TIMUR GUSEYNOV

tim@plateastudio.com

ABOUT ME

I enjoy solving complex problems, designing and developing web apps with the emphasis on UX and quality, creating readable and maintainable programs using OOP, FP, SOLID, Clean Code design principles and automated tests, as well as creating pixel perfect CSS.

I speak English, Spanish and Russian

SKILLS

LANGUAGES

Golang, Elm, Modern JS, CS, Ruby, Python, Bash, SQL, HTML, Handlebars, Jade, CSS, SASS, LESS, Stylus, LaTeX, Typst

DATABASES

MongoDB, MySQL, PostgreSQL, GraphQL, Redis, Aerospike, Google Firestore, CloudFlare KV

RUNTIMES, FRAMEWORKS

Node, Express, React, React Native, NextJS, Redux, Meteor, Electron, Rails, Django, Drupal, GoHugo, FastAI

TESTING, AUTOMATION, BUILD

Mocha, Enzyme, Selenium, Puppeteer, Webpack, CircleCI, GitHub Actions, Bitbucket Pipelines

CLOUD

GCP Functions, Tasks et al., AWS Lambda, RDS, S3, Cognito et al., CloudFlare Workers, Pages et al., Digital Ocean, Docker, Terraform, Nginx, Datadog

DESIGN, DEVELOPMENT TOOLS

Git, Idea, Vim, Balsamiq, Sketch

2010 - PRESENT FULL STACK DEVELOPER

I have been planning, designing and developing web, mobile and desktop applications using variety of programming languages, frameworks, relational and document-oriented databases, solo as well as in collaboration with stakeholders, art directors, project managers, designers and other developers located across the globe, including working full time via pair programming and participating in daily stand-ups.

I worked with various small and medium-size tech, design, educational, publishing, pharmaceutical, and other companies and start-ups, some of them are:

- **Dropon**, BE - Logistic Tools & Intelligence
- **Synergeticon** - Airbus, DE - Data Science, Robotics
- **Quadio**, US - The College Creative Network
- **Easy Synergy corp**, US - Software development
- **Digitorus**, NL - Cybersecurity identity management
- **Ten Digit Communications**, US - Messaging platform
- **Noorik Biopharmaceuticals**, CH - Pharmaceutical R&D
- **Plentiful PTE**, SG - Web design and development

I've been engaged in studying the market, creating user stories, scenarios, low fidelity prototypes, complete designs as well as solving wide range of front-and back-end problems, creating interactive UI's, developing and using API's, creating command line tools, parsers, bots, working with digital signatures, optimizing front-end and back-end build processes, creating server infrastructures and a lot more!

2005 - 2009 UNIX ADMINISTRATOR

I was responsible for building reliable, high performing and secure servers and server pools based on FreeBSD, Gentoo, RHEL, Debian, Jail and OpenVZ virtualization, advanced configuration of Nginx, Apache HTTP and Tomcat web servers, Mysql databases, Postfix, Exim, Communigate Pro email systems, BIND name resolution services, Cisco routers, as well as configuring and ensuring the work of the Apache Subversion, Atlassian Jira, Atlassian Confluence and other development tools.

Some of the companies I worked with:

- **Cinimex**, RU - Software development. Clients include some of the largest Russian and international banks: UniCredit Bank, Alfa-Bank, Raiffeisenbank, Gazprombank, VTB Group.
- **BDirect Media Group**, RU - Media production

PERSONAL PROJECTS

- plateastudio.com, Founder - created more than 100 logos, a few websites, web and mobile apps, some of the examples of our work available on the website and portfolio behance.net/plateastudio.
- zenland.plateastudio.com, Meteor, Express - app helps people without design or programming knowledge to create single-page websites by filling out a simple convenient form and to choose the design of the blocks without filling out the information again.
