to address these needs, cost these interventions, and target eligible beneficiaries of the programs.

Fiscal Sustainability, Equity, and Allocative Efficiency in the Light of the 2019 Supreme Court Ruling on the LGUs' Share in National Taxes

In April 2019, the Supreme Court ruled that the share of LGUs in the computation of the IRA is not only limited to the national internal revenue taxes but also includes customs duties and other taxes collected by the national government. This decision will increase the IRA share of local governments by PHP 225.3 billion in 2022. The study proposes that the IRA increase be sourced by unfunding programs, activities, and projects (PAPs) in the budget of some national government agencies intended to deliver functions of LGUs under the Local Government Code of 1991. It also underscores the need to design an equalization grant to address the horizontal fiscal imbalance across individual LGUs within each local government level and the matching grants program before 2022. Also, there is a need to revisit the relationship between the LGUs' propensity to generate own-source revenue and the size of their IRA.

Evaluation of the Effects of the Performance-Based Bonus Incentive Scheme

A follow-up to the 2019 process evaluation of the Performance-Based Bonus (PBB) scheme, this study examines the possible effects of the PBB. The findings suggest while the PBB has had some design issues and implementation challenges, the PBB is generally welcomed across the bureaucracy. Further, there is evidence that the PBB has contributed to boosting individual, team-level,

and agency-wide improvements in motivation and productivity. The results also suggest that PBB could be further redesigned to sharpen its effects on public sector reform. It recommends its continuation but with improvements to its design and implementation, including a moratorium on changes in PBB requirements, provision of capacity-building support for lagging agencies, and experimentation with incentives to support sectoral development outcomes.

The Philippine Local Government Water Sector

This study examines the regulatory structure of the Philippine water sector, particularly for local governments. Results show the need to address overlaps in regulatory agencies' mandates and streamline and align economic and technical regulation and operating standards. There is also a need to improve investment coordination within the sector to ensure efficient and strategic investments. Another recommendation is to develop a consolidated and complete database of water service providers and key performance indicators to better monitor water agencies' performance. Political economy issues must also be hurdled to avoid duplicative efforts or delayed investments in water.

Analysis of the 2021 President's Budget

The Philippines has been badly affected by the coronavirus disease pandemic. Thus, this analysis of the 2021 President's Budget determines how the pandemic has shaped the distribution of the government's limited financial resources, focusing on the top six departments/recipients for fiscal year (FY) 2021. It shows the high spending priority given to social and economic services, which is consistent with the government's policy pronouncements for FY 2021. Nevertheless, the emphasis on these spending priorities creates an expectation that the Department of Health (DOH) and the Department of Social Welfare and Development (DSWD) will rank much higher in the top 10 departments/recipients for FY 2021. The 2021 proposed budget gives higher spending priority on the maintenance of peace and order and national defense, which placed the Department of the Interior and Local Government and the Department of National Defense in a higher spot than DOH and DSWD.

Philippine Local Government Public Expenditure Review: A Survey of National Government's Local Government Support Programs

This study examines national government's support programs for local governments, particularly for devolved infrastructure services. In the past decade, the top three programs in terms of budgetary allocations are the Department of Public Works and Highways' Local Infrastructure Program, the Department of Agriculture's Farm to Market Road programs, and the DILG's Financial Subsidy to Local Government Units (LGUs). These programs have almost 100-percent budget utilization rates, yet have lower utilization rates of local development funds. These results underscore the need to strengthen local government oversight, especially if assistance programs will be discontinued in 2022 in light of the implementation of the Mandanas ruling. Oversight agencies should ensure that local governments spend on infrastructure using their mandated local development fund.

Review of the "Build, Build, Build" Program: Implications on the Philippine Development Plan 2017-2022

This study aims to delve into the "Build, Build, Build" program and the projects that comprise it to examine their implications on the *Philippine Development Plan (PDP) 2017-2022* targets. It finds that the latest list of infrastructure flagship projects is responsive to PDP targets in the areas of information and communications technology, transport and mobility, water resources, and power and energy. However, no major capital projects address the PDP targets in the areas of social infrastructure, technology adoption, and innovation. Thus, attaining the relevant PDP targets will depend mainly on priority infrastructure projects in the *Public Investment Program 2017-2022*.

An Analysis of Regulatory Policies on Solid Waste Management in the Philippines: Ways Forward

This study looks into the implementation of the Ecological Solid Waste Management Act. Results show varying implementation templates across study sites, reflecting different enabling mechanisms and replicable initiatives, and

“The latest list of infrastructure flagship projects under the ‘Build, Build, Build’ program is responsive to the Philippine Development Plan 2017–2022 targets in the areas of information and communications technology, transport and mobility, water resources, and power and energy. However, no major capital projects address the targets in the areas of social infrastructure, technology adoption, and innovation.”

mediocre policy grounding. Documented best practices include the legal waste facility transition of the Payatas dumpsite in Quezon City and the organization of its informal economy; the clustering of waste management service of Teresa, Rizal, and its province-wide incentive mechanism, partnership with construction companies, and the market linkages for revenue generation; and the strong partnership between the LGU and civil society organization in San Fernando, Pampanga.

Policy, Institutional, and Expenditure Review of Bottom-up Approach to Disaster Risk Reduction and Management

The Philippine Disaster Risk Reduction Management (DRRM) Act of 2010 has led to the passing of complementary legislation and functional policy, bureaucratic and institutional augmentations, and directed government budgeting and spending. This study looks into the status and trends of public investment and policy initiatives and bottom-up and participatory

mechanisms in the implementation of the DRRM Act. Findings reveal suboptimal allocations despite the abundance of fiscal resources in both national and subnational governments regardless of location and income levels. The low utilization rates were largely attributed to unclear issuances from oversight agencies and local administrations' spending preferences.

Innovating Governance: Building Resilience against COVID-19 Pandemic and Other Risks

The COVID-19 pandemic is the most challenging public health crisis the world has faced in a century. It serves both as an eye-opener and an impetus to leapfrog reforms to strengthen governance systems and structures. This background paper briefly scans recent literature of public sector innovations and other efforts implemented to enhance governance systems. The goal is to gather insights valuable for the Philippines to improve its governance strategies, improve overall performance in service delivery, and build resilience against risks in the long term.

“While social capital and social inclusion are important, other factors like improved capabilities and expansion of economic opportunities in the locality matter for the achievement of economic inclusion and improvement of well-being.”

REGIONAL, URBAN AND RURAL DEVELOPMENT

Looking at Local Government Resilience through Network Data Envelopment Analysis

The study looks into the resilience of provincial governance in the Philippines to disaster risk using World Bank socioeconomic resiliency estimates and cross-sectional data generated by the DILG and the Philippine Statistics Authority (PSA) during 2012-2013. It empirically shows that disaster risk reduction and management inputs at the provincial and subprovincial levels greatly contribute to improving socioeconomic capacity and decreasing asset risk. However, the decisionmaking unit (DMU) efficiency scores varied across the different subregional domains. A majority of provincial sub-DMUs also got higher efficiency ratings than their municipal/community sub-DMU counterparts, implying the need to rebalance support and disaster resilience-related initiatives at the subprovincial levels.

The Structure of Social Relations in the Community: An Empirical Analysis for Achieving Social and Economic Inclusion

This paper examines the extent of social networking between the poor and other segments of the community. It finds that the poor are integrated into the rest of the community, suggesting opportunities for productive interaction among the different groups. What seems to be the issue is the quality of their social capital and their closer linkage to other poor households. Another issue is their low ability to harness their social capital, perhaps because of a lack of education or capabilities. The evidence of homophily suggests the need for greater, more meaningful interactions among different clusters/segments. Another important aspect is the nature of economic activities present in the area. The paper concludes that while social capital and social inclusion are important, other factors like improved capabilities and expansion of economic opportunities in the locality matter for the achievement of economic inclusion and improvement of well-being.

“Those who live in the urban or more affluent areas, neither too old nor too young to utilize the technology, male, more skilled or educated, and have high levels of trust have better access to computers and the internet.”

SCIENCE, TECHNOLOGY, AND INNOVATION

Toward Measuring the Platform Economy: Concepts, Indicators, and Issues

This study defines platforms, typologies, and related definitions and classifications, describes drivers of value creation and capture in platforms, and discusses policy implications. It also tackles issues on data collection arising from the complex and cross-border nature of digital platforms. At the same time, it proposes possible approaches for obtaining data and indicators to measure the platform economy to allow policymakers, businesses, and the public to understand better the socioeconomic implications of increasing digitization and the rise of the digital economy. These approaches include re-engineering existing surveys conducted by the PSA (e.g., labor force surveys, business surveys, household and business surveys on ICT usage) and supplementing traditional data collection with alternative data sources, such as web scraping.

Digital Divide and the Platform Economy: Looking for the Connection from the Asian Experience

This study presents evidence of digital divide in Asia. Data from several countries show that certain segments of the population have better access (motivational, material, skill, and usage) to computers and the internet. These include those who live in the urban or more affluent areas, neither too old nor too young to utilize the technology, male, more skilled/educated, and have high levels of trust. To address the inequality that digital platforms may cause, policy interventions should address the provision of material access and other forms of divide.

Understanding the Costs and Benefits of Digital Platforms and the Implications for Policymaking and Regulation

This paper examines how digital platforms work and reviews their impacts across different sectors. The emergence of various digital platforms and the technologies that drive them will continue

to shape the Philippine economy and society in extraordinary ways. How well the country can manage the risks and exploit digital platforms' opportunities largely depends on finding the appropriate role of the government in the platform economy and the quality of regulatory governance. Apart from creating an enabling environment to encourage the growth of digital platforms, the government's role as regulator is crucial. There must be close collaboration among the agencies involved in different aspects of digital regulation. Whether or not the government should operate digital platforms must be carefully studied to ensure that such initiatives are sustainable.

Costs and Benefits of New Disciplines on Electronic Commerce

In January 2020, the Philippines joined the World Trade Organization Joint Statement Initiative on E-commerce that seeks to develop a multilateral agreement on trade-related aspects of e-commerce. This paper explores the costs and benefits of possible trade disciplines, particularly the moratorium on customs duties on electronic transmissions. It provides estimates of the foregone revenues. There are practical difficulties and policy constraints that could limit the actual intake from tariffs. Various barriers to cross-border data flows could also adversely affect not only data-intensive industries but also the economy more broadly. Thus, the country should support trade rules that facilitate cross-border data flows. Also, the government must invest in digital infrastructure for an efficient and effective tax system fit for the digital economy.

Emerging Tax Issues in the Digital Economy

This study reviews existing literature on emerging tax issues in the digital economy and their implications for the Philippines. The issues and challenges in taxation in the digital economy stem from its complex and multifaceted nature. Reaching a common understanding and measurement of the size and impact of the digital economy is critical in devising a tax regime. Issues in scoping and measurement of the digital economy and digital infrastructure gaps also need to be addressed. It is essential to eliminate these barriers and address the policy gaps to enhance the country's digital capacity.

TRADE AND INDUSTRY AND INTERNATIONAL ECONOMY

FTA Utilization of Philippine Imports

Free trade agreements (FTAs) enhance trade by reducing or eliminating barriers, such as tariffs on imported goods. The difference between the preferential tariff rate under an FTA and the most-favored-nation (MFN) rate can be significant enough to encourage trade under an FTA. The Philippines has signed several FTAs and enjoyed a reduction and even elimination of tariffs on specific commodities. This research aims to understand the relationship between preferential margin and FTA utilization rates. Findings suggest that the preferential margin is positively associated with the utilization rates for FTA agreements. Results are found to be relatively robust after controlling for different fixed effects variables. Among the Philippines' FTA partners, trade margin is revealed to be significant in increasing imports from its neighbors in the Association of Southeast Asian Nations. Furthermore, the study found a positive and significant relationship between margin and imports of nearly all commodity groups.

Joint Feasibility Study on the Possible Economic Cooperation Agreement between the Philippines and Taiwan

This two-year study investigates the potential of developing a bilateral economic agreement that would further enhance the Philippines' and Taiwan's economic relations and remove bilateral trade, investment, and other cooperation barriers. Recommendations on the overall economic cooperation agreement (ECA) include seeking a comprehensive ECA that encompasses liberalization and facilitation of trade and investment and economic and industrial cooperation, establishing a joint working group composed of representatives from public and private agencies, and establishing operational mechanisms to harmonize trade policies and improve bilateral economic ties. Meanwhile, recommendations on the sectoral industrial cooperation include, among others, developing industrial cooperation programs to attract Taiwanese firms to the Philippines, address trade-distorting nontariff measures, improving ease of doing business, and enhancing industrial development cooperation in accordance with development needs and mid- to long-term industrial plans.

“Free trade agreement imports have a positive and significant direct effect on industry growth and labor productivity.”

Impact of FTA on Philippine Industries: Analysis of Network Effects

The impact of FTAs has long been studied in the Philippines, but the network effects of FTA trade shocks and their resulting impact on industry performance have not been explored as much. This study contributes to filling that gap by calculating the direct impact of trade agreements on various sectors' performance. The results show FTA imports have a positive and significant direct effect on industry growth and labor productivity. The network effects, however, are not statistically significant for real gross value-added growth. The direct effect on employment is negative and statistically significant, but the network effects would temper this effect because the upstream effect arising from customers is positive and statistically significant. The shock also has a positive and statistically significant direct effect on labor productivity, which implies that increasing imports increases labor productivity of Philippine sectors.

How Does the Philippines Fare in Meeting ASEAN Economic Community Vision 2025?

This study focuses on the ASEAN Economic Community (AEC) Blueprint 2025 and assesses how the Philippines has fared in achieving the blueprint's key result areas. The results suggest the country is generally on track and is progressing

in the right direction. Considering the COVID-19 pandemic, the Philippines may call for an update of the AEC goals and strategies ahead of 2025 to deal with the pandemic's effects. There is also a need to reevaluate the Philippines' plans and indicators to capture the pandemic's impacts. While NEDA is actively assessing the PDP indicators, there is a need for the entire government, including local governments, to update their development plans incorporating some AEC targets.

Exploring the Feasibility of Content Analysis in Understanding International Cooperation in APEC

This paper explores the concepts and potential uses of content analysis in understanding international cooperation. For the Philippines, information on the Asia-Pacific Economic Cooperation (APEC) is scattered across different agencies and is collected through the APEC Policy Tools. The collection, however, is highly dependent on agency reports and does not accurately reflect APEC activities. Content analysis as a research tool transforms qualitative information that is present in these materials into quantitative data, thus can be used to supplement existing quantitative information or the lack thereof. With the aid of available tools, such as STATA and NVivo, utilizing available documents and databases can help produce patterns of information that can explain how APEC and its economies behave, as governed by different issues within and outside the region.

PHILIPPINE APEC STUDY CENTER NETWORK

THE PHILIPPINE APEC Study Center Network (PASCN) is a regular component project of PIDS. Established on November 23, 1996 by virtue of Administrative Order 303, it is the Philippines' response to the Asia-Pacific Economic Cooperation (APEC) Leaders' Education Initiative that called on member-economies to foster regional cooperation among higher education and research institutes on key regional economic challenges. PASCN is one of the APEC Study Centers (ASCs) that constitute the APEC Study Centers Consortium (ASCC).

PASCN MEMBERS:

MAJOR PROGRAMS:

UNDER THE RESEARCH PROGRAM, a study titled “Exploring the Feasibility of Content Analysis in Understanding International Cooperation in APEC” was completed and released as a PIDS Discussion Paper (DP 2020-58) in 2020. Meanwhile, an ongoing undertaking titled “Towards MSMEs Internationalization: Study on the Final Review of the Boracay Action Agenda (BAA)” is carried out by PIDS. Initiated by the Department of Trade and Industry-Bureau of International Trade Relations (DTI-BITR), this study aims to review and assess APEC’s overall progress in carrying out the BAA and develop recommendations to advance APEC’s work on micro, small, and medium enterprises (MSMEs),

including a possible new framework for MSME internationalization. In the pipeline is “Utilizing Data Science to Improve the APEC Policy Tools”, a collaborative research by Dr. Brenda Quismorio (UA&P) and Mr. Raymond Freth Lagria (UPD). It will form part of the Management and Expansion of the APEC Policy Tools, a database turned over to PIDS by the APEC-National Organizing Council in 2015.

Under the Thesis and Dissertation Assistance Program, grantees Madonna Daquigan and Maria Kristina Paler completed their research. The condensed versions of their master’s thesis and dissertation were circulated as Policy Notes (PN),

namely, “Mitigating Climate Change through Mangrove Forest” (PN 2020 08) and “Are Marine-protected Areas Sheltered from Plastic Pollution?” (PN 2020-09), respectively.

Under the Information Dissemination and Publication Program, two 2019 completed research grants were featured in the 2020 PIDS webinar series: “Aligning Supply of and Demand for Data Science and Analytics Workforce” (June 25) and “Assessing the Readiness of Filipino Professionals to Participate in the Mobility of Skilled Labor in ASEAN” (November 12). Aside from the aforementioned DP and PNs, an issue under the peer-reviewed *PIDS Research Paper Series* was released, titled “Assessing the Alignment of Data Science and Analytics (DSA)-related Undergraduate Programs with the Emerging Demands for DSA Workforce” (RPS 2020-04), a study completed in 2019. In addition, a 2018 completed paper was published in the *Philippine Journal of Development* (PJD): “Effect of Supply Chain Integration on Business Performance and Competitiveness of Philippine SMEs” by Elaine Q. Borazon and Vivien T. Supangco (UP Diliman) (PJD, Vol. 44 No. 2b). Another paper co-written by a researcher from a PASCN member-institution was also published in the PJD: “Possible Effects of China’s Belt and Road Initiative on Philippine Trade and Investments” by Marissa Maricosa Paderon (ADMU) and Ricardo Ang III (Georgia State University, USA) (PJD Vol. 44 No. 2c). A policy note titled “Aligning Higher Education with Demands for Data Science Workforce” (PN 2020-04) was released based on an earlier circulated DP (2019-34).

Moreover, the PASCN continued to network and participate in the annual ASCC conference. A virtual conference (e-ASCC Conference 2020) was convened on September 23 by the Malaysian APEC Study Centre at the Institute of Malaysian and International Studies, Universiti Kebangsaan Malaysia, on the theme “Towards an Inclusive, Sustainable Growth and Shared Prosperity Post-Pandemic”. Three of the 17 presentations were from PASCN member-institutions:

Panel 4: Inclusive Economic Participation through Digital Economy and Technology

- Mitigating Excessive Labor Migration of Nurses: A Theoretical Framework by Tereso Tullao Jr. (DLSU) and John Paolo Rivera (AIM)
- Developing a Strategy for Philippine Tourism Recovery Post-pandemic: A Systems Thinking Approach by Fernando Martin Roxas, John Paolo Rivera, and Eylla Laire Gutierrez (AIM)

Panel 5: Driving Innovative Sustainability

- Food Safety Management and Compliance among Selected Cacao Enterprises in Davao City by Yzabela Andrea Lim, Melodee Marciana De Castro, Dinah Pura Depositario, and Cherry Lou Nuñez (UPLB)

The conference concluded with a Roundtable Discussion on APEC Beyond 2020 attended by over 80 participants.

Through its Technical Assistance Program, the PASCN continued to provide support to government agencies, particularly the Department of Foreign Affairs and the DTI by participating in the virtual meetings of the Technical Board on APEC Matters (TBAM) (TBAM2: June 18, TBAM3: October 19, TBAM4: December 3) and the subcluster on Regional Economic Integration, Trade, and Investment (TBAM-REITI) and DTI-APEC Implementing Committee (DTI-AIC) (September 11). Under the TBAM-REITI, the PASCN project director and two PIDS research fellows are members of the Virtual Working Group on Digital Trade.

Specific technical assistance inputs/comments were provided to the following: (1) Virtual Senior Officials’ Meeting on APEC Ministers Responsible for Trade Statement on COVID-19 (May 7); (2) 62nd Initiative for ASEAN Integration Task Force (IAITF) Meeting and 10th Consultation Meeting of IAITF with ASEAN Partners (September 28); and (3) Implementation Plan of the ASEAN Comprehensive Recovery Framework (October 15).

The PASCN Secretariat also participated in the following consultation meetings with network members and relevant TBAM agencies to discuss possible collaborative research projects for APEC and/or local and international donor funding: (1) Philippine Center for Islam and Democracy (UPD), MSU, and UP-Davao Meeting on Bangsamoro Autonomous Region in Muslim Mindanao issues (February 17); (2) DTI-BPS Proposal on Improving Transparency of Pre-packaged Food Packaging and Labelling Laws, Regulations and Best Practices: Conference and Compendium (February 17); and (3) DTI-BITR on Regional Comprehensive Economic Partnership Project (December 11).

For its operational matters, the Secretariat organized a Steering Committee meeting on March 3 where the 2019 PASCN accomplishment report was presented, and the work plan for 2020 was agreed upon.

KNOWLEDGE

DISSEMINATION

IN 2020, CHALLENGED by the disruptive effects of the COVID-19 pandemic, the resulting lockdowns, and the shift to alternative work arrangements, the Institute intensified the use of online and web-based tools in knowledge dissemination. Its website and subsites and social media accounts provided up-to-date information on the Institute's knowledge products and services. As early as May, the Institute shifted to webinars as a substitute to face-to-face fora.

PUBLICATIONS

Books

In 2020, PIDS released the book, *Navigating the New Globalization: Local Actions for Global Challenges*, a compilation of the presentations made by esteemed experts during the Fifth Annual Public Policy Conference (APPC). It centers on the discussion of globalization's impact on Philippine trade, environment, public health, equity, social cohesion, and information sharing. The proceedings aim to provide government leaders, policymakers, the academe, and the public a valuable reference material on the New Globalization.

Research Paper Series

Five issues were published in the *Research Paper Series*, the Institute's peer-reviewed monograph series: (1) RPS 2020-01 on *Vulnerability to Poverty in the Philippines*, which estimates the vulnerability level of households to income poverty and highlights the importance of using both poverty and vulnerability estimates in government programs; (2) RPS 2020-02 on *Demographic Dividend: Trends and Prospects*, which documents the country's historical experience of the demographic dividend using new National Transfer Account time-series estimates; (3) RPS 2020-03 on *Nontariff Measures in the Philippines*, which studies the nontariff measures imposed by the different government agencies in the country; (4) RPS 2020-04 on *Assessing the Alignment of Data Science and Analytics (DSA)-Related Undergraduate Programs with the Emerging Demands for DSA Workforce*, which reveals the misalignment between the demand and the supply of DSA workforce in the Philippines; and (5) RPS 2020-05 on *The Assessment of the Free Irrigation Service Act*, which finds that free irrigation had the potential to benefit millions of individuals, although it only led to small savings in *palay* production cost.

Philippine Journal of Development

Volume 44, No. 2 was released during the year. Featured in this issue were the following articles: (1) *Role of Subjective Perception and Household Migration Culture in the Formation of Migration*

Intentions: Evidence from a Rural Village in the Philippines; (2) *Effect of Supply Chain Integration on Business Performance and Competitiveness of Philippine SMEs*; (3) *Enhancing the Philippine Legal, Regulatory, and Policy Framework for Distributed Energy Resources*; and (4) *Possible Effects of China's Belt and Road Initiative on Philippine Trade and Investments*.

Economic Policy Monitor

The *2019-2020 Economic Policy Monitor (EPM) on Innovating Governance: Building Resilience against the COVID-19 Pandemic and Other Risks* was released in 2020. An annual publication started in 2010, the EPM tackles present and future development challenges that have consequences for the Philippines. It also provides an assessment of the country's economic performance in the past year and the outlook for the current year, as well as an analysis of policies implemented in key economic sectors.

Policy Notes Series

Nine Policy Notes were published on various topics such as, but not limited to, environment, pollution, climate change, mining, irrigation, unpaid work, and impact of government policies, such as the Performance-Based Bonus scheme.

To ensure the quality and integrity of PIDS knowledge products, research outputs submitted for publication were subjected to iThenticate plagiarism check. These publications include Discussion Papers (DPs), Policy Notes (PNs), and manuscripts for the *Philippine Journal of Development* (PJD). For 2020, **77** manuscripts were subjected to iThenticate (59 DPs, 8 book chapters, 6 PNs, and 4 PJD articles). Similarities reported were properly addressed by the authors prior to the release of their publications.

Discussion Paper Series

Fifty-nine Discussion Papers were released online in 2020 with topics encompassing agriculture, education, environment and natural resources, finance, health, gender and development, housing, trade and industry, innovation, and impacts of the COVID-19 pandemic. The PIDS Discussion Paper Series constitutes studies in preliminary form circulated online to make them immediately available to stakeholders, encourage discussion, and solicit comments for their further refinement.

Development Research News

Four issues of this quarterly newsletter were published in 2020. The banner stories underscored the current mismatch between the skills learned by the graduates and those needed by the industry today, the importance of a strategic response to contain the COVID-19 pandemic and to mitigate its adverse impacts on the Philippine economy, the fiscal consequence of increasing local government units' share in the national taxes starting 2022 when the Supreme Court ruling on the petition to revisit the computation of the internal revenue allotment takes effect, and the country's poor information systems and infrastructure that are crippling the country's response to the pandemic.

See Annex C for a complete list of PIDS publications produced in 2020.

CIRCULATION AND DISTRIBUTION

Except for online publications that do not have print versions, such as the Discussion Paper Series and PIDS Updates, print copies of PIDS publications were distributed to the Institute's key networks from the national and local governments, academe, Congress, nongovernment organizations, international organizations, and private sector.

PIDS publications were distributed to regular recipients and subscribers as follows: books (472 recipients), Economic Policy Monitor (472 recipients), Research Paper Series (493 recipients), Philippine Journal of Development (513 recipients), Policy Notes (956 recipients), and Development Research News (1,763 recipients). The number of recipients of Policy Notes, Research Paper Series, and books varies based on the subject/topic of each issue/volume.

Library Services

The PIDS Library continued to support PIDS staff and other non-PIDS clients remotely. Links to free databases were regularly emailed to PIDS researchers to help in their research needs. The Institute subscribed to JSTOR beginning August 2020. Likewise, 10 new PIDS books were added to the library collection.

ONLINE AND SOCIAL MEDIA

PIDS website

The PIDS website continued to serve as a one-stop-shop for the full text of PIDS publications, press releases, past and future events, seminar presentations and videos, infographics, and comments of PIDS senior researchers on proposed laws submitted by lawmakers from both chambers (for details, see the Policy Influence section of this report), among other contents.

The PIDS website had an average of 1,537 unique daily visits in 2020, from 1,562 in 2019 and 1,191 in 2018.

PIDS Facebook

The PIDS Facebook was regularly updated with posts about new publications, infographics, seminar announcements, press releases, live stream of PIDS fora, and meaningful quotes delivered by PIDS resource speakers during seminars. In 2020, the Institute had 462 posts on its Facebook page. Gaining an additional 9,000+ new followers in 2020, the Institute had a total of 28,472 organic followers on its Facebook account by the end of 2020 from only 19,000+ in 2019.

PIDS Twitter

The PIDS Twitter account was regularly updated with tweets about PIDS webinars and information on new publications and forthcoming events. The Institute also continued livetweeting the highlights of its fora. A total of 1,926 tweets were made in 2020.

PIDS Twitter followers increased to 2,214 in 2020 from 1,890 in 2019.

ONLINE AND SOCIAL MEDIA INITIATIVES

Online Publications

Twelve issues of the **PIDS Updates** were released. Sent to PIDS regular contacts and subscribers, this monthly electronic newsletter is a compilation of newly released publications, forthcoming events, database updates, press releases, infographics, and videos.

The Institute also continued the **“Policy Issue at a Glance”**, an online infographic that features policy issues and research data culled from completed PIDS studies. The chosen format is intended to reach the online community and disseminate PIDS studies in a more catchy and easy-to-understand format. It is accessible through the PIDS website and social media pages. Six issues were released during the year: (1) How is the Philippines Faring in SDG Achievement? (Goal 8: Decent work and economic growth); (2) Fiscal and Governance Gaps among Municipalities in the Philippines; (3) Life After College: How Are Our Graduates Doing?;

(4) Leveraging Services for Regional Development in PH; (5) Do We Have Enough Health Workers in PH?; and (6) How Can PH Meet the Rising Demand for Data Workers?

A weekly online series called **“Fact Friday”** commenced in January 2018. This series features teasers of findings of PIDS studies to encourage PIDS followers to read the full study. Each issue is circulated through the PIDS Facebook and Twitter pages. Fifty-two Fact Friday issues were released in 2020

Also, a new weekly infographic series called **“PIDS InfoBits”** was launched in December 2020. Released every Monday, each issue features bite-size information from various PIDS studies. Three issues were released in 2020.

Annex D lists the electronic and social media materials produced by the Institute in 2020.

NUMBER OF PARTICIPANTS PER EVENT

SEMINARS AND EVENTS

The Institute organized and conducted 31 events, 27 of which were held virtually. Most of these events featured various completed research projects. The rest were virtual fora in celebration of the Development Policy Research Month (see page 39).

Some of these events were co-organized with international partners, such as the World Bank, Asian Development Bank, and the United Nations Economic and Social Commission for Asia and the Pacific.

See Annex E for a complete list of PIDS seminars and events.

PRESS RELEASES

Sixty-four press releases based on the activities and completed studies of the Institute were disseminated to the media and posted on the PIDS website.

See Annex F for details.

KNOWLEDGE

DATABASES

Socioeconomic Research Portal for the Philippines (serp-p.pids.gov.ph)

The Socioeconomic Research Portal for the Philippines (SERP-P) is a knowledge database of socioeconomic materials produced by PIDS, other Philippine academic and research institutions, government agencies, and international organizations. Its establishment in the year 2000 is in line with the mandates of PIDS to provide a common link between the government and research institutions and to establish a repository of socioeconomic research information. More than 50 partner-institutions from academe, research, government, international organizations, and civil society comprise the SERP-P Network.

In 2020, 244 new publications were added to the SERP-P database. These publications were contributed by the *Bangko Sentral ng Pilipinas* (BSP), Congressional Policy and Budget Research Department (CPBRD), De La Salle University - Angelo King Institute (DLSU-AKI), National Tax Research Council (NTRC), Silliman University, SEAMEO Regional Center for Educational Innovation and Technology (INNOTECH), SEAMEO Southeast Asian Regional Center for Graduate Study and Research in Agriculture (SEARCA), and PIDS.

With these additions, the portal had a total of 7,093 socioeconomic materials as of December 31, 2020. SERP-P had an average of 2,763 unique visits per day in 2020, 57 percent higher than in 2019. The increase could mean greater awareness of SERP-P among its potential users. It can also be attributed to the shift to the work-from-home arrangement and online learning, which require easy-to-access online resources.

Moreover, the production of the electronic newsletters *SERP-P News* and *SERP-P Monthly* continued in 2020. Each issue of *SERP-P News* put into the spotlight a specific socioeconomic issue and related publications available on the SERP-P database. It also featured a researcher and SERP-P partner-institution. Three issues of *SERP-P News* were produced in 2020 and featured irrigation, healthcare services, and local governance. Partner-institutions featured were UP Center for Integrative and Development Studies, UP School of Economics, and UP National College of Public Administration and Governance. Featured researchers included Dr. Agnes Rola, Prof. Orville Solon, and Dr. Alex Brillantes Jr. Meanwhile, *SERP-P Monthly* contained new SERP-P resources, upcoming events of SERP-P partner-institutions, featured publications, and the top 10 most downloaded publications in SERP-P for the month. Nine issues of *SERP-P Monthly* were produced and circulated to the SERP-P Network.

Economic and Social Databases

(econdb.pids.gov.ph) (gis.pids.gov.ph)

PIDS continuously updates its online economic and social databases, namely, Economic and Social Database (ESD) and GIS-based Philippine Socioeconomic Profile. ESD stores and maintains Philippine economic and social indicators both at the national and subnational levels, with some indicators presented in long-time series. The GIS-based Philippine Socioeconomic Profile, meanwhile, contains spatial data on economic and

social indicators and core local poverty indicators from the Community-Based Monitoring System, presented in geographical format. These indicators may be viewed at the national, regional, provincial, district, municipal, and barangay levels. Both databases are constantly upgraded to make their interfaces more user-friendly and their contents more relevant to the research community and the general public.

WHAT PEOPLE SAY ABOUT PIDS PUBLICATIONS, WEBSITE, OR THE INSTITUTE

Some comments received

“The website is super helpful, especially to graduate students like me who seek insights or inputs from my fellow researchers.”

“Thanks to PIDS for the valuable research on policy issues affecting various segments of society—from individuals, families, farmers, workers to industries. The research is informative, enlightening, authoritative, and useful.”

“PIDS is much respected for being the government sector’s only think tank. Every publication of PIDS is always a much-awaited one.”

“The studies and publications of PIDS are very helpful as reliable references in the conduct of studies and evaluation of policies, programs, and projects. These knowledge products are also very accessible through the PIDS portal. Congratulations!”

CITATION

OF PIDS STUDIES

In other publications

CITATION IS A GOOD measure of utilization. Compared to a downloaded publication whose actual use is uncertain, a citation clearly shows that a publication served as a reference in writing a paper. Beginning the third quarter of 2020, the Institute started to monitor the citation of its studies in other publications.

Based on RePEc (Research Papers in Economics), an open-access portal of economic literature with over three million items that can be downloaded in full text, 645 PIDS studies had a total of 1,859 citations as of December 31, 2020. The following table shows the breakdown by publication type. The number of citations is from the time the publication was released.

Citation monitoring via RePEc (Research Papers in Economics) - ideas.repec.org

Publication Type	October		November		December		Total No. of Citations
	No. of Publications Cited	No. of Citations	No. of Publications Cited	No. of Citations	No. of Publications Cited	No. of Citations	
Discussion Papers	414	1,249	15	18	13	25	1,292
Working Papers	70	160	0	0	0	0	160
Research Paper Series	23	73	2	3	0	0	76
Philippine Journal of Development	123	317	6	11	2	3	331
Total	630	1,799	23	32	15	28	1,859

In November, the Institute extended its citation monitoring to Google Scholar. Using this search engine, the Institute monitored a total of 1,009 PIDS studies with 10,425 citations as of December 31, 2020.

Citation monitoring via Google Scholar - scholar.google.com

Publication Type	November		December		Total No. of Citations
	No. of Publications Cited	No. of Citations	No. of Publications Cited	No. of Citations	
Discussion Papers	372	2,873	343	4,307	7,180
Economic Policy Monitor	5	24	1	1	25
Philippine Journal of Development	48	360	60	863	1,223
Policy Notes	87	437	89	574	1,011
Research Paper Series	19	198	26	410	608
Books	6	43	28	335	378
Total	537	3,935	547	6,490	10,425

In the media

The media serves as a partner of the Institute in knowledge dissemination. Mentions or citations of a study by the media in print and online newspapers can help generate awareness that can lead to the study's utilization by policymakers, researchers, and other potential users.

From January to December 2020, 661 articles published in both print and online media cited PIDS, its studies, or researchers.

Citations in the media, 2020

Media citations of PIDS, 2010-2020

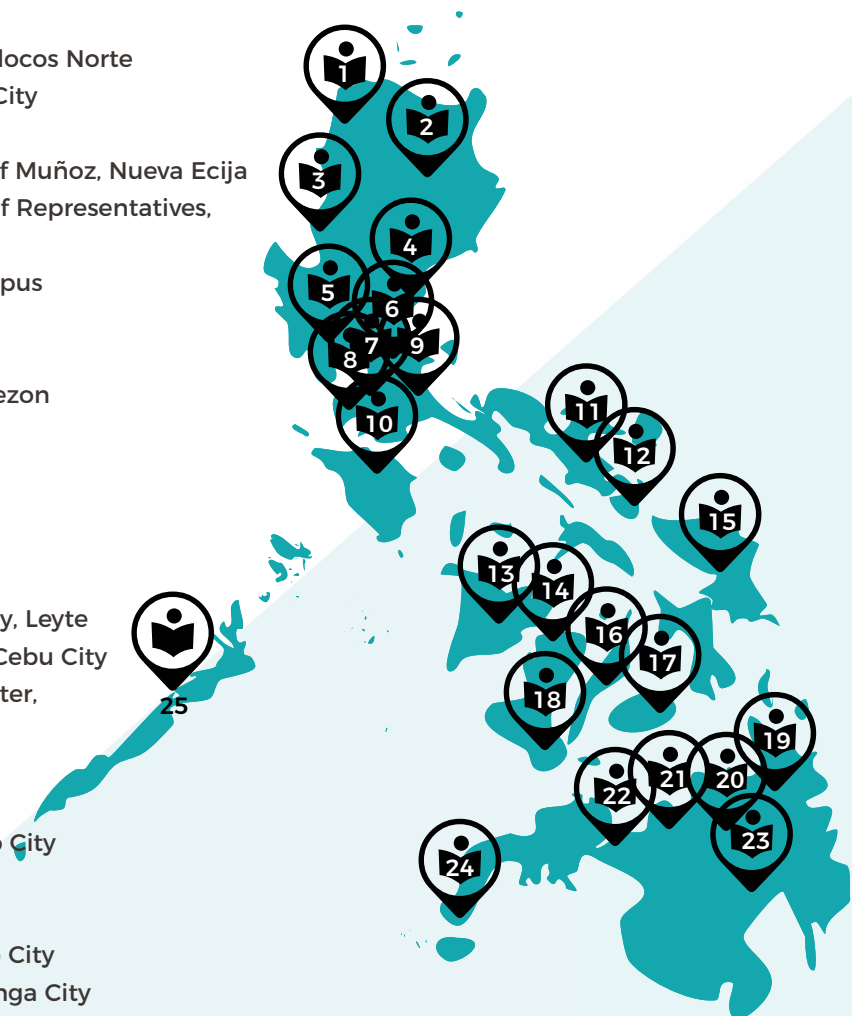

PIDS CORNERS

TWENTY-FIVE PIDS Corners across the country (13 in Luzon, 6 in the Visayas, and 6 in Mindanao) were set up since the project was launched in July 2006. The PIDS Corners, usually established in a university or an LGU-based library, serve as links between local libraries and the PIDS for dissemination and promotion of PIDS publications and web-based resources. The Corners are regularly supplied with free PIDS publications for use by the students, faculty members, employees, and other decisionmakers in the locality.

In 2020, a total of 2,417 students, faculty members, and other library patrons used the PIDS publications in 21 PIDS Corners—as reported by their librarians. Due to the pandemic and implementation of community quarantines, most libraries were closed, particularly in the second half of 2020.

DEVELOPMENT

**POLICY
RESEARCH**

MONTH

THE COVID-19 PANDEMIC has caught the world off guard, putting to the test the capacity and readiness of countries and their governments to deal with a crisis of such magnitude.

In the Philippines, the pandemic has unveiled major weaknesses in governance systems and structures, namely, the lack of coordination and synergy between and among various levels of government, the lack of protocols or manual of operation to deal with a similar crisis, weak and outdated information systems, and the lack of technically capable workforce in the public sector.

These were tackled during the 2020 Development Policy Research Month (DPRM) celebration, which carried the theme “Bouncing Back Together: Innovating Governance for the New Normal” or,

in Filipino, “*Makabagong Pamamahala para sa Sama-samang Pagbangon sa New Normal*”, to underscore the importance of innovating governance across all sectors of society to steer the country toward the path of renewed growth and dynamism.

Specifically, it called the government to transform itself into one that is agile and innovative to be able to mitigate the impacts of the pandemic and other similar threats, such as climate change, food insecurity, and economic crisis. It also urged the public sector to create an environment conducive to learning and innovation; strengthen the capacities of the civil service through continuous professional development, a reward and incentive system, and digital smart systems for more efficient service delivery; and enhance human

capital formation through more efficient access to healthcare services, broad-based access to quality education, and effective social protection systems.

It also encouraged other sectors to do their share in restoring the economy and adjusting to the new normal. Notably, it emphasized the need for the business sector, academe, and civil society to aim for organizational agility by reshaping their strategy, structures, processes, people, and technology. It likewise urged the public to be adaptive and innovative and to have an entrepreneurial mindset and the initiative to upskill themselves.

The PIDS leads the country in celebrating the DPRM every September to promote and draw awareness and appreciation of the importance of policy research in nation-building. Pursuant to Presidential Proclamation 247, the month-long celebration aims to cultivate a strong culture of research and research use among decisionmakers and the general public and improve the public's research and information literacy of socioeconomic issues.

Given restrictions on face-to-face events, the DPRM 2020 celebration was held virtually. It kicked off with a virtual press conference on September 1, where government officials shared their insights on local governance innovations, institutional innovations, financial technology, and digital inclusion amid the COVID-19 pandemic. Among the panelists were National Economic and Development Authority Assistant Secretary Carlos Abad Santos, Department of Budget and Management Assistant Secretary Rolando Toledo, Makati City Mayor Mar-Len Abigail Binay, and *Bangko Sentral ng Pilipinas* (BSP) Assistant Governor Iluminada Sicat.

As part of the month-long celebration, the PIDS and the Mindanao Development Authority (MinDA), in partnership with the Ateneo de Davao University (AdDU), conducted the Sixth Mindanao Policy Research Forum (MPRF) on September 18 to gather insights and recommendations of leaders and experts on how Mindanaoans can move forward and bounce back from the pandemic. The virtual forum, which AdDU hosted through its University Research Council, centered on the theme "Bouncing Back in the New Normal through Countryside Development and Agricultural Resilience" to emphasize the significant role of the agriculture sector in sustaining food production and improving economic recovery amid the pandemic.

DPRM Steering Committee 2020

Chair:
PIDS

Members (permanent):

- *Bangko Sentral ng Pilipinas*
- Civil Service Commission
- Department of the Interior and Local Government
- National Economic and Development Authority
- Philippine Information Agency
- Presidential Management Staff
- Congressional Policy and Budget Research Department
- Senate Economic and Planning Office

Members (additional):

- Department of Health
- Department of Information and Communications Technology
- Department of Social Welfare and Development

The DPRM culminated with the Annual Public Policy Conference (APPC) four-part webinar series on September 15, 17, 22, and 24. The series featured presentations of foreign and local experts on topics, such as institutional innovation, civil service reforms, e-government, and smart solutions, among others (please see separate article).

Just like in past celebrations, the Institute invited national government agencies, research and academic institutions, private sector agencies, nongovernment organizations, and all the local government units in the country to join and support the DPRM by displaying the DPRM banner/streamer within their office premises, sharing the DPRM and APPC websites and promotional materials with their stakeholders, and organizing activities or events related to the theme or policy research. The Civil Service Commission and the Department of the Interior and Local Government issued memorandum circulars urging government agencies and local government units, respectively, to participate in the DPRM celebration.

A total of 41 institutions from various sectors participated in the celebration. See Annex G for the list.

SIXTH ANNUAL PUBLIC POLICY CONFERENCE

THE COVID-19 PANDEMIC would probably go down in history as one of the worst public health crises the world has ever experienced. Not only did it result in millions of lives lost globally, but it also left countries and economies paralyzed. Countries, both developed and developing, grappled with containing the rapid spread of the virus, with their respective governments instituting different measures—from lockdowns, travel restrictions, social distancing, to wearing of masks and face shields, and other safety protocols. Businesses, schools, and offices were forced to close, and people had to stay in their homes for months. In short, the COVID-19 pandemic has altered people’s lives in many ways unimaginable before.

In the Philippines, the pandemic is a wake-up call, especially for the government, to shift to a new brand of governance that is responsive to the needs of the time. The government’s response has exposed major structural and governance gaps. These include the lack of coordination and synergy between and among various levels of government,

the lack of protocols or manual of operation to deal with a similar crisis, weak and outdated information systems, and the lack of technically capable workforce in the public sector.

Thus, during the Sixth Annual Public Policy Conference (APPC), the main and culminating activity of the 2020 DPRM led by PIDS, best practices on how to address these gaps were put into the spotlight. Focusing on the theme “Bouncing Back Together: Innovating Governance for the New Normal”, which was also the theme of the DPRM, the conference highlighted the importance of innovating governance across all sectors of society to steer the country toward the path of renewed growth and dynamism.

Four webinars were held on September 15, 17, 22, and 24 on the following topics: governance innovation in the public sector, institutional innovations, civil service reforms, and smart solutions. International and local experts were invited to present country cases, experiences, and analyses.

During the opening program, PIDS President Celia Reyes highlighted the need for an agile and innovative government to thrive under the so-called 'new normal'. She emphasized that addressing the governance issues exposed by the pandemic is the responsibility of everyone, saying that this challenging time calls for a 'whole-of-society-approach'. Socioeconomic Planning Secretary Karl Kendrick Chua expressed the same sentiment. In his keynote message, Chua noted that due to the effects of the pandemic, there was a slight reversal in the country's significant gains in poverty reduction and a temporary increase of 17.5 percent in poverty incidence. He maintained a positive outlook, however, and said that the country's goal of bringing down poverty to 14 percent by 2022 is doable, but this would require innovative and creative solutions from the government. Chua urged the government to recalibrate its systems and processes to adapt to the needs of the new normal given that "it provides the direction and impetus for innovation to prosper." However, he recognized the government's limited resources and stressed the importance of multistakeholder partnerships as an effective way to address resource constraints and "tap the wealth of ideas, technologies, expertise, and networks that reside outside of government".

The first of the four-part webinar series of APPC titled "Innovation in Public Sector Governance for Resilience under a New Normal: Theory and Practice" focused on examining how the country should be responding to the pandemic, with the public sector or the government leading the efforts through relevant and timely policies.

One of the speakers, James Brumby, senior adviser for governance, equitable growth, finance, and institutions vice president of the World Bank Group Singapore, said governments need to explore and rethink their approaches to a public health emergency and not look at past experiences that tend to be "generalized lessons". This includes changes in work actions and practices, embracing new technologies and digital systems, and using new sources of information, such as big data as government information becomes challenged during the pandemic. Meanwhile, Reboot Co-founder and Executive Director Panthea Lee discussed the importance of community-driven change and said that to face the new normal, governments must be open to collaborating with their communities, citizens, and civil societies.

As for Maria Teresa Magno-Garcia, National Planning and Corporate Management Bureau

Director of the Department of Information and Communications Technology and a discussant for this session, moving forward to the new normal means pursuing digital transformation. For his part, Gerardo Sicut, professor emeritus at the University of the Philippines School of Economics, noted that the digital revolution is a "very important and powerful element" and that governments that fail to adjust to it may lag behind.

The second of the four-part webinar series of APPC titled "Institutional Innovations and Reforms under the New Normal" aimed to develop specific recommendations for institutional and policy plans or actions for innovating governance and promote innovation in the public sector toward recovery and resilience.

One of the sectors deeply affected by the lockdowns was the education sector as schools were forced to shift to online learning. In this webinar, one of the topics highlighted was about transforming education after the pandemic. Dr. Ju Ho Lee, a professor at the School of Public Policy and Management of Korea Development Institute, urged countries like the Philippines to harness the power of artificial intelligence (AI) in education. Dubbed as "High-Touch High-Tech Education", this method integrates AI technologies in teaching and helps teachers focus more on "personalized guidance, active learning experiences, or mentoring and emotional learning".

Meanwhile, Sean McDonald, co-founder of Digital Public and a senior fellow at the Canada-based think tank Center for International Governance Innovation, raised key lessons for governments when using technology-led responses in addressing problems. The first is validating their purpose, while the second is ensuring their wider reach. Moreover, with technology being prone to political and commercial abuses, McDonald said that building people's trust is crucial. Thus, governments need to provide clear messages to the public when deploying new technologies.

For his part, Raymund Liboro, commissioner and chairman of the National Privacy Commission, touched on the topic of data and how it can help respond to the pandemic. Now more than ever, the ability to gather accurate data is crucial to curb the spread of the virus. However, this also brings data privacy issues. To help the government address this and enter into serious data governance, Liboro urged the government to update its digital skills and competencies.

On the other hand, Ateneo School of Government Dean Ronald Mendoza discussed the constraints faced by countries like the Philippines as they embrace innovations and technologies to respond to the pandemic. According to him, for countries with populist tendencies, constraints would be more on the governance aspect than technological. He also identified key elements needed for a more inclusive recovery from the pandemic, namely, the use of technology, trust-building to facilitate sharing of information, and the transformation of healthcare, social protection, and education systems.

The COVID-19 pandemic has increased people's preference to conduct activities online. According to Aiken Larisa Serzo, University of the Philippines Law Center consultant for its Technology Law and Policy Program, the government needs to rethink its existing regulatory policies. This is especially true for industries that should be supported during the pandemic, including online platforms and logistics, retail and education providers, and telco companies. Although these industries are highly regulated, Serzo said that regulations should be flexible enough to enable them to operate during a pandemic.

The third of the four-part webinar series of APPC titled "Strengthening the Civil Service under the New Normal" focused on the critical civil service reforms to enable governments to be agile and innovative in facing large-scale crises and multifaceted risks. Dr. Viroj Tangcharoensathien, senior adviser for the International Health Policy Program of Thailand's Ministry of Public Health, talked about his government's effective response to COVID-19. Thailand has been lauded for having one of the most successful responses to the pandemic. He attributed this to three factors: early intervention, health system resilience, and effective governance—of which people's trust in government had an important role to play.

The critical role of governments also means civil servants need to be capacitated. This was emphasized by Dr. Naomi Aoki, associate professor at the Graduate School of Public Policy of the University of Tokyo. She said civil servants should have the following mindsets to keep up with what she called the 'tech-powered new normal': openness to innovation, mindfulness of design thinking and user orientation, attention to public trust in innovations, and care for the digitally disadvantaged.

Meanwhile, Philippine Civil Service Commission Chairperson Alicia dela Rosa-Bala said programs

are in place to prepare the public sector for the new normal. These programs focus on human resource management, occupational health and safety standards for the public sector, and organizational development. Relatedly, Eduardo Banzon, principal health specialist at the Asian Development Bank, who was also a discussant, said there is a need for the civil service to "be savvy in bringing in experts" and urged the government to have stronger links with the academe to help them in formulating an effective response to current and future crises.

The last of the four-part webinar series titled "Smart Systems for Agile Governance under the New Normal" aimed to draw insights on how developing countries like the Philippines can adopt and sustain the implementation of smart systems in governance to achieve resilience to future risks. The key message that emerged from this session is the importance of technology-led and science-based governance in a post-COVID-19 world. One interesting topic was the use of unconventional tools and sources in estimating socioeconomic indicators in the Philippines as presented by Thinking Machines Chief Executive Officer Stephanie Sy. Similarly, Dr. Alfredo Mahar Lagmay, professor at the National Institute of Geological Sciences of the University of the Philippines, urged the government to integrate science-based information in the development plans and disaster management efforts of local government units. He also emphasized the importance of open data and its accessibility to communities. Meanwhile, as the preference for new technologies increases amid the pandemic, Laura Ignacio, director of the Center for Monetary and Financial Policy of the BSP, also warned about the potential risks. She noted that it is essential to have a balanced approach to these risks, saying that "regulations must continue to adjust to developments so as not to compromise consumer protection standards and ensure the welfare of the consumers."

In all these discussions on creating a new brand of governance, PIDS Vice President Marife Ballesteros, in her closing message, emphasized the recurring theme of building people's trust—with the government and with the new technologies and innovations arising from these challenging times. She urged the participants to apply the learnings from the four-part webinar series to achieve the common objective of improving public sector governance in the country.

Each of the four-part webinar series of the APPC was attended by over 300 to 400 participants from the government, academe, civil society, private sector, and the media.

INTERNATIONAL LINKAGES

GLOBAL TRADE & INNOVATION
POLICY ALLIANCE

Network of
East Asian
Think Tanks

THE INSTITUTE IS a member of several international networks, including the APEC Study Centers Consortium (ASCC), East Asian Development Network (EADN), Global Trade and Policy Alliance (GTIPA), Network of East Asian Think Tanks (NEAT), and Research Institutes Network (RIN).

In 2020, through the PASCN, PIDS continued to participate in the annual ASCC conference. Hosted by the Malaysian APEC Study Centre, the virtual conference took place on September 23. It centered on the theme “Towards an Inclusive, Sustainable Growth and Shared Prosperity Post-Pandemic” (see the PASCN section on p. 27 for details). The ASCC consists of all the APEC Study Centers (ASCs) formed to foster research and academic discussions on APEC issues. There are more than 70 ASCs, one of which is the PASCN. The Institute has been hosting and supporting PASCN since 1996.

The EADN, meanwhile, is a network of research institutions in the developing countries of East Asia. It aims to strengthen the capacity of research institutions and researchers to undertake high-quality, development-focused, and policy-relevant research in the social sciences that can be used for policy analysis, debates, and inputs at the national and regional levels. PIDS has been serving as the secretariat of the EADN and the PIDS president as regional coordinator since July 2010.

The Institute joined GTIPA in 2019. It is a network of think tanks supporting greater global trade liberalization and integration. In 2020, through Dr. Francis Quimba and Dr. Ramonette Serafica, PIDS contributed a short monograph on “The Philippines’ Three Most Significant Trade Priorities for the Year

Ahead” for the GTIPA multicountry report. Both research fellows also participated in the GTIPA Annual Summit held online on October 29.

Officially established in November 2003 with PIDS representing the Philippines, NEAT was one of the measures recommended in 2002 by the East Asian Studies Group convened by ASEAN+3 leaders for closer cooperation among East Asian countries. It serves as a mechanism for research and academic exchange and a platform for second-track diplomacy in the regional cooperation of the member-states comprising the Association of Southeast Asian Nations as well as China, Japan, and South Korea. In 2020, through Dr. Kris Francisco, PIDS participated in the NEAT Working Group “East Asian Cooperation on Enhancing Inclusive, Resilient, and Sustainable Connectivity beyond COVID-19” on November 5. She and PIDS President Celia Reyes also attended the 32nd NEAT Country Coordinators Annual Meeting on November 18. Dr. Reyes also serves as NEAT country coordinator for the Philippines.

RIN is a group of research institutes in East Asia that supports the Economic Research Institute for ASEAN and East Asia in research, capacity development, and dissemination of research findings. In 2020, Dr. Adoracion Navarro served as a resource speaker in the RIN 2020 Research Workshop on COVID-19 held on October 12. Dr. Celia Reyes also served as a discussant in the RIN Annual Meeting 2020 held on October 27.

Moreover, PIDS actively participates in other international fora and networks through its officials and senior researchers.

See Annex H for details.

POLICY INFLUENCE

THE INSTITUTE, THROUGH its senior researchers, directly influences policymaking in the legislative branch by participating as resource persons in congressional meetings/hearings, technical committees, or working groups (Annex I).

Moreover, the comments of PIDS senior researchers on proposed laws are regularly sought by the Senate and the House of Representatives. The details are presented below.

Comments/Position Papers Submitted to Congress in 2020

From January to December 2020, PIDS provided comments to 11 House Bills (HB) and 3 House Resolutions (HR) pending before the House of Representatives and 25 Senate Bills (SB), 6 Senate Resolutions (SR), and 1 Joint Senate Resolution pending before the Senate.

- HB 206, “An Act Providing for the Development of a National Defense Industry through

the Strengthening and Revitalizing of the Self-Reliant Defense Posture (SRDP) Program, Incentivizing In-country Enterprises, Rationalizing Defense Acquisition, and Creating the Office of the Undersecretary for Defense Technology Research and Industry Development under the Department of National Defense, and Providing Funds Thereof”

- HB 3238, “An Act Establishing a Framework for Citizens Participation in Legislation and Rule-Making through the Use of Information and Communications Technology Platforms”
- SB 169 and 1258 on the proposed NEDA bill
- TRAIN Package 3, “Real Property Valuation and Assessment Act”, including SB 246 and 519 and HB 4664
- HB 5906, “An Act Amending Provisions of Republic Act (RA) 10667, Otherwise Known as An Act Providing for a National Competition Policy, Prohibiting Anti-Competitive Agreements,

Abuse of Dominant Position and Anti-Competitive Mergers and Acquisitions, Establishing the Philippine Competition Commission' and Appropriating Funds Therefor"

- Proposed constitutional amendments by the Inter-Agency Task Force on Federalism (IATF) and Constitutional Reform Movement (CORE)
- HB 230, "An Act Institutionalizing the Participation of Civil Society Organizations (CSOs) in the Preparation and Authorization Process of the Annual National Budget, Providing Mechanisms Therefor, and for Other Purposes" and HB 832, titled "An Act Creating a System of Partnership Between Local Governments and Civil Society Organizations through the Establishment of a People's Council in Every Local Government Unit, Prescribing its Powers and Functions"
- Proposed legislation on inclusive education (SB 434 and SB 1150) and establishment of inclusive education learning resource centers for children and youth with special needs (SB 55, 69, 171, 329, 338, 345, 540, and 804)
- SB 14, amending the Retail Trade Liberalization Act of 2000 (RA 8762)
- Senate Bill 921, amending the Retail Trade Liberalization Act of 2000 (RA 8762)
- Senate Bill 1113, amending Retail Trade Liberalization Act of 2000 (RA 8762)
- HB 6297, "An Act Strengthening the Right of the People to Free Expression, to Peaceably Assemble, and to Petition the Government for Redress of Grievances, Repealing for the Purpose *Batas Pambansa* 880 or The Public Assembly Act of 1985"
- SB 1474, "An Act Providing An Economic Stimulus Strategy for the Effects of the Corona Virus Disease 2019 (COVID-19) and Appropriating Funds Therefor"
- SB 1431, "An Act Establishing an Economic Recovery Package to Business in the Hardest Hit Sectors by the Coronavirus Disease 2019 (COVID-19), Appropriating Funds Therefor, and for Other Purposes"
- SB 1414, "An Act Establishing the Emergency Response and Recovery Package to Counter the COVID-19 Pandemic, also known as '*Pag-asa: Alaga, Sustento, at Angat sa Panahon ng COVID-19 Crisis*' Package, and for Other Purposes"
- HB 6122, "An Act Protecting Consumers and Merchants Engaged in Internet Transactions, Creating for this Purpose the Ecommerce Bureau and Appropriating Funds Therefor" (Internet Transactions Act)
- SR 405, "Directing the Committee on Trade, Commerce, and Entrepreneurship, and Other Appropriate Committees to Conduct a Hearing, in Aid of Legislation, on the Effects of COVID-19 on Philippine Trade, Commerce, and Entrepreneurship, and the Possible Ways to Restart the Economy During and After the COVID-19 Era"
- SR 391, "Basic Education System (COVID-19)"
- SR 392, "Free Internet Access in Public Places Act"
- The Department of Education's Learning Continuity Plan for Basic Education in Time of COVID-19
- HR 834, "Directing the Proper Committee to Conduct an Inquiry in Aid of Legislation on the Current Status of Implementation of Republic Act 11055, Otherwise Known as the Philippine Identification System Act"
- HR 937, "Urging the National Government to Fast Track the Integrated Implementation of RA 11055 (Philippine Identification System Act) and RA 11315 (Community-Based Monitoring System Act) as a Vital Database Mechanism in Providing Social Amelioration during COVID-19 Pandemic"
- HB 6958, "An Act Providing Protection to Individuals Engaged in the Food and Grocery Delivery Services"
- SB 69, "An Act Instituting Services for Learners with Disabilities in Support of Inclusive Education, Establishing Inclusive Education Learning Resource Centers for Learners with Disabilities and Children and Youth with Special Needs in All Public School Districts and Public School Divisions, Providing for Standards and Guidelines, and Appropriating Funds Therefor"
- SR 409, "Directing the Senate Committee on Finance to Conduct an Inquiry, in Aid

- of Legislation, to Determine the Budgetary Requirements of the Government to Utilize Innovative Digital Technologies and Accelerate the Build-Up of Telecommunications Infrastructure towards Improving Governance, Socio-economic Development, and Prompt Delivery of Services to the Filipino People”
- HR 178, “Calling for an Investigation in Aid of Legislation by the Appropriate Committee of the House of Representatives on the Exclusion of Agriculturally Viable Parcels of Land in Sariaya, Quezon, from the Implementation of the Comprehensive Agrarian Reform Program”
 - SR 522, “Implementation of RA 4670 (Magna Carta for Public School Teachers)” and SR 526, “Quality of Teacher Education and training and Teacher Education Institutions”
 - SB 1591, “An Act Protecting Consumers and Merchants Engaged in Internet Transactions, Creating for this Purpose the Ecommerce Bureau, and Appropriating Funds Therefor”
 - SB 1818, “An Act Promoting Online Transactions, Safeguarding the Rights of Consumers and Merchants, and for Other Purposes”
 - Joint Senate Resolution 10, “Creating a Congressional Oversight Committee on Education to Reviews and Assess Philippine Education, Providing Funds Therefore and for Other Purposes”
 - HB 7864, “An Act Establishing the Basic Regulatory Framework for Blockchain Technology in the Philippines, Providing for its Use in Government Service Delivery, and for Other Purposes”
 - SB 788, “An Act Establishing A National Evaluation Policy”
 - SB 1885, “An Act Establishing A Results-Based National Evaluation Policy”
 - HB 8101, “An Act Providing for the Promotion and Development of the Philippine Creative Industries and Providing Funds Therefor”

INITIAL EVIDENCE OF POLICY INFLUENCE

Citation of PIDS Studies in Bills Filed at the Lower House

An initial review of the bills submitted by lawmakers in the 18th Congress (July 22, 2019 – 2022) reveals that PIDS studies were cited in these bills. Table 1 shows some of these bills and the cited studies.

Uptake of Policy Recommendations

In terms of policymakers’ uptake of PIDS studies’ policy recommendations, the Institute initially documented three cases.

- The first case pertains to the 2017 policy note “Quantitative Restriction on Rice Imports: Issues and alternatives” authored by Dr. Roehlano Briones. At a PIDS webinar on January 28, 2021, where Senator Cynthia Villar served as closing speaker, she disclosed that she used the policy note as a basis for drafting the Rice Tariffication Law. The specific policy recommendations taken up by Senator Villar, who is currently the chairperson of the Senate Committee on Agriculture and Food, are (1) the adoption of rice tariffication in place of the lifting of the quantitative restrictions, (2) the provision of safety nets for rice farmers, and (3) the abolition of the National Food Authority (NFA) monopoly over rice importation and retaining NFA merely as a buffer stocking agency.
- The second case is about the 2020 study “Impacts of the Sustainable Livelihood Program’s (SLP) Microenterprise Development (MD) Assistance with Seed Capital Fund on Poor Households in the Philippines” commissioned by the Department of Social Welfare and Development (DSWD), the implementing agency of SLP. Authored by Dr. Aniceto Orbeta, Dr. Marife Ballesteros, Mr. John Paul Corpus, Dr. Vicente Paqueo, and Dr. Celia Reyes, this study evaluated the impact of the program’s MD component on the labor supply, income, expenditure, savings, and capital investment of beneficiaries of the *Pantawid Pamilyang Pilipino* Program. In a memorandum dated October 8, 2020, DSWD Assistant Secretary for Specialized Programs Rhea Penaflor said the study’s recommendations would “be fully utilized” by the department to improve the

program’s implementation through several “action points”.

Table 2 gives details of the study’s recommendations and the responses of DSWD. It is important to emphasize that some of the recommendations of the 2020 study were informed by previous studies also conducted by PIDS.

- The third and last case is about the 2020 study “Fiscal Sustainability, Equity, and Allocative Efficiency in the Light of the 2019 Supreme Court Ruling on the LGUs’ Share in the National Taxes” written by Dr. Rosario Manasan, a former senior research fellow of PIDS. To ensure the national government’s fiscal sustainability when the Supreme Court ruling takes effect in 2022, the study proposed sourcing the increase in local government resources by “unfunding programs, activities, and projects (PAPs) in the budgets of some

national government agencies that are actually intended to deliver functions assigned to LGUs under the Local Government Code”. On June 2, 2021, the Office of the President released Executive Order 138 titled “Full Devolution of Certain Functions of the Executive Branch to Local Governments, Creation of a Committee on Devolution, and For Other Purposes”.

In an email exchange between PIDS and the Department of the Interior and Local Government’s Bureau of Local Government Development (BLGD) dated June 11, 2021, the BLGD verified that “the policy recommendation of Dr. Manasan was the action taken by the DBM [Department of Budget and Management] when they communicated the formulation of the NGA DTPs [national government agencies devolution transition plans].” The BLGD added that “they [DBM] specified some of the projects that will be unfunded in preparation for the national budget call.”

Table 1. Some of the bills filed at the Lower House of the 18th Congress that cited PIDS studies

No.	Long/Short Title	PIDS Study Cited
House Bill 80	Housewife Compensation Act	PN 2017-09: Do Men and Women in the Philippines Have Equal Economic Opportunities? DP 2018-20: Profile and Determinants of the Middle Income Class in the Philippines
House Bill 308	An Act Instituting a Thirty-five (35) Hour Working Week Scheme as an Alternative Work Arrangement for Employees in the Public Sector	DP 2018-11: Preparing the Philippines for the Fourth Industrial Revolution: A Scoping Study
House Bill 4366	Green Vehicles Incentive Act	PN 2011-13: Globalization, Competition, and International Production Networks: Policy Directions for the Philippine Automotive Industry
House Bill 5362	Senior Citizens Employment Opportunity Act	DP 2019-23: Financing Universal Health Care in an Ageing Philippines
House Bill 6709	The COVID-19 Unemployment Reduction Economic Stimulus (CURES) Act of 2020	DP 2020-15: Projected Disease Transmission, Health System Requirements, and Macroeconomic Impacts of the Coronavirus Disease 2019 (COVID-19) in the Philippines
House Bill 6952	Bayanihan to Recover as One Act	DP 2020-15: Projected Disease Transmission, Health System Requirements, and Macroeconomic Impacts of the Coronavirus Disease 2019 (COVID-19) in the Philippines
House Bill 7120	K-12 Employers Incentive Act	DP 2018-49: Senior High School and the Labor Market: Perspectives of Grade 12 Students and Human Resource Officers
House Bill 7208	Comprehensive Dairy Farming Act	DP 2017-51: Review of High-Value Agriculture in the Philippines with Comprehensive Subsectoral Focus: Livestock Industries

Table 2. Recommendations of the 2020 Sustainable Livelihood Program process evaluation and the action plan of DSWD

Study's Recommendations	DSWD's Action Plan
Organize SLP livelihood interventions and CCT interventions (e.g., savings, health information, health services, and parent counselling) into a coherent graduation strategy for the poor.	Implementation of a Graduation approach in the SLP process, in partnership with BRAC, ADB, and DFAT Australia. ¹
DSWD should better understand the relative merits of group-based vs. individual livelihood projects.	Conduct an in-house study to assess the relative merits of the two types of enterprises. Said study is a priority topic in SLP's Research and Evaluation Agenda.
DSWD should improve project development and selection to strengthen the commercial viability of livelihood projects.	Continuous review of SLP's program design and implementation, particularly: <ul style="list-style-type: none"> ■ Improvement of screening participants by revisiting Microsave's Track Selection Tool and PIDS's Sorting Tool² ■ Effectiveness of current SLP's implementation and monitoring guidelines, tools, and modules.
DSWD should review and strengthen supporting interventions for livelihood beneficiaries pre- and post-implementation.	
Consider re-emphasizing interventions leading to wage employment. ³	Strengthen collaboration with partners/stakeholders of the program, particularly on the interventions leading to wage employment.

¹ However, this Graduation project was already being planned even before the completion of the SLP impact evaluation.

² The characteristics-based sorting tool developed was by Dr. Celia Reyes and Arkin Arboneda (Reyes and Arboneda 2018). Earlier PIDS process assessments of SLP had also suggested the need for better sorting of SLP participants (Ballesteros et al. 2016; Ballesteros et al. 2017).

³ This recommendation was also informed by earlier PIDS process assessments of SLP (Ballesteros et al. 2015; Ballesteros et al. 2016).

PIDS

EMPLOYEES ASSOCIATION

THE CHALLENGES BROUGHT by the pandemic did not prevent the newly elected officers of PIDSEA from organizing and implementing programs and activities for 2020, which were aimed to further improve and promote the work condition, welfare, and interest of PIDS employees.

In January 2020, the nomination process for the election of new PIDSEA officers was conducted, wherein nomination forms were distributed among PIDSEA members. A new set of PIDSEA Officers was elected on February 3, 2020. After the elections, the PIDSEA Executive Committee (ExeCom) held meetings and preparations for team-building activities for the year.

On August 26, 2020, the PIDSEA ExeCom spearheaded an online “Kumustahan” activity participated by PIDS employees. The activity provided an avenue for employees to share their experiences during the pandemic, as well as tips on how to cope with the challenges of working from home. Suggestions on future employee welfare programs or projects relevant to the “new normal” were also solicited during the activity.

As part of the activities during the anniversary week of PIDS held in September, PIDSEA organized games and online raffle activities to celebrate the Annual Employees Day.

The association has also been actively involved in other activities of the Institute, including the conduct of two orientations for new employees and the attendance and representation to Management Committee meetings, Human Resource Merit Promotion and Selection Board deliberations, Personnel Development Committee activities, and other meetings organized with various PIDS committees. PIDSEA also provided inputs to several proposed office policies related to the work-from-home arrangement, health and wellness, and occupational safety and health.

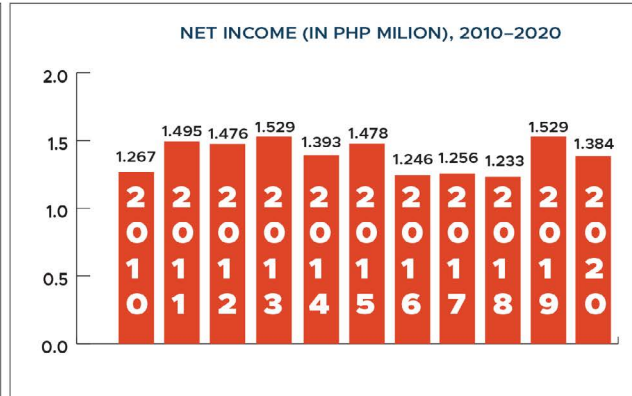

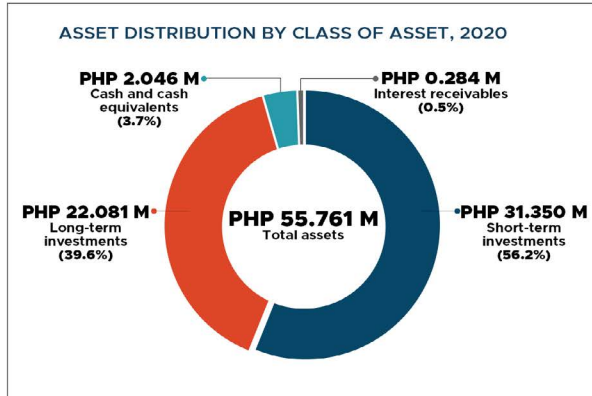

Significantly, the PIDSEA, in partnership with the PIDS Management and staff, successfully secured the accreditation of its Collective Negotiation Agreement from the Civil Service Commission on November 11, 2020. The initiatives to review and renew the agreement started in March, and appropriate revisions and improvements were subsequently made as agreed during the negotiation meetings. The agreement was ultimately approved and signed by both parties on September 8, 2020.

All these activities would not have been possible without the support of the PIDS Management and staff. PIDSEA envisions to continue partnering with all its members and with the PIDS Management in all its future endeavors for the welfare of the PIDS employees and the Institute.

PIDS

PROVIDENT FUND

TOTAL ASSETS
PHP 55.761 MILLION

REVENUES EARNED
PHP 1.560 MILLION

MEMBERS' EQUITY
PHP 52.490 MILLION

NET INCOME
PHP 1.384 MILLION

NOTES: All amounts are as of December 2020. Members' equity consists of members' contribution, that of PIDS, and the dividends. Net income excludes operating expenses and share in net income paid to resigned members

THE PIDS PROVIDENT FUND was established on April 29, 1999. It was registered with the Securities and Exchange Commission on January 25, 2000. It was organized to establish and maintain a fund, the sources of which are derived from the contributions of its members and counterpart contributions of PIDS. All earnings from its investment operations are distributed to the members as benefits. The PIDS provided the Fund with seed money worth PHP 2 million as authorized by the PIDS Board Resolution 97-05, s. 1997 dated July 24, 1997. The PIDS Provident Fund Inc. was conceived to complement the GSIS and Pag-IBIG Fund benefits of PIDS employees. Its primary objective is to provide additional benefits to retired, resigned, or separated PIDS employees.

and (3) election of level representatives to the Board of Trustees.

For calendar year (CY) 2020, the Fund paid provident fund benefits in the total amount of PHP 1.039 million to six employees who resigned/retired from PIDS.

In terms of financial position, the Fund's assets increased by 16 percent from PHP48.066 million in 2019 to PHP55.761 million in 2020.

Meanwhile, members' equity increased in 2020 by 17 percent from PHP 44.809 million in 2019 to PHP 52.490 million in 2020. The members' equity consists of members' contributions, that of PIDS, and the dividends.

As of December 31, 2020, the Fund has a total membership of 78 permanent PIDS employees and 2 coterminous PASCN employees.

In terms of revenue generation for CY 2020, the Fund earned revenues of PHP1.560 million, slightly lower by PHP 0.129 million compared to the total revenues of PHP 1.689 million in CY 2019. The Fund spent PHP 0.147 million in operating expenses and paid share in net income of PHP 0.029 million to resigned members during the year. Thus, a net income of PHP 1.384 million in 2020. This is lower than 2019's net income of PHP1.529 million.

The 20th Annual Members' Meeting of the PIDS Provident Fund, held on June 24, 2020 via Cisco Webex platform, was highlighted by the following activities: (1) presentation of the annual report and audited financial statements by the Fund president; (2) proposed declaration of dividends;

ANNEX J

AUDIT CERTIFICATE

Republic of the Philippines
COMMISSION ON AUDIT
Commonwealth Avenue, Quezon City, Philippines

INDEPENDENT AUDITOR'S REPORT

THE BOARD OF TRUSTEES
Philippine Institute for Development Studies
18F Three Cyberpod Centris–North Tower
EDSA corner Quezon Avenue, Quezon City

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of the Philippine Institute for Development Studies (PIDS), which comprise the statements of financial position as at December 31, 2020 and 2019, and the statements of financial performance, statements of changes in net assets/equity, and statements of cash flows for the years then ended, statement of comparison of budget and actual amounts for the year ended December 31, 2020, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the financial statements present fairly, in all material respects, the financial position of PIDS as at December 31, 2020 and 2019, and of its financial performance and its cash flows for the years then ended in accordance with International Public Sector Accounting Standards (IPSASs).

Basis for Opinion

We conducted our audits in accordance with International Standards of Supreme Audit Institutions (ISSAIs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the PIDS in accordance with the ethical requirements that are relevant to our audit of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with PPSASs, and for such internal control as management determines it is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Corporation's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting, unless management either intends to liquidate PIDS or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the PIDS' financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISSAIs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISSAIs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the PIDS' internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the PIDS' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the PIDS to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplementary information for the year ended December 31, 2020, required by the Bureau of Internal Revenue as disclosed in Note 27 to the financial statements is presented for purposes of additional analysis and is not a required part of the basic financial statements prepared in accordance with IPSASs. Such supplementary information is the responsibility of management.

ANNEX P

NOTES TO FINANCIAL STATEMENTS*

1. GENERAL INFORMATION/ENTITY PROFILE

The financial statements of Philippine Institute for Development Studies (PIDS) were authorized for issue on March 1, 2021 as shown in the Statement of Management's Responsibility for Financial Statements signed by Dr. Karl Kendrick T. Chua, the Chairman of the Board.

The PIDS is a nonstock, nonprofit government research institution created by virtue of Presidential Decree 1201 in September 1977. The Institute's nature of operation/principal program/activities include, among others, the following:

- Provide analyses of socioeconomic problems and issues to support the formulation of plans and policies for sustained social and economic development of the Philippines
- Establish a continuing channel of communication between policymakers and planners, on the one hand, and researchers, on the other
- Establish a repository for economic research information and other related activities

As of December 31, 2020, the institute has 94 manpower complement, consisting of 78 permanent, 3 coterminous, and 13 contractual employees. Its principal place of business is at 18th Floor, Three Cyberpod Centris-North Tower, EDSA corner Quezon Avenue, Quezon City.

The PIDS was certified to have been operating a management system assessed as conforming to ISO 9001:2015 for the provision of socioeconomic policy research services. This was issued by the Certification International Philippines (CIP) on April 25, 2019. The validity of PIDS' ISO certification was reconfirmed in June 2020 based on the outcome of the first surveillance audit of its Quality Management System (QMS) in March 2020.

The PIDS established its QMS in line with Executive Order 605, which directs all government offices to institutionalize their structures, mechanisms, and standards to promote and enhance service delivery in public sector.

It is also a requirement of the Interagency Task Force on the Harmonization of National Government Performance Monitoring Information and Reporting Systems for the grant of Performance-Based Bonus to government agencies and government-owned and controlled corporations like the PIDS.

2. BASIS OF PREPARATION OF FINANCIAL STATEMENTS

The financial statements were prepared in compliance with the Philippine Public Sector Accounting Standards (PPSASs) prescribed for adoption by the Commission on Audit (COA) through COA Resolution 2014-003 dated January 24, 2014. PPSASs were renamed to IPSASs per COA Resolution No. 2020-01 dated January 9, 2020. The accounting policies were consistently applied throughout the year presented.

The financial statements were prepared on the basis of historical cost, unless stated otherwise. The Statement of Cash Flows was prepared using the direct method.

The financial statements are presented in Philippine peso (PHP), which is also the country's functional currency.

The preparation of financial statements in compliance with the adopted IPSASs requires the use of certain accounting estimates. It also requires the entity to exercise judgment in applying the entity's accounting policies.

**All amounts are in Philippine peso unless otherwise stated.*

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Basis of Accounting

The financial statements were prepared on an accrual basis in accordance with the IPSASs.

3.2 Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand and cash in bank, deposits on call, and highly liquid investments with an original maturity of three months or less, which are readily convertible to known amounts of cash and are subject to insignificant risk of changes in value. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits as defined above.

3.3 Financial Instruments

Financial Assets

- Initial recognition and measurement

Financial assets within the scope of IPSAS 29-Financial Instruments: Recognition and Measurement are classified as financial assets at fair value through surplus or deficit, held-to-maturity investments, loans and receivables or available-for-sale financial assets, as appropriate. The PIDS determines the classifications of its financial assets at initial recognition.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the marketplace (regular way trades) are recognized on the trade date, i.e., the date that the PIDS commits to purchase or sell the asset.

- Held-to-maturity

Nonderivative financial assets with fixed or determinable payments and fixed maturities are classified as held-to-maturity when the PIDS has the positive intention and ability to hold these to maturity.

Financial Liabilities

- Initial recognition and measurement

Financial liabilities within the scope of IPSAS 29 are classified as financial liabilities at fair value through surplus or deficit, or loans and borrowings, as appropriate. The entity determines the classification of its financial liabilities at initial recognition.

All financial liabilities are recognized initially at fair market value.

3.4 Inventories

Inventory is measured at cost upon initial recognition. To the extent that inventory is received through nonexchange transactions (for no cost or for a nominal cost), the cost of the inventory is its fair value at the date of acquisition.

Costs incurred in bringing each product to its present location and condition are accounted for purchase cost using the weighted average cost method.

Inventories are recognized as an expense when deployed for utilization or consumption in the ordinary course of operations of the PIDS.

3.5 Property, Plant, and Equipment

Recognition

An item is recognized as property, plant, and equipment (PPE) if it meets the characteristics and recognition criteria as a PPE.

The characteristics of PPE are as follows:

- tangible items
- held for use for administrative purposes
- expected to be used for more than one reporting period

An item of PPE is recognized as an asset if:

- it is probable that future economic benefits or service potential associated with the item will flow to the entity;
- the cost of fair values of the item can be measured reliably; and
- the cost is at least PHP 15,000.00.

Measurement at Recognition

An item recognized as PPE is measured at cost.

A PPE acquired through nonexchange transaction is measured at its fair value as the date of acquisition.

The cost of the PPE is the cash price equivalent or, for PPE acquired through nonexchange transactions, its fair value as at recognition date.

Cost includes:

- its purchase price, including import duties and nonrefundable purchase taxes, after deducting trade discounts and rebates;
- expenditure that is directly attributable to the acquisition of the items; and
- initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

Measurement after Recognition

After recognition, all PPE are stated at cost less accumulated depreciation and impairment losses.

When significant parts of PPE are required to be replaced at intervals, the PIDS recognizes such parts as individual assets with specific useful lives and depreciates them accordingly. Likewise, when a major repair/replacement is done, its cost is recognized in the carrying amount of the PPE as a replacement if the recognition criteria are satisfied.

All other repair and maintenance costs are recognized as expense in surplus or deficit as incurred.

Depreciation

Each part of an item of PPE with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognized as an expense unless it is included in the cost of another asset.

• Initial Recognition of Depreciation

Depreciation of an asset begins when it is available for use, such as when it is in the location and condition necessary for it to be capable of operating in the manner intended by the management.

For simplicity and to avoid proportionate computation, the depreciation is for one month if the PPE is available for use on or before the 15th of the month. However, if the PPE is available for use after the 15th of the month, depreciation is for the succeeding month.

• Depreciation Method

The straight-line method of depreciation is adopted.

• Estimated Useful Life

The PIDS uses the schedule on the estimated useful life of PPE by classification prepared by the COA in determining the specific estimated useful life for each asset based on its experience.

- Residual Value

The PIDS uses a residual value equivalent to at least 5 percent of the cost of the PPE.

- Impairment

An asset's carrying amount is written down to its recoverable amount, or recoverable service amount, if the asset's carrying amount is greater than its estimated recoverable amount or recoverable service amount.

- Derecognition

The PIDS derecognizes an item of PPE and/or any significant part of an asset upon disposal or when no future economic benefits or service potential is expected from its continuing use. Any gain or loss arising from the derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the surplus or deficit when the asset is derecognized.

3.6 Leases

PIDS as a Lessee

Operating Lease

Operating leases are leases that do not transfer substantially all the risks and rewards incidental to ownership of the leased item to the PIDS. Operating lease payments are recognized as an operating expense in surplus or deficit on a straight-line basis over the lease term.

3.7 Changes in Accounting Policies and Estimates

The PIDS recognizes the effects of changes in accounting policy retrospectively. The effects of changes in accounting policy are applied prospectively if retrospective application is impractical.

The PIDS recognizes the effects of changes in accounting estimates prospectively through surplus or deficit.

The PIDS corrects material prior period errors retrospectively in the first set of financial statements authorized for issue after their discovery by:

- restating the comparative amounts for prior period(s) presented in which the error occurred or
- if the error occurred before the earliest prior period presented, restating the opening balances of assets, liabilities, and net assets/equity for the earliest prior period presented.

3.8 Foreign Currency Transactions

Transactions in foreign currencies are initially recognized by applying the spot exchange rate between the functional currency and the foreign currency at the transaction date.

At each reporting date:

- foreign currency monetary items are translated using the closing rate;
- nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- nonmonetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined.

Exchange differences arising (a) on the settlement of monetary items or (b) on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements, are recognized in surplus or deficit in the period in which they arise, except as those arising on a monetary item that forms part of a reporting entity's net investments in a foreign operation.

3.9 Revenue from Exchange Transactions

Measurement of Revenue

Revenue is measured at the fair value of the consideration received or receivable.

Rendering of Services

The PIDS recognizes revenue from rendering of services by reference to the stage of completion when the outcome of the transaction can be estimated reliably. The stage of completion is measured by reference to labor hours incurred to date as a percentage of total estimated labor hours.

Where the contract outcome cannot be measured reliably, revenue is recognized only to the extent that the expenses incurred were recoverable.

Sale of Goods

Revenue from the sale of goods is recognized when the significant risks and rewards of ownership have been transferred to the buyer, usually on delivery of the goods and when the amount of revenue can be measured reliably, and it is probable that the economic benefits or service potential associated with the transaction will flow to the PIDS.

Interest Income

Interest income is accrued using the effective yield method. The effective yield discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount. The method applies this yield to the principal outstanding to determine interest income each period.

3.10 Budget Information

The annual budget is prepared on a cash basis and is published on the government website.

A separate Statement of Comparison of Budget and Actual Amounts (SCBAA) is prepared since the budget and the financial statements are not prepared on comparable basis. The SCBAA is presented showing the original and final budget and the actual amounts on comparable basis to the budget. Explanatory comments are provided in the notes to the annual financial statements.

3.11 Employee Benefits

The employees of the PIDS are members of the Government Service Insurance System, which provides life and retirement insurance coverage.

The PIDS recognizes the undiscounted amount of short-term employee benefits, like salaries, wages, bonuses, allowance, etc., as expense unless capitalized, and as a liability after deducting the amount paid.

The PIDS recognizes expenses for accumulating compensated absences when these were paid (commuted or paid as terminal benefits). Unused entitlements that have accumulated at the reporting date were not recognized as expense. Nonaccumulating absences, like special leave privileges, were not recognized.

4. RISK MANAGEMENT OBJECTIVES AND POLICIES

The PIDS is exposed to the following risks from its use of financial instruments:

- Liquidity risk
- Interest/Market risks
- Operational risk

This note presents information about the PIDS' exposure to each of the above risks, objectives, policies, and processes for measuring and managing risk and management of capital.

4.1 Risk Management Framework

Generally, the maximum risk exposure of financial assets and financial liabilities is the carrying amount of the financial assets and financial liabilities as shown in the statements of financial position and as summarized below.

	Note	2020	2019 (As restated)
Financial Assets			
Cash and cash equivalents	5	249,680,780	83,395,199
Financial assets	6	662,909,692	649,717,852
Receivables	7	14,678,472	18,928,329
		927,268,944	752,041,380
Financial Liabilities			
Financial liabilities	11	4,346,206	8,834,030
Interagency payables	12	11,351,700	13,584,477
Trust liabilities	13	9,392,142	4,768,660
		25,090,048	27,187,167

4.2 Liquidity Risk

Liquidity risk is the risk that the PIDS might encounter difficulty in meeting obligations from its financial liabilities.

Management of Liquidity Risk

The PIDS approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to its reputation.

The PIDS maintains a portfolio of short-term liquid assets, largely made up of short-term liquid investment securities, and advances to PIDS and other facilities, to ensure that sufficient liquidity is maintained within the PIDS as a whole.

Exposure to Liquidity Risk

The liquidity risk is the adverse situation when the PIDS encounters difficulty meeting unconditionally the settlement of its obligations at maturity. Prudent liquidity management requires that liquidity risks are identified, measured, monitored, and controlled in a comprehensive and timely manner. Liquidity management is a major component of the corporate-wide risk management system. Liquidity planning takes into consideration various possible changes in economic, market, political, regulatory, and other external factors that may affect the liquidity position of PIDS.

4.3 Market Risks

Market risk is the risk that changes in the market prices, such as interest rate, equity prices, foreign exchange rates, and credit spreads (not relating to changes in the obligor's/issuer's credit standing) will affect the PIDS income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimizing the return on risk.

Management of Market Risk

The management of interest rate risk against interest gap limits is supplemented by monitoring the sensitivity of the PIDS financial assets and liabilities to various standard and nonstandard interest rate scenarios.

4.4 Operational Risks

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the PIDS processes, personnel, technology, and infrastructure, and from external factors other than credit, market, and liquidity risks, such as those arising from legal and regulatory requirements and generally accepted standards of corporate behavior. Operational risks arise from all of the PIDS operations and are faced by all business entities.

The PIDS objective is to manage operational risk to balance the avoidance of financial losses and damage to the PIDS reputation with overall cost-effectiveness and to avoid control procedures that restrict initiative and creativity.

The primary responsibility for the development and implementation of control to address operational risk is assigned to senior management within each department. This responsibility is supported by the development of overall standards for the management of operational risk in the following areas:

- Requirement for appropriate segregation of duties, including the independent authorization of transactions
- Requirement for the reconciliation and monitoring of transactions
- Compliance with regulatory and other legal requirements
- Documentation of controls and procedures
- Requirements for the periodic assessment of operational risk faced, and the adequacy of control and procedures to address the risk identified
- Requirements for the reporting of operational losses and proposed remedial action
- Development of contingency plans
- Training and professional development
- Ethical and business standards
- Risk mitigation, including insurance where this is effective

5. CASH AND CASH EQUIVALENTS

This account consists of the following:

	2020	2019 (As restated)
Cash in bank–local currency	211,559,989	41,666,793
Cash in bank–foreign currency	19,864,370	11,020,183
Foreign currency–time deposit	18,256,421	19,140,223
Treasury bills	0	11,568,000
	249,680,780	83,395,199

5.1 Cash in Bank–Local Currency

	Account No.	2020	2019
LBP/PIDS proper (Pasong Tamo Branch)	1782-1011-50	155,466,634	104,212
LBP/PIDS proper (NIA Branch)	1872-1037-39	37,654,294	26,695,855
DBP/PIDS proper	0405-026125-530	5,190,670	3,498,252
LBP/PIDS UNICEF project	1872-1040-18	4,313,774	650,083
LBP/PIDS DOH project	1872-1040-85	3,550,960	0
LBP/PIDS IDRC project	1872-1040-93	2,447,107	0
LBP/PIDS DAR project	1872-1040-42	1,230,098	986,768
LBP/PIDS DILG project	1872-1039-84	1,108,305	7,504,577
LBP/PIDS Proper (Buendia Branch)	0052-1149-34	515,422	2,018,007
LBP/PIDS ACIAR project	1872-1037-71	68,373	80,658
LBP/PIDS Head office	3401-07-0973	14,352	10,263
LBP/PIDS 3iE DSWD project	1872-1037-63	0	118,118
		211,559,989	41,666,793

The PIDS total cash in bank–local currency amounted to PHP 198.841 million, while the externally funded project funds amounted to PHP 12.719 million. This was used to pay various project expenses incurred for the specific project in peso.

5.2 Cash in Bank–Foreign Currency

Particulars	Account No.	2020	2019
LBP/PIDS Proper (Pasong Tamo Branch)	1784-0093-66	16,641,674	3,723,874
LBP/PIDS ACIAR project	1874-0029-13	3,222,696	2,807,852
LBP/PIDS 3iE DSWD project	8874-0028-91	0	4,488,457
		19,864,370	11,020,183

The PIDS total cash in bank–foreign currency amounted to PHP 16.642 million, while the externally funded project funds amounted to PHP 3.223 million, which was used to pay various project expenses incurred for the specific project in dollars.

5.3 Time Deposit–Foreign Currency

This account represents placement of USD 380,057.06 at Land Bank of the Philippines (LBP)-Pasong Tamo branch for a period of 90 days at a rate of 0.50 percent per annum to mature on March 17, 2021. Conversion rate is at PHP 48.036 =USD 1.

6. FINANCIAL ASSETS

	2020	2019
Total current financial assets	349,946,768	256,986,594
Total noncurrent financial assets	312,962,924	392,731,258
	662,909,692	649,717,852

6.1 Current financial assets

As at December 31, 2020

Value Date	Maturity Date	Terms	Issuer	Rate (%)	Cost of Investment
07/23/20	01/20/21	181 days	DBP Treasury	1.61500	1,132,654

	11,612,471	3,066,001	14,678,472	15,862,328	3,066,001	18,928,329

7.1 Receivables

Accounts	2020	2019
Interest receivables	4,644,059	10,962,343
	4,644,059	10,962,343

This account refers to the interest income earned but not yet received for the year from various investment operations.

7.2 Aging/Analysis of Receivables

As at December 31, 2020

Accounts	Total	Not Past Due	Past due		
			< 30 days	30–60 days	> 60 days
Interest receivables	4,644,059	4,644,059	0	0	0
	4,644,059	4,644,059	0	0	0

7.3 Interagency Receivables

Accounts	2020	2019
Due from national government agencies (NGAs)	8,396,870	6,035,263
	8,396,870	6,035,263

This account is broken down as follows:

Particulars	2020	2019
PIDS/Commission on Higher Education (CHED) project “Research Development and Extension”	3,066,001	3,066,001
PIDS/Agricultural Credit Policy Council (ACPC) project “Assessment of the Credit Demand of Small Farmers and Fisherfolk”	2,035,011	508,753
PIDS/Department of Health project “The 2019 Advancing Health through Evidence-assisted Decision with Health Policy and System Research Program”	1,604,356	2,423,243
PIDS/Department of Agrarian Reform project “ConVERGEence on Value Chain Enhancement for Rural Growth and Empowerment”	1,000,000	0
PIDS/TESDA project “Policy Research on Youth Not in Employment, Education and Training (NEET) in the Philippines Today?”	521,000	0
PIDS/Department of Budget and Management (DBM) project “Procurement Services”	169,250	756
PIDS/DOST Project “The Future Science and Technology Human Resource Requirements in the Philippines	0	36,510
	8,396,870	6,035,263

The receivable from PIDS/CHED “Research Development and Extension Project” amounting to PHP 3.066 million was part of the PHP 560-million Disbursement Acceleration Program (DAP) for the implementation of the Grants-in-Aid for Research Development and Extension Project which was released by the DBM to PIDS. Of the PHP 560-million fund, PHP 504 million was transferred/released to CHED on June 20, 2012. The remaining balance was already liquidated by the Benguet State University to CHED, but CHED did not record the liquidation in its books of accounts due to the disallowance issued by the BSU auditor. The case is on petition for review with the COA Commission Proper.

The receivables from PIDS/DOH project “The 2019 Advancing Health through Evidence-assisted Decision with Health Policy and System Research Program”, PIDS/ACPC project “Assessment of the Credit Demand of Small Farmers and Fisherfolk”, PIDS/DAR project “ConVERGEncE on Value Chain Enhancement for Rural Growth and Empowerment” and PIDS/TESDA project “Policy Research on Youth Not in Employment, Education, and Training (NEET) in the Philippines Today” are the billings for the services rendered not yet paid.

7.4 Other Receivables

	2020	2019
Other receivables	1,634,043	1,874,730
Advances to officers and employees	3,500	53,765
Due from officers and employees	0	2,228
	1,637,543	1,930,723

Other receivables account refers to the billed/recognized revenue from the projects that are not yet paid, which consists of the following: PIDS/Philippines Business for Education (PBED) project “YouthWorks PH Policy Research Series on Youth NEET and Training and Skilling Landscape in the Philippines” amounting to PHP 260,500; PIDS/Center for International Knowledge Development project titled “Resilient Asia Network: the COVID-19 Context and Health System Resilience” amounting to PHP 423,183; and PIDS/United Nations Economic and Social Commission for Asia and the Pacific project titled “National Study and National Action on Plan for Regional Integration of the Philippines” amounting to PHP 306,650; Advances to PIDS Provident Fund, Inc. for various expenses amounting to PHP 22,518; and for capital outlay items/jobs received/done after December 31, 2020, of which, PHP 621,192 was obligated.

Advances to Officers and Employees are cash advances for travel purposes of the employees which will be due for liquidation in CY 2021.

8. INVENTORIES

	2020	2019
Inventory held for distribution		
Carrying amount, January 1	81,427	114,264
Additional/acquisitions during the year	97,190	184,140
Expensed during the year except write-down	(103,288)	(216,977)
	75,329	81,427

Regular purchases of office supplies for stock are recorded under the inventory account and issuances thereof are recorded based on the Report of Supplies Issuance.

9. PROPERTY, PLANT, AND EQUIPMENT

As at December 31, 2020

	7,620,104	8,201,043

The account Due to National Government Agency-PIDS/CHED "Research Development and Extension Project" pertains to the DAP-RDE funds released to PIDS (see Note 7.3). This account was debited when PIDS recorded the audited liquidation report of CHED and State Universities and Colleges as well as the receipt of refund of unutilized funds. This amount was already liquidated but not yet booked in CHED books of accounts due to disallowance issued by the BSU COA auditors.

The account Due to Bureau of Internal Revenue (BIR) consists of the income tax on accrued interest income subject to final tax and taxes withheld from employees' compensation, contractors, and suppliers. The same are regularly remitted by the Institute to the BIR on or before their due dates. The Due to GSIS account consists of employees' premium payments and other payables for remittance to GSIS on or before their due dates.

13. TRUST LIABILITIES

Particulars	2020			2019		
	Current	Noncurrent	Total	Current	Noncurrent	Total
Trust liabilities	6,496,884	2,819,498	9,316,382	495,144	3,987,756	4,482,900

	15,916	205,810	221,726	284,155	1,586,612	1,870,767

16. PROVISIONS

	2020	2019
Leave benefits payable	30,206,309	27,131,993
	30,206,309	27,131,993

17. NET ASSETS/EQUITY

The details of the account are presented below:

	2020	2019
Beginning balance, January 1	736,035,104	714,276,313
Prior period adjustments	-	(21,363,156)
Restated balance, January 1	736,035,104	692,913,157
Surplus for the period	174,776,014	43,045,822
Others	1,337,747	76,125
Balance at December 31	912,148,865	736,035,104

The net assets/equity consists of the government equity account and the accumulated surplus/deficit account. The government equity account comprises the endowment fund amounting to PHP 311.641 million and Investment Capital-Held in Trust amounting to PHP 0.168 million.

The Endowment Fund consists of funds released by the Bureau of the Treasury through the DBM in the amount of PHP 311.053 million and PHP 0.588 million from the Policy Training and Technical Assistance Facility, which was contributed to the equity of the Institute. The Endowment Fund, which was established under the same law that created the Agency, was purposely meant for investment, earnings of which shall be used in the operational requirements of the Institute. The account Investment Capital-Held in Trust represents the total cost of fixed assets purchased and used in the implementation of externally funded projects (see Note 9).

The Accumulated Surplus/Deficit account consists of the accumulated earnings of the Institute, prior period adjustments, and other capital adjustments.

18. CAPITAL OUTLAY

This account consists of PPE purchased for the year, broken down as follows:

	2020
Machinery and equipment	6,385,367
Books	33,865
	6,419,232

19. SERVICE AND BUSINESS INCOME

The details of the account are presented below:

	2020	2019
Research fees	27,616,108	24,850,817
Interest income	24,516,621	31,085,016
Sale of publications	9,468	21,435
	52,142,197	55,957,268

Research fees pertain to the earnings from the externally funded research projects, most of which were completed and closed during the year. As part of the Institute's cost recovery program, the projects were charged for management fee and for the actual time rendered by research fellows, supervising research specialists, and research assistants who worked on the project. In addition, overhead project expenses ranging from 5 to 20 percent of the total project cost were charged by the Institute as agreed upon with the funding entities.

Interest income account represents earnings from investments and bank deposits/financial assets of the Institute.

Sale of publications account represents the proceeds from the sale of various articles published by the Institute.

20. PERSONNEL SERVICES

	2020	2019
Salaries and wages	59,319,007	55,499,311
Other compensation	20,786,370	17,132,975
Personnel benefit contribution	9,152,653	8,509,940

24. NONOPERATING INCOME, GAINS, OR LOSSES

24.1 Gains

	2020	2019
Gain on foreign exchange	234,782	154,156
	234,782	154,156

24.2 Losses

	2020	2019
Loss on foreign exchange	1,675,704	1,012,755
	1,675,704	1,012,755

25. MISCELLANEOUS INCOME

	2019	2018
Photocopying services	3,169	42,522
Supplies mark-up	4,968	2,057
Closing of HMO funds—interest income earned	161,520	0
Penalties/others	204,864	70,949
	374,521	115,528

26. SUBSIDY FROM THE NATIONAL GOVERNMENT

	2020	2019
Operations	135,861,000	165,694,000
Lot rental	72,576,000	0
Building construction	82,427,000	0
	290,864,000	165,694,000

This account represents the regular subsidy received from the National Government (NG). PIDS had an approved appropriation amounting to PHP 322.294 million per General Appropriations Act for Fiscal Year 2020. The DBM in CY 2020 released the PHP 322.294 million per Special Allotment Release Order (SARO)-BMB-C-20-0000356 dated January 30, 2020. A negative SARO per SARO-BMB-C-20-0012349 was issued for the PHP 31.430 million pursuant to Republic Act 11469 or the *Bayanihan* to Heal as One Act dated March 24, 2020. Likewise, Notices of Cash Allocation (NCA) per NCA Nos. BMB-C-20-0001428, BMB-C-20-0004078, and BMB-C-20-0007116 were released by the Bureau of Treasury to fund the cash requirements for CY 2020.

PIDS entered into a Memorandum of Understanding with the University of the Philippines for the lease of 3,000-square-meter lot for a period of 25 years. A groundbreaking ceremony was held on January 27, 2020, but the lease did not push through because some provisions in the contract were disadvantageous to PIDS and negotiations on the said provisions were not successful. Thus, the subsidies for lot rental and building construction amounting to PHP 155.003 million were unutilized and the said balances were closed in the Accumulated Surplus/Deficit account of the Institute and rebudgeted as Capital Outlay for CY 2021. The total amount of PHP 155.003 million plus the interest earned amounting to PHP 66,232.27 are being maintained at LBP Pasong Tamo branch. Said fund may not be returned to the NG since the project is not yet abandoned or cancelled. PIDS Management was instructed by the PIDS Board of Trustees to explore other options to expedite the project implementation.

27. REPORT ON THE SUPPLEMENTARY INFORMATION REQUIRED BY BIR

27.1 Revenue Regulation No. 15-2010

Revenue Regulation (RR) No. 21-002 prescribing additional procedural and/or documentary requirements in connection with the preparation and submission of financial statements accompanying income tax returns (ITR) was amended under RR No. 15-2010. The amendment that became effective on December 28, 2010 requires the inclusion in the notes to financial statements, information on taxes, duties, and license fees paid or accrued during the year in addition to what is required under the PPSASs and such other standards and/or conventions.

Below is the additional information required by RR No. 15-2010. This information is presented for purposes of filing with the BIR and is not a required part of the basic financial statements.

a. Output VAT

The PIDS does not recognize output VAT in its books.

b. input VAT

The PIDS does not recognize input VAT in its books.

c. Taxes and licenses for 2020

	2020	2019
Under Taxes, Insurance Premiums, and Other Fees:		
20% final tax on interest income on investments and bank deposits	5,482,139	6,712,201
Documentary tax	0	0
Renewal of vehicle registration	15,943	19,693
	5,498,082	6,731,894

d. Withholding taxes for 2020

d1. Withholding tax on compensation

	2020	2019
Total withheld tax for the year	11,077,703	9,362,838
Less: payments made from January to November	9,286,779	8,003,018
Withholding tax still due and payable	1,790,924	1,359,820

d2. Expanded withholding tax

	2020	2019
Total withheld tax for the year	1,910,200	2,190,275

The Philippine Institute for Development Studies (PIDS) was created on September 26, 1977 by virtue of Presidential Decree 1201 as an agency attached to the National Economic and Development Authority (NEDA). It is organized as a nonstock, nonprofit government corporation.

PIDS serves as the Philippine government's primary socioeconomic policy think tank performing policy-oriented research on various aspects of the Philippine economy to assist the government in formulating plans and policies that are based on research evidence.

Based on this mandate, it is the mission of PIDS to serve the interests of the Filipino people through the provision of rigorous analyses of policy issues that can guide policymakers and leaders in decisionmaking.

PIDS is ranked as one of the best think tanks in the world in the *Global Go To Think Tank Index Report* annually published by the Think Tanks and Civil Societies Program of the University of Pennsylvania.

It has been an ISO-certified organization since 2019.
